Subject: Please reject policies that would kill good-paying jobs
To: City Clerk <CityClerk@lacity.org>

Dear PLUM Committee Members:

I am writing to share my concerns regarding implementing energy policies that would kill thousands of good-paying jobs, especially as we're still trying to navigate out of the global pandemic that has decimated the business community with shutdowns.

The country, state, and city are no strangers to the economic fall-out from the pandemic. Even before COVID-19, the City of Los Angeles has long been Ground Zero for our nation's affordability crisis. The cost of everyday necessities like housing, child care, and transportation have been crushing working families, making it nearly impossible to make ends meet. Now layered with COVID-19, millions more have been pushed to health and financial insecurity on a level not seen in recent times.

To pursue taking any action that would raise energy costs and kill thousands of good labor jobs is beyond punishing to those hardest hit by the pandemic.

Policies and actions that increase the costs of everyday necessities is an example of how government continues to perpetuate the cycle of poverty and despair in our most underserved communities.

I strongly urge this Committee to reject any actions that will further decimate Los Angeles' economy and continue to target communities most in need.

Sincerely,
Aleen Postoyan
