**Council File No:** 21-0407

**Comments for Public Posting:** 1. Bylaws should meet the uniqueness of each neighborhood council. They cannot be the same across the neighborhood council system because each NC represents a different type of population. with different demographics. 2. Stakeholders must be able to present some type of identification when they vote to ensure they are members of the community they intent to vote on. This cannot be standardized either since the demographics of each community are different. Therefore, the NC should be able to decide on the acceptable type of identification.
