Comments for Public Posting: Please vote against SB 9. This bill will not add the much needed affordable housing in our city, but make it more advantageous for developers to further rob hard working angelenos from a place they can call home. Eliminating CEQA and Coastal Review and the critical input of community member is not the right direction and will not create thriving communities. It is by collaborating with the community, providing equitable housing with minimum standards of living spaces must be a human right issue. Further removing open space and landscape opportunities in our city will degrade our environment and puts the climate at risk.
