Council File No: 21-0878

Comments for Public Posting: Item 21-0878 NO on vaccine passports. No on mandatory anything in the City of Los Angeles. Council, YOU have not provided any scientific, peer-reviewed proof, nor peer-reviewed studies on any Covid-related actions that you intend on taking. If masks work, why aren't they working? If this vaccine works, why isn't it working? If lockdown(s) worked, why didn't they work? 15 days to slow the spread is now well over 500 days. YOU are obviously trying to reach an impossible goal, zero Covid19 and that will not happen. This was, in every likelihood, lab-created. As such, it was designed to infect and kill human beings. Did the lockdown(s) you created cause Covid19 to be more vigilant? Important question. Is the vaccine creating a stronger, more aggressive virus? Another important question. Do subsequent "boosters" protect us further? Still, another important question and NOBODY has answers to these questions, as of yet. Any new "variant" is Covid19 trying to stay "alive" to infect its host, which of course, will create variant after variant because that is what it was engineered to do. Seems like there will be an endless supply of boosters, then, too. From Deadline (online) news:
<https://deadline.com/2021/08/los-angeles-breakthrough-infections-covid-amount-cases-1234818477/>
Vaccinated people are every bit as much of a carrier of "Covid" as an unvaccinated person. Are YOU saying that the illegals streaming into our country unchecked, are being tested? Vaccinated? Given vaccine passports? That would be a NO. How can anyone inflict rules on the unvaccinated, then? You want to impose rules on Los Angeles, when it is clear the party in power, both Federal and State ignores rules and the rule of law. Our maskless Governor dining out is a perfect example, along with a maskless Speaker of the House getting Salon services in person, while L.A. residents ordered under "house arrest." Why are American citizens and taxpayers subject to discrimination when law-breakers are not? The border-crossers do not respect our rule of law, why should we? Even if the FDA grants "approval," how do Angelenos know that the approval won't be retracted soon after? This "vaccine" should be subject to the same scrutiny and, eventual protection. Zantac, a legal, prescribed drug for years is now proven to have a cancer-causing agent in it. Years later. One sees ads on streaming (TV) for the Class-action attorney firms, fighting for those afflicted and permanently harmed. YOU want that for the City? To be sued into oblivion? Do you think you are exempt from being voted OUT? There is a cost to YOU, our "leaders" if you go through with any defiance of the Constitution. Nobody is above the law, including YOU. The success of the petition to Recall Newsom should be proof that "we, the people," still matter. Remember us? The people who pay YOUR salaries? Don't think that would happen to you? Guess again.

Comments for Public Posting: Vaccine passports for indoor spaces are discriminatory. LA has a large unvaccinated minority population who does not trust the CDC to treat them right as they have been experimented on in the past. Thus, a vaccine passport is not only medical discrimination, but racial as well. Furthermore, we have been told by the CDC that the vaccine does NOT stop infection of the Covid variants. So a vaccine does NOT protect our neighbors, it only protects the vaccinated from maybe getting less sick. Since it's only going to protect the one getting the vaccine, people should be able to choose for themselves and not have their liberties taken away from them for a medical choice. Thank you for your time.
