Honorable Herb Wesson, President Los Angeles City Council

c/o June Lagmay, City Clerk City of Los Angeles 200 North Spring Street City Hall – Room 360 Los Angeles, CA 90012

Re: Commencement of Alquist-Priolo Fault Zone Study, Hollywood Fault Zone

Millennium Hollywood Project; EIR No. ENV-2011-0675-EIR

## Dear Council President Wesson:

The Alquist-Priolo Earthquake Fault Zoning Act (Public Resources Code, Division 2, Chapter 7.5, Sections 2621 *et seq.*) requires the State Geologist to place Earthquake Fault Zones around faults deemed to be sufficiently active and well-defined. Under this Act, cities and counties affected by the zones must regulate certain development projects within the zones. They must withhold development permits for sites within the zones until geologic investigations demonstrate that the sites are not threatened by surface displacement from future faulting.

Based on a number of independent geological investigations, and recent work by the California Geological Survey (CGS) culminating in the 2010 Fault Activity Map of California, CGS has commenced a detailed study of the Hollywood Fault and its associated splay faults for possible zoning as "Active" (as defined by the State Mining and Geology Board in the California Code of Regulations, Section 3601(a)) pursuant to the Alquist-Priolo Act. This investigation and resultant maps and reports are scheduled for completion by the end of this year or early in 2014.

It is our understanding that the Los Angeles City Council and the Planning Commission are in the process of reviewing plans for the prospective Millennium Hollywood Project, which may fall within an Earthquake Fault Zone should our investigations conclude that an active portion of the Hollywood Fault lies within the project site. If sufficient information results in the placement of an Earthquake Fault Zone, it will provide the City with new information for its consideration of current and future proposed developments all along the Hollywood Fault.

Results of this investigation will be provided to the City of Los Angeles immediately upon their release, and the City will have an opportunity to examine and comment on the Preliminary version of the maps and reports. Please do not hesitate to contact the CGS at any time if you have questions regarding this fault-zoning process.

Sincerely,

John G. Parrish, Ph. D., PG

State Geologist
