Council File No: 18-1104

Comments for Public Posting: Attached please find 173 individual letters of support from students, parents, community members, and health professionals asking that you take swift action in passing a comprehensive ordinance ending the sale of all flavored tobacco products including menthol cigarettes, with no exemptions.

L.A. FAMILIES FIGHTING FLAVORED TOBACCO STATEMENT OF CONCERN

Dear Mayor Garcetti and City of Los Angeles Councilmembers,

As a concerned constituent I ask that you pass a comprehensive ordinance that ends the sale of flavored tobacco, including menthol products and without exemptions for hookah or adult only tobacco shops.

Last year, the California State Legislature acted to protect children and communities of color from Big Tobacco's deceptive marketing of candy flavors, including menthol cigarettes, which have been proven to lure new users to their dangerous products. The passage of SB-793 was a bold step forward to protect the health of this state's youth and communities of color.

Now – the tobacco industry is gearing up to spend enormous amounts of money to reverse our progress. We need local governments to stand with the State Legislature and do even more to protect our kids by ending the sale of flavored e-cigarettes, menthol cigarettes, hookah tobacco, premium cigars, and pipe tobacco.

Menthol and flavored tobacco products are driving tobacco-caused deaths and diseases nation-wide. While the use of non-flavored tobacco cigarettes has been decreasing, the use of menthol cigarettes is on the rise among youth and adults, and among Latinos, Blacks, Whites and LGBTQ communities.

Aligned with Los Angeles County, strong laws ending the sale of flavored tobacco products in the City can protect youth from accessing flavored and cheap tobacco products and are crucial to preventing a lifetime of tobacco addiction among Los Angeles' youth. If successful, the City of Los Angeles would join over 200 localities nationwide. In California alone, at least 45 localities have restricted the sale of flavored tobacco products, including San Francisco and Sacramento.

Join the L.A. Families Fighting Flavored Tobacco coalition, led by the American Cancer Society - Cancer Action Network, the American Heart Association, the American Lung Association, and a growing number of Angelenos. Please Stand with us to protect vulnerable communities from Big Tobacco.

Thank you.

Aligned with Los Angeles County, strong laws ending the sale of flavored tobacco products in the City can protect youth from accessing flavored and cheap tobacco products and are crucial to preventing a lifetime of tobacco addiction among Los Angeles' youth. If successful, the City of Los Angeles would join over 200 localities nationwide. In California alone, at least 45 localities have restricted the sale of flavored tobacco products, including San Francisco and Sacramento.

Join the L.A. Families Fighting Flavored Tobacco coalition, led by the American Cancer Society - Cancer Action Network, the American Heart Association, the American Lung Association, and a growing number of Angelenos. Please Stand with us to protect vulnerable communities from Big Tobacco.

Thank you.

L.A. FAMILIES FIGHTING FLAVORED TOBACCO STATEMENT OF CONCERN

Dear Mayor Garcetti and City of Los Angeles Councilmembers,

As a concerned constituent I ask that you pass a comprehensive ordinance that ends the sale of flavored tobacco, including menthol products and without exemptions for hookah or adult only tobacco shops.

Last year, the California State Legislature acted to protect children and communities of color from Big Tobacco's deceptive marketing of candy flavors, including menthol cigarettes, which have been proven to lure new users to their dangerous products. The passage of SB-793 was a bold step forward to protect the health of this state's youth and communities of color.

Now – the tobacco industry is gearing up to spend enormous amounts of money to reverse our progress. We need local governments to stand with the State Legislature and do even more to protect our kids by ending the sale of flavored e-cigarettes, menthol cigarettes, hookah tobacco, premium cigars, and pipe tobacco.

Menthol and flavored tobacco products are driving tobacco-caused deaths and diseases nation-wide. While the use of non-flavored tobacco cigarettes has been decreasing, the use of menthol cigarettes is on the rise among youth and adults, and among Latinos, Blacks, Whites and LGBTQ communities.

Aligned with Los Angeles County, strong laws ending the sale of flavored tobacco products in the City can protect youth from accessing flavored and cheap tobacco products and are crucial to preventing a lifetime of tobacco addiction among Los Angeles' youth. If successful, the City of Los Angeles would join over 200 localities nationwide. Now – the tobacco industry is gearing up to spend enormous amounts of money to reverse our progress. We need local governments to stand with the State Legislature and do even more to protect our kids by ending the sale of flavored e-cigarettes, menthol cigarettes, hookah tobacco, premium cigars, and pipe tobacco.

Menthol and flavored tobacco products are driving tobacco-caused deaths and diseases nation-wide. While the use of non-flavored tobacco cigarettes has been decreasing, the use of menthol cigarettes is on the rise among youth and adults, and among Latinos, Blacks, Whites and LGBTQ communities.

Aligned with Los Angeles County, strong laws ending the sale of flavored tobacco products in the City can protect youth from accessing flavored and cheap tobacco products and are crucial to preventing a lifetime of tobacco addiction among Los Angeles' youth. If successful, the City of Los Angeles would join over 200 localities nationwide. In California alone, at least 45 localities have restricted the sale of flavored tobacco products, including San Francisco and Sacramento.

Join the L.A. Families Fighting Flavored Tobacco coalition, led by the American Cancer Society - Cancer Action Network, the American Heart Association, the American Lung Association, and a growing number of Angelenos. Please Stand with us to protect vulnerable communities from Big Tobacco.

Thank you.

L.A. FAMILIES FIGHTING FLAVORED TOBACCO STATEMENT OF CONCERN

Dear Mayor Garcetti and City of Los Angeles Councilmembers,

As a concerned constituent I ask that you pass a comprehensive ordinance that ends the sale of flavored tobacco, including menthol products and without exemptions for hookah or adult only tobacco shops.

Last year, the California State Legislature acted to protect children and communities of color from Big Tobacco's deceptive marketing of candy flavors, including menthol cigarettes, which have been proven to lure new users to their dangerous products. The passage of SB-793 was a bold step forward to protect the health of this state's youth and communities of color.

Now – the tobacco industry is gearing up to spend enormous amounts of money to reverse our progress. We need local governments to stand with the State Legislature and do even more to protect our kids by ending the sale of flavored e-cigarettes, menthol cigarettes, hookah tobacco, premium cigars, and pipe tobacco.

Menthol and flavored tobacco products are driving tobacco-caused deaths and diseases nation-wide. While the use of non-flavored tobacco cigarettes has been decreasing, the use of menthol cigarettes is on the rise among youth and adults, and among Latinos, Blacks, Whites and LGBTQ communities.

Dear Mayor Garcetti and City of Los Angeles Councilmembers,

As a concerned constituent I ask that you pass a comprehensive ordinance that ends the sale of flavored tobacco, including menthol products and without exemptions for hookah or adult only tobacco shops.

Last year, the California State Legislature acted to protect children and communities of color from Big Tobacco's deceptive marketing of candy flavors, including menthol cigarettes, which have been proven to lure new users to their dangerous products. The passage of SB-793 was a bold step forward to protect the health of this state's youth and communities of color.

Now – the tobacco industry is gearing up to spend enormous amounts of money to reverse our progress. We need local governments to stand with the State Legislature and do even more to protect our kids by ending the sale of flavored e-cigarettes, menthol cigarettes, hookah tobacco, premium cigars, and pipe tobacco.

Menthol and flavored tobacco products are driving tobacco-caused deaths and diseases nation-wide. While the use of non-flavored tobacco cigarettes has been decreasing, the use of menthol cigarettes is on the rise among youth and adults, and among Latinos, Blacks, Whites and LGBTQ communities.

Aligned with Los Angeles County, strong laws ending the sale of flavored tobacco products in the City can protect youth from accessing flavored and cheap tobacco products and are crucial to preventing a lifetime of tobacco addiction among Los Angeles' youth. If successful, the City of Los Angeles would join over 200 localities nationwide. In California alone, at least 45 localities have restricted the sale of flavored tobacco products, including San Francisco and Sacramento.

Join the L.A. Families Fighting Flavored Tobacco coalition, led by the American Cancer Society - Cancer Action Network, the American Heart Association, the American Lung Association, and a growing number of Angelenos. Please Stand with us to protect vulnerable communities from Big Tobacco.

Thank you.

L.A. FAMILIES FIGHTING FLAVORED TOBACCO STATEMENT OF CONCERN

Dear Mayor Garcetti and City of Los Angeles Councilmembers,

As a concerned constituent I ask that you pass a comprehensive ordinance that ends the sale of flavored tobacco, including menthol products and without exemptions for hookah or adult only tobacco shops.

Last year, the California State Legislature acted to protect children and communities of color from Big Tobacco's deceptive marketing of candy flavors, including menthol cigarettes, which have been proven to lure new users to their dangerous products. The passage of SB-793 was a bold step forward to protect the health of this state's youth and communities of color.

Now – the tobacco industry is gearing up to spend enormous amounts of money to reverse our progress. We need local governments to stand with the State Legislature and do even more to protect our kids by ending the sale of flavored e-cigarettes, menthol cigarettes, hookah tobacco, premium cigars, and pipe tobacco.

Menthol and flavored tobacco products are driving tobacco-caused deaths and diseases nation-wide. While the use of non-flavored tobacco cigarettes has been decreasing, the use of menthol cigarettes is on the rise among youth and adults, and among Latinos, Blacks, Whites and LGBTQ communities.

Aligned with Los Angeles County, strong laws ending the sale of flavored tobacco products in the City can protect youth from accessing flavored and cheap tobacco products and are crucial to preventing a lifetime of tobacco addiction among Los Angeles' youth. If successful, the City of Los Angeles would join over 200 localities nationwide. In California alone, at least 45 localities have restricted the sale of flavored tobacco products, including San Francisco and Sacramento.

Join the L.A. Families Fighting Flavored Tobacco coalition, led by the American Cancer Society - Cancer Action Network, the American Heart Association, the American Lung Association, and a growing number of Angelenos. Please Stand with us to protect vulnerable communities from Big Tobacco.

Thank you.

We need local governments to stand with the State Legislature and do even more to protect our kids by ending the sale of flavored e-cigarettes, menthol cigarettes, hookah tobacco, premium cigars, and pipe tobacco.

Menthol and flavored tobacco products are driving tobacco-caused deaths and diseases nation-wide. While the use of non-flavored tobacco cigarettes has been decreasing, the use of menthol cigarettes is on the rise among youth and adults, and among Latinos, Blacks, Whites and LGBTQ communities.

Aligned with Los Angeles County, strong laws ending the sale of flavored tobacco products in the City can protect youth from accessing flavored and cheap tobacco products and are crucial to preventing a lifetime of tobacco addiction among Los Angeles' youth. If successful, the City of Los Angeles would join over 200 localities nationwide. In California alone, at least 45 localities have restricted the sale of flavored tobacco products, including San Francisco and Sacramento.

Join the L.A. Families Fighting Flavored Tobacco coalition, led by the American Cancer Society - Cancer Action Network, the American Heart Association, the American Lung Association, and a growing number of Angelenos. Please Stand with us to protect vulnerable communities from Big Tobacco.

Thank you.

L.A. FAMILIES FIGHTING FLAVORED TOBACCO STATEMENT OF CONCERN

Dear Mayor Garcetti and City of Los Angeles Councilmembers,

As a concerned constituent I ask that you pass a comprehensive ordinance that ends the sale of flavored tobacco, including menthol products and without exemptions for hookah or adult only tobacco shops.

Last year, the California State Legislature acted to protect children and communities of color from Big Tobacco's deceptive marketing of candy flavors, including menthol cigarettes, which have been proven to lure new users to their dangerous products. The passage of SB-793 was a bold step forward to protect the health of this state's youth and communities of color.

Now – the tobacco industry is gearing up to spend enormous amounts of money to reverse our progress. We need local governments to stand with the State Legislature and do even more to protect our kids by ending the sale of flavored e-cigarettes, menthol cigarettes, hookah tobacco, premium cigars, and pipe tobacco.

Menthol and flavored tobacco products are driving tobacco-caused deaths and diseases nation-wide. While the use of non-flavored tobacco cigarettes has been decreasing, the use of menthol cigarettes is on the rise among youth and adults, and among Latinos, Blacks, Whites and LGBTQ communities.

Aligned with Los Angeles County, strong laws ending the sale of flavored tobacco products in the City can protect youth from accessing flavored and cheap tobacco products and are crucial to preventing a lifetime of tobacco addiction among Los Angeles' youth. The passage of SB-793 was a bold step forward to protect the health of this state's youth and communities of color.

Now – the tobacco industry is gearing up to spend enormous amounts of money to reverse our progress. We need local governments to stand with the State Legislature and do even more to protect our kids by ending the sale of flavored e-cigarettes, menthol cigarettes, hookah tobacco, premium cigars, and pipe tobacco.

Menthol and flavored tobacco products are driving tobacco-caused deaths and diseases nation-wide. While the use of non-flavored tobacco cigarettes has been decreasing, the use of menthol cigarettes is on the rise among youth and adults, and among Latinos, Blacks, Whites and LGBTQ communities.

Aligned with Los Angeles County, strong laws ending the sale of flavored tobacco products in the City can protect youth from accessing flavored and cheap tobacco products and are crucial to preventing a lifetime of tobacco addiction among Los Angeles' youth. If successful, the City of Los Angeles would join over 200 localities nationwide. In California alone, at least 45 localities have restricted the sale of flavored tobacco products, including San Francisco and Sacramento.

Join the L.A. Families Fighting Flavored Tobacco coalition, led by the American Cancer Society - Cancer Action Network, the American Heart Association, the American Lung Association, and a growing number of Angelenos. Please Stand with us to protect vulnerable communities from Big Tobacco.

Thank you.

L.A. FAMILIES FIGHTING FLAVORED TOBACCO STATEMENT OF CONCERN

Dear Mayor Garcetti and City of Los Angeles Councilmembers,

As a concerned constituent I ask that you pass a comprehensive ordinance that ends the sale of flavored tobacco, including menthol products and without exemptions for hookah or adult only tobacco shops.

Last year, the California State Legislature acted to protect children and communities of color from Big Tobacco's deceptive marketing of candy flavors, including menthol cigarettes, which have been proven to lure new users to their dangerous products. The passage of SB-793 was a bold step forward to protect the health of this state's youth and communities of color.

Now – the tobacco industry is gearing up to spend enormous amounts of money to reverse our progress. We need local governments to stand with the State Legislature and do even more to protect our kids by ending the sale of flavored e-cigarettes, menthol cigarettes, hookah tobacco, premium cigars, and pipe tobacco.

L.A. FAMILIES FIGHTING FLAVORED TOBACCO STATEMENT OF CONCERN

Dear Mayor Garcetti and City of Los Angeles Councilmembers,

As a concerned constituent I ask that you pass a comprehensive ordinance that ends the sale of flavored tobacco, including menthol products and without exemptions for hookah or adult only tobacco shops.

Last year, the California State Legislature acted to protect children and communities of color from Big Tobacco's deceptive marketing of candy flavors, including menthol cigarettes, which have been proven to lure new users to their dangerous products. The passage of SB-793 was a bold step forward to protect the health of this state's youth and communities of color.

Now – the tobacco industry is gearing up to spend enormous amounts of money to reverse our progress. We need local governments to stand with the State Legislature and do even more to protect our kids by ending the sale of flavored e-cigarettes, menthol cigarettes, hookah tobacco, premium cigars, and pipe tobacco.

Menthol and flavored tobacco products are driving tobacco-caused deaths and diseases nation-wide. While the use of non-flavored tobacco cigarettes has been decreasing, the use of menthol cigarettes is on the rise among youth and adults, and among Latinos, Blacks, Whites and LGBTQ communities.

Aligned with Los Angeles County, strong laws ending the sale of flavored tobacco products in the City can protect youth from accessing flavored and cheap tobacco products and are crucial to preventing a lifetime of tobacco addiction among Los Angeles' youth. If successful, the City of Los Angeles would join over 200 localities nationwide. In California alone, at least 45 localities have restricted the sale of flavored tobacco products, including San Francisco and Sacramento.

Join the L.A. Families Fighting Flavored Tobacco coalition, led by the American Cancer Society - Cancer Action Network, the American Heart Association, the American Lung Association, and a growing number of Angelenos. Please Stand with us to protect vulnerable communities from Big Tobacco.

Thank you.

L.A. FAMILIES FIGHTING FLAVORED TOBACCO STATEMENT OF CONCERN

Dear Mayor Garcetti and City of Los Angeles Councilmembers,

As a concerned constituent I ask that you pass a comprehensive ordinance that ends the sale of flavored tobacco, including menthol products and without exemptions for hookah or adult only tobacco shops.

Last year, the California State Legislature acted to protect children and communities of color from Big Tobacco's deceptive marketing of candy flavors, including menthol cigarettes, which have been proven to lure new users to their dangerous products. The passage of SB-793 was a bold step forward to protect the health of this state's youth and communities of color.

Now – the tobacco industry is gearing up to spend enormous amounts of money to reverse our progress. We need local governments to stand with the State Legislature and do even more to protect our kids by ending the sale of flavored e-cigarettes, menthol cigarettes, hookah tobacco, premium cigars, and pipe tobacco.

Menthol and flavored tobacco products are driving tobacco-caused deaths and diseases nation-wide. While the use of non-flavored tobacco cigarettes has been decreasing, the use of menthol cigarettes is on the rise among youth and adults, and among Latinos, Blacks, Whites and LGBTQ communities.

Aligned with Los Angeles County, strong laws ending the sale of flavored tobacco products in the City can protect youth from accessing flavored and cheap tobacco products and are crucial to preventing a lifetime of tobacco addiction among Los Angeles' youth. If successful, the City of Los Angeles would join over 200 localities nationwide. In California alone, at least 45 localities have restricted the sale of flavored tobacco products, including San Francisco and Sacramento.

Join the L.A. Families Fighting Flavored Tobacco coalition, led by the American Cancer Society - Cancer Action Network, the American Heart Association, the American Lung Association, and a growing number of Angelenos. Please Stand with us to protect vulnerable communities from Big Tobacco.

Thank you.

L.A. FAMILIES FIGHTING FLAVORED TOBACCO STATEMENT OF CONCERN

Dear Mayor Garcetti and City of Los Angeles Councilmembers,

As a concerned constituent I ask that you pass a comprehensive ordinance that ends the sale of flavored tobacco, including menthol products and without exemptions for hookah or adult only tobacco shops.

Last year, the California State Legislature acted to protect children and communities of color from Big Tobacco's deceptive marketing of candy flavors, including menthol cigarettes, which have been proven to lure new users to their dangerous products. The passage of SB-793 was a bold step forward to protect the health of this state's youth and communities of color.

Now – the tobacco industry is gearing up to spend enormous amounts of money to reverse our progress. We need local governments to stand with the State Legislature and do even more to protect our kids by ending the sale of flavored e-cigarettes, menthol cigarettes, hookah tobacco, premium cigars, and pipe tobacco.

Menthol and flavored tobacco products are driving tobacco-caused deaths and diseases nation-wide. While the use of non-flavored tobacco cigarettes has been decreasing, the use of menthol cigarettes is on the rise among youth and adults, and among Latinos, Blacks, Whites and LGBTQ communities.

Aligned with Los Angeles County, strong laws ending the sale of flavored tobacco products in the City can protect youth from accessing flavored and cheap tobacco products and are crucial to preventing a lifetime of tobacco addiction among Los Angeles' youth. If successful, the City of Los Angeles would join over 200 localities nationwide. In California alone, at least 45 localities have restricted the sale of flavored tobacco products, including San Francisco and Sacramento.

Join the L.A. Families Fighting Flavored Tobacco coalition, led by the American Cancer Society - Cancer Action Network, the American Heart Association, the American Lung Association, and a growing number of Angelenos. Please Stand with us to protect vulnerable communities from Big Tobacco.

Thank you.

DECLARACIÓN DE PREOCUPACIÓN

Estimado Alcalde Garcetti y Concejales de la Ciudad de Los Ángeles,

Como constituyente preocupado por la salud de nuestra comunidad, le pido que se pasa una ordenanza integral que termina la venta de tabaco con sabor a dulce, incluyendo productos mentolados y sin excepciones para hookah o tiendas de tabaco para adultos.

El año pasado, la Legislatura del Estado de California actuó para proteger a los niños y las comunidades de color de la comercialización engañosa de las grandes compañías de tabaco. La aprobación de SB-793 fue un paso grande para proteger la salud de los jóvenes y comunidades del estado.

Ahora, las compañías de tabaco se está preparando para gastar enormes cantidades de dinero para revertir nuestro progreso. Necesitamos que los gobiernos locales apoyen a la Legislatura estatal y hagan más al nivel local, para proteger a nuestros jóvenes. Ponganle fin a la venta de cigarrillos electrónicos con sabor a dulce, cigarrillos mentolados, tabaco para hookah, cigarros de primera calidad y tabaco para pipa.

Los productos de tabaco saborizados a dulce y mentolados, están provocando gran cantidad de muertes y enfermedades en toda la nación. Aunque el uso de los cigarrillos sin sabor no han disminuido, el uso de los cigarrillos mentolados está aumentando entre los jóvenes, los adultos, y entre los latinos, negros, blancos y comunidades LGBTQ.

Alineado con el condado de Los Ángeles, leyes fuertes que termina la venta de productos de tabaco con sabor a dulce en nuestra ciudad, puede proteger a los jóvenes del acceso a productos de tabaco baratos, y son importantes para prevenir toda una vida de adicción al tabaco entre los jóvenes de Los Ángeles. Con éxito, la ciudad de Los Ángeles se uniría a más de 200 localidades en todo el país que han restringido la venta de productos de tabaco con sabor. En California, al menos 45 localidades, incluyendo San Francisco y Sacramento han tenido éxito.

Únase a la coalición, L.A. Families Fighting Flavored Tobacco, liderada por la American Cancer Society - Cancer Action Network, American Heart Association, American Lung Association y un número creciente de angelinos. Póngase de nuestro lado para proteger a las comunidades vulnerables de las compañías de tabaco.

Gracias.

Ahora, las compañías de tabaco se está preparando para gastar enormes cantidades de dinero para revertir nuestro progreso. Necesitamos que los gobiernos locales apoyen a la Legislatura estatal y hagan más al nivel local, para proteger a nuestros jóvenes. Ponganle fin a la venta de cigarrillos electrónicos con sabor a dulce, cigarrillos mentolados, tabaco para hookah, cigarros de primera calidad y tabaco para pipa.

Los productos de tabaco saborizados a dulce y mentolados, están provocando gran cantidad de muertes y enfermedades en toda la nación. Aunque el uso de los cigarrillos sin sabor no han disminuido, el uso de los cigarrillos mentolados está aumentando entre los jóvenes, los adultos, y entre los latinos, negros, blancos y comunidades LGBTQ.

Alineado con el condado de Los Ángeles, leyes fuertes que termina la venta de productos de tabaco con sabor a dulce en nuestra ciudad, puede proteger a los jóvenes del acceso a productos de tabaco baratos, y son importantes para prevenir toda una vida de adicción al tabaco entre los jóvenes de Los Ángeles. Con éxito, la ciudad de Los Ángeles se uniría a más de 200 localidades en todo el país que han restringido la venta de productos de tabaco con sabor. En California, al menos 45 localidades, incluyendo San Francisco y Sacramento han tenido éxito.

Únase a la coalición, L.A. Families Fighting Flavored Tobacco, liderada por la American Cancer Society - Cancer Action Network, American Heart Association, American Lung Association y un número creciente de angelinos. Póngase de nuestro lado para proteger a las comunidades vulnerables de las compañías de tabaco.

Gracias.

DECLARACIÓN DE PREOCUPACIÓN

Estimado Alcalde Garcetti y Concejales de la Ciudad de Los Angeles,

Como constituyente preocupado por la salud de nuestra comunidad, le pido que se pasa una ordenanza integral que termina la venta de tabaco con sabor a dulce, incluyendo productos mentolados y sin excepciones para hookah o tiendas de tabaco para adultos.

El año pasado, la Legislatura del Estado de California actuó para proteger a los niños y las comunidades de color de la comercialización engañosa de las grandes compañías de tabaco. La aprobación de SB-793 fue un paso grande para proteger la salud de los jóvenes y comunidades del estado.

Ahora, las compañías de tabaco se está preparando para gastar enormes cantidades de dinero para revertir nuestro progreso. Necesitamos que los gobiernos locales apoyen a la Legislatura estatal y hagan más al nivel local, para proteger a nuestros jóvenes. Ponganle fin a la venta de cigarrillos electrónicos con sabor a dulce, cigarrillos mentolados, tabaco para hookah, cigarros de primera calidad y tabaco para pipa.
