Comments for Public Posting: Is it possible for some transparency about the true motives of this harmful and aggressive sweep and fencing of the echo park lake which has stood as an anti gentrification landmark for 50 years? Perhaps the Olympics committee Chairman would happen to know why he is being pressured to hide the unhoused peoples of Los Angeles truth for the show of the Olympics? Can we work together to find a solution without lies and deceit? At least during a pandemic? Any chance we can get some empathy and understand and slow this down to work with the people that don't have privileges like you all do. Have you all ever thought about what it would be like to be in these peoples situations. Really think about it. This violence is sickening and not fair in the worst ways. Do the right thing. Don't someday your life away!! Do the RIGHT THING NOW!!!

Comments for Public Posting: This is general comment. My comment is in response to last nights events at Echo Park Lake. This was an aggressive attacked on the unhoused. interim housing is not a resolution, this is just shuffling people around. You care more about the housed neighbors in the area which is unfair. This will result in covid spikes and possible deaths. Shame on all of you!
