Council File No: 21-0264

Comments for Public Posting: While I appreciate the spirit of this motion, I agree with the CIS made by LFNC that centering a police response to AAPI hate crimes does not address the larger issue at hand, biased and racist tendencies within our culture. I support their call for culturally competent community outreach that will educate not only everyday folks but law enforcement and Neighborhood Councils as well. Identifying how implicit bias infects perceptions and practice requires training and continual education. Performative declarations are not enough, we need actions within our communities that forge greater compassion and understanding. Please amend this motion to request more and better equity, inclusion and diversity training across the city.
