**Council File No:** 21-0350

**Comments for Public Posting:** As one council man said: " I'll save you time - This is not feasible". And that is what your constituents have been saying all along: "temporary" housing on the beach where all residents of Los Angeles County want to come to spend some time outdoors and you are now taking that opportunity away from residents who don't live near the beach (most cities throughout the US have 6.8 acres of park land for 1000 residents, Los Angeles only offers 1 acre per 1000 residents!). You are taking valuable space away not only from people who live on the westside but for residents from poorer neighborhoods who sometimes have no where to go for recreation other than the beach. There are no services near by for the homeless. You will endanger them trying to walk to a grocery store. They can't get proper care when isolated on the beach. You are "banning" them to an island, where the only way out for them is to risk their lives walking along PCH? The homeless deserve better than being placed in areas where they can not access necessary services and get help for either their addiction or their mental health or try to be reintegrated into society. We will have more fires, depleting important resources from our fire departments. Temporary solution? We live on a street where the city built a "temporary" emergency road 60 years ago because a landslide buried the main road. After they built the temporary road, nothing was ever done to fix the main road. We still live with a temporary substandard road.. temporary in Los Angeles means permanent. don't waist tax payers' money, don't conduct a feasibility study... it is not feasible.
