City Council Clerk,

Please submit the following letter to Council File #17- 0447.

I am writing in support of an ordinance that would create a human health and safety buffer by limiting current and future oil and gas drilling activities to areas that are at least 2,500 feet away from homes, schools, hospitals, parks, and other places where drilling activities would have a harmful effect. Approximately 628,000 Los Angeles City residents are within 2,500 feet of an active drilling site. Residents in close proximity to these sites have increased health problems (cancer, heart attacks, breathing, digestive and skin problems, etc.), and are exposed to greater safety hazards than resident living further away. Please protect these people by enacting this ordinance.

Thank you,

Ann Dorsey
