**Comments for Public Posting:** The location for the homeless apartment building concerns me for a number of reasons. There is an elementary school less than a block away There are 2 preschools/child care programs about two blocks away There are several dispensaries in the area. The areas landscape doesn't need a 4 or 5 story building towering over the neighborhood. The mountains are beautiful and I moved here to see them. The homeless people I see in the neighborhood aren't families. The homeless I have run into seem to be people with mental health and drug related issues. These people don't want to follow rules. There are several empty schools or industrial buildings in the valley. Why spend money building? Use what we have and use the money to help the families get back on their feet. Schools have rooms to use for daycare, living quarters, a cafeteria for group meals, a health facility, study areas or group meetings. Empty industrial buildings can be redesigned quickly and for a fraction of the cost. The people don't need luxury.
