Comments for Public Posting: Dear honorable members of the PLUM Committee: I am speaking on item 6. My husband and I live on Meredith. Thank you for your help. Extending the HCR from the Bird streets across to the western boundary of CD 4 will correct a terrible error. When our area was left out of the Hillside Construction Regulations, unprincipled developers scrambled to begin oversized, habitat destroying projects. One in particular owns 97 acres up here and has made his plans to carve it up with mega-homes known. The destruction of the natural habitat with totally inappropriate roads being carved into the hillside, vegetation ripped away and massive amounts of concrete being poured is tragic. The omission of this area from the HCR was hopefully just a mistake and your actions will begin to make right. I also want to thank our Councilmember, David Ryu. for listening to us and getting us here. But time is the enemy. This blunder must be remedied before the next, oversized, inappropriate project is approved without review. Thank you.
Sincerely, Marcia & Mark Smith

Dear honorable members of the PLUM Committee:

I am speaking on item 6.

My husband and I live on Meredith.

Thank you for your help.

Extending the HCR from the Bird streets across to the western boundary of CD 4 will correct a terrible error.

When our area was left out of the Hillside Construction Regulations, unprincipled developers scrambled to begin oversized, habitat destroying projects.

One in particular owns 97 acres up here and has made his plans to carve it up with mega-homes known.

The destruction of the natural habitat with totally inappropriate roads being carved into the hillside, vegetation ripped away and massive amounts of concrete being poured is tragic.

The omission of this area from the HCR was hopefully just a mistake and your actions will begin to make right.

I also want to thank our Councilmember, David Ryu. for listening to us and getting us here.

But time is the enemy.

This blunder must be remedied before the next, oversized, inappropriate project is approved without review.

Thank you.

Sincerely,

Marcia & Mark Smith
