Comments for Public Posting: Thank you, Mr Chair and members of the committee for the opportunity to address this item. Thanks to those passionate advocates who took part in the processes. As a constituent with lived experience of being homeless, I am urging each and everyone of you to move this proposal and the proposed model from a thought into implementation and action. We must acknowledge that our policy's and structures which inform culturally must radically change from oppression to resilience, it is a matter of life and death. THE HEART as I term this proposal and proposed model is the life line that flows pumps moves and beats. As we all have a shared responsibility in the effort to ensure housing is a human right, and that ALL have access and opportunities to the resources and service, we also must have a shared responsibility in holding each other accountable. This proposed model not only defines what is lacking but builds up with the possibilities. This is the optimum time to fully reimaging and save lives.
