Comments for Public Posting: I fully support the effort to examine the neighborhood council voting process. After the last vote and the behavior of some members of the Sunland-Tujunga Neighborhood Council in 2020 and the election process they put in place, there should be some standardization because there are some members who have zero respect for the stakeholders of the community, openly lie to them, or try to cause nothing but confusion through manipulation. The system as it currently exists is extremely disenfranchising and revolting to any stakeholder who has taken the time to actually try to participate. I really have never seen anything like it. There are many good people who have worked hard for our community through the neighborhood council but, unfortunately, there are a few people who dominate and manipulate the purpose and spirit of the neighborhood council system to feed their own egos and desires. It is unjust to the community, the neighborhood council system and to the city of Los Angeles. I fully support any and all reforms that can protect the good people from the cult of personalities that have tarnished it with their selfish motivations and ego driven manipulations. It is unacceptable and needs to be closely examined.
