Comments for Public Posting: Council File: 21-0052 I am writing in support of more public housing. Los Angeles absolutely needs to create as much low-income housing as possible. It will improve the lives of all Angelenos to reduce unhoused citizens who are currently forced to live under bridges, on streets and in encampments.

Comments for Public Posting: I am in agreement with the statement from Abundant Housing LA and support this motion. This motion asserts that its goal is to provide Angelenos with the basic human right of a home. All people deserve to have a home, and 25,000 new units by 2025 will push Los Angeles much closer to effectively addressing its homelessness crisis.

Comments for Public Posting: I support the Motion for the City to create at least 25,000 new housing units by 2025 as the city's Homeless Housing Goal. Los Angeles absolutely needs a recalibration of its "North Star", as referenced in the language of the motion, with particular emphasis on effective operation of a "system that has the capacity to quickly rehouse individuals...and can generate a throughput that puts unhoused people into temporary housing and then into permanent housing in a timely manner."

Comments for Public Posting: Los Angeles still has a crisis - not enough housing and too many homeless people. We need more housing of all kinds. Increasing the goals for Los Angeles is an important step in solving this problem. Please pass this motion and work to create the housing that our residents need.

Comments for Public Posting: I urge the city council to support the creation of 25,000 housing units to address the housing and homelessness crisis in in Los Angeles. Only housing will end homelessness. Los Angeles leadership has ignored RHNA and the basic housing needs of its residents for too long. I urge the City Council to take bold action to address the housing and homelessness crisis in our city. Passing this motion to create 25,000 new units of affordable and supportive housing will be one step forward. The city must also take steps to break down the systemic barriers to housing creation found in zoning, regulations and bureaucracy. Please vote yes on motion 21-0052
