

## Communication from Public

**Name:** ns

**Council File No:** 21-0002-S52

**Comments for Public Posting:** This is almost laughable coming from Public Servants who make over \$200,000 a year. Council Members who advocate and support ILLEGAL IMMIGRATION. Council Members who do NOT own businesses. It is easy to put the onus on other people when you don't have to pay for it. It has historically been shown how \$15 an hr, across the board hurts not only the business, but the employees as well. It has been historically shown that hiring illegal labor undervalues jobs and wages. In our communities of color, the low skilled entry jobs are taken away by undocumented workers and unscrupulous businesses at the peril of struggling workers. So if a small business has a choice of paying a low skilled worker \$15 and hour, or hiring an undocumented Immigrant and pay \$\$8 under the table....which do you think is going to happen? When I SEE our Council Members HIRE LEGAL people of color for all their personal choices, and pay them \$15 or more an hour, then I would give you all more credence.
