Comments for Public Posting: Good Morning City Council Members. I am a volunteer with the Everybody In LA Campaign. The Los Angeles homeless count revealed a 14% Increase in January. The COVID-19 pandemic has caused many more people to lose their incomes, which is creating more at-risk of becoming homeless. People experiencing homelessness are more at risk of contracting COVID-19 and spreading the virus to others. Please add \$100 million to the Coronavirus Relief Fund to bring the total to \$200 million.

Comments for Public Posting: We need to increase the allocation from \$100 million to \$200 million specifically in Coronavirus Relief Funds so that we can meet the needs for both interim and permanent housing solutions.
