Comments for Public Posting: The direct costs and social costs of oil extraction are very high and will continue to rise. I support the motion to evaluate revenue from taxes on oil extraction facilities and the action of putting it on the ballot in 2022.

Comments for Public Posting: I strongly support this measure: There are many adverse effects of oil extraction including climate change and its consequences such as droughts and wildfires, poor health, and quality of life issues that disproportionately impact historically disadvantaged communities. A tax on oil extraction facilities could provide funding for city services as well as offsetting the impacts in affected communities and will be a negative incentive for the oil industry.
