Comments for Public Posting: A message to the 15 City Council members. Please reinstate LAMC 41.18d and 56.11 as well as 85.02. The longer you allow people to sleep wherever they want, including on sidewalks, streets, alleys and beneath underpasses, the harder it will be to eventually move them. There is no excuse for how the City of Los Angeles looks. If you allow people to do whatever they want and however they want; then why did we elect you to lead us? It seems that anything goes in Los Angeles nowadays. Please step up to the plate. That includes you Mr. Bonin. Be the strong leaders we elected you all to be. Stop allowing the homeless advocates to dictate the policy on homelessness. Many of the advocates who are influencing your decisions do not live in your districts or even in Los Angeles. They cannot vote for you, yet they are telling you what to do and you are listening. Think about that. Do the right thing and clean up our city streets. No more camping on sidewalks.
