Comments for Public Posting: NO on mandatory masking, NO on mandatory passports, NO on mandatory "vaccines." Would you trust the FDA? They knew in October, 2020 that the Covid vaccine was deadly. It's on youtube. Enter Vaccines and Related Biological Products Advisory Committee - 10/22/2020 to see the video. The FDA knows it will "kill, maim and ravage." So why are YOU for this?

Comments for Public Posting: No to Vaccine Passports! It's unconstitutional and it's a form of segregation and discrimination. We are a free country! My body my choice.

Comments for Public Posting: I was just reading that LA may start requiring proof of vaccination at restaurants, gyms, and indoor sporting events. I think that is an excellent idea! May I suggest you also add tanning salons to the list. The employee at the tanning salon that I go to has boasted to me about not wearing a mask over the last year as well as not getting vaccinated. He justifies it with the usual conservative media talking points and anti-science beliefs. He has completely dismissed my observation that he is putting other employees and customers at risk. That's why I think tanning salons should be added to the list of places requiring proof of vaccination to enter. Thank you.

Comments for Public Posting: Please make the proposed LA vaccine mandate require individuals to be FULLY vaccinated. According to the CDC, that is 2 weeks after their final shot. This is no time for half measures, let's do this fully (just like San Fransisco just did) and save as many lives as possible. Thank you.

Comments for Public Posting: im an Los Angeles resident and I take offense to the "vaccine mandate " I am not a nut job or some weirdo anti vexer or any other term that people come up with. I feel most people should get the jab... HOWEVER..health is not a one size fits all thing..and vaccines need time to develop and work the bugs out so some individuals may need to wait and see the longer term effects of these vaccines before getting them, there is research that suggests that people with unusual exposures or conditions may have a " reverse" effect concerning the immune system. Most people will be fine..but some will not. ..I had very very high exposure to toxins present in black mold due to a flooded residence I lived in , all I can say is that I felt I was in a sci fi film or an episode of the ex files ..I looked like I had been in a fire or an accident, skin rash so bad it looked like a space alien, staff at u c l a hospital were shocked that toxins from black mold had don all that ..eyes were red...I was allergic to normal life, (dust..everything..). needless to say my system was blown out ,reversed ,damaged b this exposure it took me four years to recover and cleanse the body it is UNKNOWN. the damage this did , so the vaccine situation is something my doctor and I wish to hold off on, THAT SAID I think MOST people should get this shot, HOWEVER People who have had strange diseases and other issue may not be best off with a " one size fits all approach" as if cattle what should be done about such experiences regarding vaccines in. a "one size fits all" treatment??
