Council File No: 21-0002-S21

Comments for Public Posting: I urge the City Council to vote AGAIST SB 10. First and foremost RHNA allocated housing projections need to be re-evaluated. As the Embarcadero Report shows, the need of housing in our state has been incredibly inflated. Prior and now with Covid-19, thousand of Californian are fleeing the State, and throughout the city the vacancy rate is steadily increasing. Although we need better housing for the lower and middle class, this State Ballot will further increase the divide between the super rich and the ones that barely make it. It increases property value and will displace millions of renters, which will not find comparable accommodations in the City. As it is currently happening! Trickle-down housing market, a made up concept to begin with, clearly is not happening, and blue/white collar Angelinos can no longer exist in our beloved city. Streamlining the process of up-zoning our beloved communities cannot be the only way to improve our "housing crisis" if such thing is even a problem! Please VOTE NO on SB 10, and SB 9. Both Senate Bills are the effort of real-estate fueled greediness at the expense of working-families middle class Californian and our environment! How can Califonia be a leader in environmental measures and then disregard them completely when it come to building housing development, which do not required any climate mitigation measures that fight global warming? How can California law maker keep a straight face when they suggest to bypass CEQA and Coastal Commission? Both Bills are against the people, against communities. They aim at completely removing California residents of their voices, an arrogance only an entitled politician can put forward. Weiner and his peers want us to believe they are the few chosen one know the path forward!
