Council File No: 21-0064

Comments for Public Posting: First, my thanks to Paul Koretz & Paul Krekorian for having proposed this ordinance and to Mike Bonin for seconding their motion. You know that sanitation and proper trash disposal is such a huge challenge here in Los Angeles that Angelenos all need to do our part to help reduce the amount of trash we generate in our beautiful city. It's great when common sense solutions make their way into legislation, Kudos to you all! When we order take out food most of us take it home where we have our own utensils and napkins. Even when we take the food to eat elsewhere, most of time we can plan ahead taking our own reusable supplies so we won't need these single-use plastic items. I'm writing to express my appreciation to all City Council Members for having passed this motion. The environmental protections this City Council approves will help us clean up our city's land, water, and air. I encourage these efforts and respectfully request that members of the City Council take additional steps, as we all work together, continually striving to improve the quality of life in Los Angeles.
