Comments for Public Posting: All of the plans the council is presenting, I agree strongly to support. I have another concern as well, I'm hoping another project could be added, I work with and meet with many different diverse people within Los Angeles County, many many time over many expressing a strong concern of wanting to own a home but can afford it because the Realestate Market does not focus on people of their income bracket, these people work full time 40hours plus weekly, self owned business workers and can't afford buying a home because the Realestate Market does not market homes within their income bracket in Los Angeles, I'm one the Los Angeles residents along with many other working for the city county of Los Angeles whom work full time but find my self after working long hours year after year not able to afford home ownership, I'm hoping we can present plan and make it a reality to focus on people whom have an income making less than \$60,000 a year owning their homes, many many people work hard especially as a public service employee for the Los Angeles County making \$50,000-60,000; however, can't afford owning a home because the Realestate market is too high for people of the income bracket mentioned. My idea is to build Realestate for those of low income whom work full time within Los Angeles county. Please help me understand how to help my self and the community in becoming home owners with our income bracket making less than \$60,000 a year in the city of Los Angeles.
