Comments for Public Posting: How is Kevin De Leon motion related to pending SB51 legislation? Is he aware that Cal Trans has a legal duty to first offer the empty houses to former tenants? How will De Leon and the city work with El Sereno Community Land Trust to ensure that the vacant homes are locally managed and kept affordable? How would this proposal integrate the limitless positive energy of local organization that can bring new and effective solutions? Please do your research speak to tenants, former tenants, and community members to bring solutions inclusive to all directly affected.

Comments for Public Posting: I oppose SB51 as a long time resident here in the EL Sereno community I feel that our Senator and Counsel member forgot what community is all about once again We were never contacted by any official to discuss our needs we were hog tied like animals and pushed aside. WE took the initiative to shelter in place for our lives we were in danger and in need of shelter. Most of us Reclaimers work .and this is our community we are the community. We care for our neighborhood. We would like to manage our own we have a land trust give us our homes back and allow us united Caltrans Tenants and the Reclaimers to purchase the home at the Roberti Bill price. Its very simple your job is to assist the community with the utmost needs to make us prosper.
