Subject: Public Comments Not Uploaded CF #20-0813-S1: We need a Green DTLA, no to Olympic Tower

Honorable Councilmember De Leon and PLUM Committee Members,

I am concerned about the insufficient study of Greenhouse Gas (GHG) emissions in the Olympic Tower Project.

The Greenhouse Gas analysis contained in the Project's Environmental Impact Report (EIR) fails to comply with CEQA Guidelines. Specifically, the GHG plans relied upon in the EIR are entirely aspirational and lacking any binding, project-specific requirements. Despite the Project's GHG emissions exceeding thresholds routinely used by the City for other City Projects, the City erroneously refuses to apply the same thresholds now to this project.

Given the insufficient Greenhouse Gas emissions analysis for this project, I urge the PLUM Committee not to approve the Olympic Tower Project.

Honorable Councilmember De Leon and PLUM Committee Members,

Imagine what chance we give life if downtown goes green...

so many of us already suffer from pressures and fast paced living, what if going green gave us all better oxygen, flow, and health. To make better decisions, to make the sun worth seeing over Vet Greenery vs buildings and everlasting construction. There is hope for more influence and information on recycling, community development, and happiness if we go green.

The most important part of our businesses and breathe is oxygen.

Clean air through plant purification SHOULD very well be our next initiative in Los Angeles .
