**Council File No:** 19-1603-S1

**Comments for Public Posting:** To the PLUM committee members, I support the staff report concerning the CEQA appeal of 806 W. Adams Blvd. Please do your due diligence as the planning and land use management committee. There has not been an appropriate environmental review on this project. As an Angelino, stakeholder and member of West Adams Heritage Association, this community has ample student housing projects. Based on the housing crisis we are facing in the city of Los Angeles, we need more affordable housing for the people if the community. Development of housing compatible with the community. Housing that is appropriate in size and density and complies with NSO, CRA Redevelopment and the South Community Plans. This is your responsibility as the PLUM council members. Please listen to the community and staff report concerning this project. It is not what we need.
