**Comments for Public Posting:** Dear Councilmembers, I love Los Angeles architecture and history. I love the balance of open green space Los Angeles offers. However, the livable balance of history, soul and affordability of Los Angeles is disappearing. Therefore, I'm writing to express strong support for the proposed Community Land Trust Pilot Program. The program could solve many of the serious problems facing Los Angeles, like the lack of affordable housing, the disappearing of historic buildings and their green space. Please act to implement this program before Los Angeles's longtime residents and treasured buildings are lost. Thank you,  
Marilyn Welch
