Comments for Public Posting: As we move From a stay at home order being lifted to an open door somewhat back to normal. It is even more important that folks have a place to stay with there families . Housing is a right and as I carpenter I'd like to see more housing being built in LA that can not only house folks but give them a job doing so . Jobs / wages/ benifits is a slogan I like to use but also be mindful of contractors that take advantage of the the work force . There needs to be a system or language in all the new housing contracts stating contractors need to pay a living wage and supply its employees with health care. Also a state accredited training program needs to be in place so that folks can get the training that they need to be successful from the high school level two folks just coming off the street or incarceration. Fix this now there is no time like the present. Take action.

Comments for Public Posting: Please help us clean up the City and County of Los Angeles! Trash, homeless encampments everywhere. Illegal Dumping. What a shameful display of trash, garbage and graffiti at the freeway exit of MLK Blvd and the 110 FWY. We can do better. What about posting signs?, Traffic control at these areas like Broadway and Main Streets south of Imperial Highway under the freeway passes near the railroad tracks. Always garbage, piles. How about cameras and enforcing the laws? We need our police and those that serve us and our communities to help with this. Every week when the street sweeper comes to clean my block the neighbors do not move the cars and thus it is left dirty. Where is traffic control. Hire more people. I see that the homeless are pushed away from the University of Southern California and the museums. Yet a block away the streets are filthy and you see a long block of tents and graffiti . Businesses have to erect fences to keep the homeless and mentally ill from burning the building or writing on the wall. What is the City doing? Where are our tax dollars going? How are they being spent? Why are you cleaning the streets twice a month and not every week in CD9? The streets are dirtier than ever. I see buildings being built but when are we going to see some of the homeless move into them? What are you doing to address the mental illness population of homeless people? I am hoping and praying for all you politicians that you come up with realistic plans to help clean up our city.
