Comments for Public Posting: I am writing in support of the our request to be added as a Special Use District protected by the Hillside Construction Regulations and to urge that commercial delivery vehicles be regulated by these regulations as well. The worst place in all Los Angeles to be building housing is on the narrow, obsolete, pre-Long Beach Earthquake streets of our hills. Limits must be put in place AND enforced actively so that we can live in our homes with some quality of life. An extreme example is a property on dead end street Cross where the cliffside lot is part of a no stopping zone with a ten foot drop down to the top of the heavily sloping lot. There is literally no place to stop, park, stage or build and yet the city has approved the site for a single family dwelling. The sole road access for nearly twenty homes will be cut off for transit, fire, police and ambulance service.
