Comments for Public Posting: As a County employee who has worked throughout the pandemic and with close contact with the public until now, the idea of a vaccine passport is upsetting. This ordinance would not encourage more people to get vaccinated, and would only create more division than unity. Forcing people to undergo a medical procedure that has no long term studies and has over 500,000 reported adverse reactions on VAERS, which is co-managed by the CDC and FDA, is unconstitutional in regards to our property rights that begin with bodily autonomy. Medical freedom is important to uphold in our society, because it allows people the choice on what they want to do with their bodies, after looking at the risks and benefits. People such as Pfizer's former chief scientist Michael Yeadon, virologist Geert Vanden Bossche, and mRNA inventor virologist Robert Malone have voiced concerns about mass vaccinations during a pandemic. Encouraging mass vaccinations would only create more variants and not allow for the virus to run its course. Countries with the most vaccinations like: Israel, Iceland, and Gibraltar, have the most cases per capita in the world. This shows that mass vaccinations do not end pandemics and only prolongs them. The CDC has admitted that vaccinated individuals can spread and transmit, and carry more viral load in their bodies compared to unvaccinated individuals. Pfizer's own 6 month study showed that there was no reduction in death, with the latest pre-print in effectiveness showed a 42% effectiveness for delta. This will create a second class of citizen from the party who claimed for so long to be against discrimination has just fooled itself into cheering on segregation through some eery moral superiority that entirely relies on scientific ignorance. Please do not let cherry picked studies being used to further divide our city and state and segregate those of us who can not get it due to personal beliefs, medical, or religious reasons proceed.

Comments for Public Posting: Regarding: August 24, 2021 Los Angeles City Council Meeting Ad Hoc Committee on Covid-19 Recovery and Neighborhood Investment Special Agenda Item # (7) 21-0878 Councilmembers, I implore you to just say an unequivocal NO to unconstitutional vaccine mandates and passports and an adamant YES to Freedom and Liberty! It is a perilously dire situation in our country when an American Citizen is compelled to pen a letter of this nature to his or her municipal government office holder/public servant. I am demanding that you vehemently vote against a city ordinance mandating that a person must present a vaccine passport to enter an indoor space such as a grocery store (of all places). What kind of Orwellian nightmare have we created for ourselves when governments can attempt to violate our civil liberties by forcing us to inject our bodies with experimental and potentially hazardous chemicals? When a top down once size fits all approach to “public health” is rammed down our throats to combat a virus with a 98 percent recovery rate? There is but one word that can best describe this: EVIL. Are you to stand on the side of the evil doers and allow this unconstitutional ordinance to be passed? Or will you stand on the side of righteousness and uphold your oath of office to defend our God-given freedom to choose for ourselves and what is in our best interests for our individual health? Whichever choice you make will surely be forever remembered. Furthermore, as a current resident of Los Angeles County, it would be tragic to be included among the ranks of the continued mass exodus of people and business’s fleeing the county and state upon the passing of this most shameful and disastrous ordinance. I will conclude this message to you by referring you to the website: <https://www.openvaers.com/> for a current report of the number of vaccine related deaths and adverse reactions. With regards, Jack Brand

Comments for Public Posting: I would like to express support for requiring proof of COVID vaccination in order to access indoor spaces in LA City. Despite those who are imploring you to vote against it, here are the reasons they are wrong: 1. Using Nazi Germany as an example is anti-Semitic. The Germans marking Jews as such was about true discrimination and the eventual “final solution” which killed millions of Jews. The COVID vaccine, by comparison, is saving lives. 2. This vaccine was under development for about 20 years now, as researchers even as far back as 2002 were attempting to find a vaccine to prevent coronavirus. When the pandemic began, these scientists and other teams concentrated on using this research to develop a vaccine to prevent this strain of coronavirus. Trials were done, millions of people worldwide have taken these vaccines, and yesterday, the Pfizer one was officially approved by the FDA. 3. The vaccinations have been shown to cut down on the number of those who developed COVID, and even the breakthrough cases (due to the heavy viral load of the Delta variant) have been shown to be much less severe and much less fatal. Close to all those COVID patients now filling hospitals are those who refused to get the vaccine. 4. For months (since March 2020), those in high risk categories for complications or with family members in their house have had to isolate at home. We’ve had to have groceries delivered to us, medications and other necessities shipped to us. We were risking our lives or our loved ones whenever we had to go to our doctors (for appointments or treatments that couldn’t be done virtually) or dentists. Many of us had to postpone mammograms, physical exams, and even operations. If people had received their vaccines as soon as they were eligible, infectious numbers would have dropped, and even the Delta variant wouldn’t have been able to be as entrenched as it became. Those of us who were called “fearful” on social media, and told to just stay home, would feel safer about returning to normal life. 5. Now we have children getting COVID. Hospitals in the southern US are seeing high numbers of children with life-threatening cases of COVID. Extra beds have been set up in some hospital garages, while with other patients, doctors are desperately trying to find available beds that will accept their patients. Many of those very ill haven’t been able to get transported to a hospital as there isn’t beds nor staff available.

Medical staff are back to being overwhelmed and overworked. 6. Many of those refusing to get the vaccines are doing so based on misleading “conspiracy videos” or rumors. Not based on any science. These vaccines won’t make one magnetic, tracked by “evil” government, or even brainwashed into buying Microsoft products. 7. There are many diseases that no longer are a “thing,” because they have been eradicated by vaccines. I was very young when I got the vaccines for polio and smallpox. Children nowadays don’t get these shots because they don’t need to....because people did the socially responsible thing and got their families vaccinated. We’ll probably need to get an annual coronavirus shot that will be like the influenza one, based on the predicted strain. At that time, it will be voluntary, and for the most part, many people will decide to get those shots so they won’t get sick. 8. Other diseases will have shots that are required to be in school or the military. All parents have that yellow immunization card for each of their children. When my daughter began a U of California campus, she used her yellow card to input the dates of her shots, so that her school knew she had the required shots. Last year, as soon as the flu shot was available, both she and I went in at the same time to get ours, and as soon as her age group became available she got her Pfizer shots (my husband and I got ours as soon as we had become available). We knew it was the socially responsible thing to do, along with protecting ourselves. 9. Please don’t let selfish people who are thinking only about “freedom” decide to endanger everyone else and prolong this pandemic. We need the threat from a deadly disease to truly become a thing of the past in order to get back to normal. And if they don’t want the quick jabs because they are “fearful,” let them stay at home like the rest of us had to.

Name: NO TO CITY/COUNTY C19 VACCINE ORDINANCES

Date Submitted: 08/23/2021 03:25 PM

Council File No: 21-0878

Comments for Public Posting: Dear City Council Member, I urge you to vote NO on the Covid 19 Vaccination Requirement Ordinance. First I want to reiterate this is not from an Anti-Vaxer or Anti-Science citizen. On the contrary this is coming from someone who deeply cares for the safety of fellow humans. It is important to remind you that the "deadly virus" has >99% survival rate according to CDC. Numerous treatment options have been proposed by thousands of doctors globally, yet they have all been censored. On top of that the PCR test is not the correct test as it should have never been used for diagnosis purposes to begin with. In conclusion sadly the collected data of cases is obscured and questionable. Moreover, the shot aka vaccine in theory is not a vaccine like others; rather it is an mRNA technology hardly studied for safety in any age group. Thus the objection here is not about antivaccine movement, but about lack of information and the right to choose. To blame the unvaccinated for a pandemic which is not even a pandemic given the high survival rate, mis-diagnosis based on a flawed test, available treatment options all of which have been banned is not only unfair but unjust on many levels. On the level of civil rights, this is yet another form of segregating people, boxing them as vaccinated vs unvaccinated the hated in this case being the latter. This will hinder businesses, finances, healthcare, education and most importantly our children--and it does not have to be this way. Under the Constitutional rights when there is a question of true pandemic, there cannot be any form of mandating vaccines on anyone. Please reconsider voting NO to this horrendous human rights violation act mandating vaccine passports, tests, and all ordinances for anything and everything under the sun. This is not what America is about. Instead of mandating such appalling mandates, how about un-censoring the numerous scientists from around the world, allowing scientists be scientists--to discuss, argue, rationalize on the best mode of testing, treatment options, preventions, etc. instead of just relying on a few government hired doctors who created this "deadly virus" to begin with and now pushing an unstudied vaccine for profit. My pleas are not just for me and others but also for you, your loved ones, your children and future generations to come.

Council File No: 21-0878

Comments for Public Posting: " A vaccine passport system would create a two-class medical apartheid system, immunity caste system, and would further the gap in equality, especially disproportionate numbers from some of our most vulnerable communities, such as people who are low-income, have disabilities, or are homeless, as well as more than 40 percent of people over age 65, including immigrant communities and communities of color who are already subject to over-policing and surveillance?. Requiring COVID-19 vaccine passports for taking part in everyday life such as, but not limited to, attending a sporting event, patronizing a restaurant, or going to a movie theater would create two classes of citizens based on vaccination; and it's illegal according to the UNRUH CIVIL RIGHTS ACT.? Other treatments and therapies are available as an alternative. ?Any form of coercion via medical mandates, vaccine Passports, digital QR code or any verification to show proof of vaccination violates California Health and Safety codes: 24171 "right of individuals to determine what is done to their own bodies." and 24172(J) "Be given the opportunity to decide to consent or not to consent to a medical experiment without the intervention of any element of force, fraud, deceit, duress, coercion, or undue influence on the subject's decision." Universally accepted codes of medical ethics, including the Nuremberg Code and the Declaration of Helsinki, absolutely prohibit any form of coercion to make individuals participate in a medical experiment.? All currently available COVID-19 is authorized for emergency use, regardless if emergency use status changes, or becomes FDA approved, therefore it must remain voluntary under the Nuremberg Trial Codes; the Declaration of Helsinki, and California law. ?County Department of Public Health and CHHS acknowledges there are many instances where an individual, along with their doctor, decide that being vaccinated may be unsafe; and a vaccine passport or verification system discriminates against those who cannot receive the vaccine.? Vaccine passports, or arbitrary state and county guidelines, do not take into consideration the large number of citizens who have contracted and recovered from COVID-19 and are therefore naturally immune as Covid survivors.? It will not stop at COVID-19 vaccines. Once in place, it will allow the coercion of any and all vaccines, booster shots, or "so-called"

requirements." I personally already have been injured from Vaccines in the past that led to a lifetime of severe chronic health issues including Auto-immune issues and a multitude of allergies. I am not a candidate for this current shot as I am allergic to many of the ingredients including PEG (Poly Ethylene Glycol), Polysorbate, Gelatin (Pig), and the ingredient of aborted fetal tissue is against my religion and moral conscience. Currently found Graphene Oxide is now being found in the shot which is HIGHLY TOXIC. IT IS NOT SAFE, NOR EFFECTIVE, NOR APPROVED; IT IS EXPERIMENTAL AND THE SAFETY TRIALS WILL NOT BE COMPLETED FOR AT LEAST 2 YEARS. THERE HAVE ALREADY BEEN THOUSANDS OF DEATHS FROM THIS VACCINE AND COUNTLESS ADVERSE REACTIONS, MANY SEVERE AND LIFE ALTERING. THE CURE CANNOT BE WORSE THAN THE DISEASE WHICH HAS A 99.75-.99% SURVIVAL RATE. SINCE THERE ARE MANY KNOWN TREATMENTS AND CURES FOR COVID, IT IS NEITHER NECESSARY NOR LEGAL TO MANDATE VACCINES. IT IS UNCONSTITUTIONAL, ILLEGAL, IMMORAL AND INHUMANE TO FORCE ANYONE TO PUT ANYTHING IN THEIR BODY AGAINST THEIR WILL. VOTE FROM YOUR HEART AND YOUR HUMANITY AND END THIS INSANITY!

Comments for Public Posting: I live in Silver Lake (zip code 90029). I am opposed to private businesses, public institutions or any entity requiring proof of vaccination before entry. It often takes 2 or more years for autoimmune diseases caused by vaccines to show up. There never has been a successful coronavirus vaccine. All the animals tested with mRNA coronavirus vaccines died during testing. Many experts estimate that over 100,000 people have been killed already by the SARS-COV2 Covid-19 vaccines as Harvard researchers hired by the CDC estimated that only 1% of vaccine injuries are reported in the CDC's VAERS system. MDs & scientists have said the number of deaths were already going down before many people had the Covid-19 vaccines. The lower Covid case & death counts are not a result of the vaccines according to many scientists & MDs: the lower counts are from herd immunity already reached by early this year & by effective & better treatments being used on patients more often by January of this year which brought deaths down. Also, warmer weather starting in the spring brought deaths down by the time a lot of people took the vaccines. It is against HIPPA privacy law to ask for vaccine status. Even though vaccines have been mandated in the past that does not justify mandates for the Covid-19 vaccines.

Council File No: 21-0878

Comments for Public Posting: I strongly oppose the Covid-19 Vaccination Requirement Ordinance. The CDC recently announced that the vaccinated transmit the virus just as easily as the unvaccinated. Both the vaccinated and unvaccinated carry similar viral loads and can equally transmit the Delta virus. A growing percentage of people in Los Angeles who are vaccinated are getting the Delta variant. The percentage keeps climbing, from 20% of all identified cases in June, to 30% end of July; August is not reported yet, but it's on a steady climb. Vaccination alone won't stop the rise of new variants and in fact could push the evolution of strains that evade their protection. The emergence of a partially or fully vaccine-resistant strain and its eventual establishment appears inevitable. Contrary to Pfizer assumptions, mRNA does not stay in muscles, and S-protein travels into bloodstream (11 subjects out of 13 had S-protein in blood, according to Pfizer's own biodistribution study for Japanese Government). S-protein circulating in the blood is the reason for blood clots, bleeding, and myocardia. From their own literature, sperm counts are lowered post vaccination, and there have been many reports of miscarriages after receiving the vaccinations. A study out of Israel shows that Israelis who were vaccinated were 6.72 times more likely to get infected after the shot than after natural infection (those who had recovered from Covid.) Those who are vaccinated make antibodies against the spike proteins only, whereas the naturally infected make antibodies against many parts of the virus. Safer alternatives exist, such as ivermectin and hydroxychloroquine. Naturally boosting the immune system is the greatest defense, including a healthy diet and exercise, supplemented by Vitamin C, D, A, zinc, and glutathione. And, practically speaking, a vaccine requirement ordinance would unfairly impact businesses; businesses would incur the liability if they admit customers who are not vaccinated, and if they don't, they would be at a competitive disadvantage with those businesses that do. Also, if markets and other convenience stores require proof of vaccination, it would unfairly impact low income people would have trouble traveling to another county to get what they need. I urge you to vote NO on the Covid-19 Vaccine Requirement Ordinance. Thank you. Kathleen Gildred

DOCUMENTED FACTS ABOUT VACCINATIONS

The CDC recently announced that the vaccinated transmit the virus just as easily as the unvaccinated. Both the vaccinated and unvaccinated carry similar viral loads and can equally transmit the Delta virus. (1)

A growing percentage of people in Los Angeles who are vaccinated are getting the Delta variant. The percentage keeps climbing, from 20% of all identified cases in June, to 30% end of July; August is not reported yet. (2)

Vaccination alone won't stop the rise of new variants and in fact could push the evolution of strains that evade their protection. (3) The emergence of a partially or fully vaccine-resistant strain and its eventual establishment appears inevitable. (4)

The VAERS website of the CDC shows 13,068 deaths, and 54,142 hospitalizations, 72,699 urgent care as of August 13, 2021.(6) Some reports say that information on the VAERS website is significantly under reporting.

Although the media tells us that 97% of new cases are among the unvaccinated, many new cases we hear about are among the fully vaccinated. Interesting news report from other countries...

- In the UK, 45% of those hospitalized with Covid are partially or fully vaccinated.(7)
- The majority of those hospitalized with Covid in Israel are vaccinated.(8)
- Half of the hospitalized with Covid in Iceland are vaccinated. (9)
- Meanwhile, the CDC in the United States claims less than 10% of those hospitalized are vaccinated. Why are other countries giving us different numbers?

A study out of Israel shows that Israelis who were vaccinated were 6.72 times more likely to get infected after the shot than after natural infection (those who had recovered from Covid.) Those who are vaccinated make antibodies against the spike proteins only, whereas the naturally infected make antibodies against many parts of the virus.(10)

PFIZER COVID-19 VACCINE - Summary of the efficacy/safety profile sourced from FDA.gov and Pfizer clinical trials March 11, 2021

- Will the vaccine stop COVID spread? "UNKNOWN: A vaccine must be introduced before the peak of reported cases to have a significant impact on the pandemic course."
- Will the vaccine affect fertility? "UNKNOWN: Has not been studied but there are strong enough concerns that studies are being proposed. Sperm counts are lowered post vaccination."(11)
- How long will the vaccine last? "UNKNOWN: We only have data to support 2 months."

Contrary to **Pfizer** assumptions, mRNA (messenger RNA) does not stay in muscles, and S-protein travels into bloodstream (11 subjects out of 13 had S-protein in blood. **Pfizer's biodistribution study** for Japanese Gov.). S-protein circulating in blood is the reason for blood clots, bleeding, myocardia. (12)

IVERMECTIN

Ivermectin is on the WHO's List of Essential Medicines. Ivermectin fights [21 viruses](#), including SARS-CoV-2, the cause of Covid-19. A single dose reduced the viral load of SARS-CoV-2 in cells by 99.8% in 24 hours and 99.98% in 48 hours, according to [a June 2020 study published in the journal Antiviral Research](#). (13) Out of four billion doses administered since 1998, there have been only 28 cases of serious neurological adverse events, according to an article published this year in the American Journal of Therapeutics. (14)

After 6 months of vaccination and a year of research, a number of red signals should be alerting the *would-be* vaccinated and health authorities:

1. **Wandering nanoparticles:** The lipid nanoparticles, the carriers of the mRNA, were supposed to remain in the muscle, but ended up broadly distributed throughout the [body](#), notably in the [ovaries](#), the [liver](#) and possibly the bone marrow.
2. **Anaphylactic PEG:** A number of concerns had been raised regarding the novel use of [PEG adjuvant](#). Notably, prior research had raised the risk of [cardiac anaphylaxis at second injection](#).
3. **Sensitive locations:** ACE-2 receptors susceptible to binding to the spike protein are highly expressed in the endothelial cells of highly sensitive areas, such as the brain, the heart, the lungs, the liver and both male and female reproductive systems.
4. **Toxic circulating spikes:** The [spike proteins](#) induced by mRNA/DNA [vaccines](#) have been [shown](#) to be [pathogenic](#), and highly inflammatory, notably because of the similarity of a spike sequence to that of [Staphylococcal Enterotoxin B](#). It has also been found to be directly [causing blood clots](#) through [platelet activation](#). One researcher said, "Our findings show that the SARS-CoV-2 spike protein causes lung injury even without the presence of an intact virus".
5. **BBB disruption:** A recent study highlights the risk of disruption of the [blood-brain barrier](#), a fundamental filter mechanism to protect the brain. The spike protein has also been found to [cross the BBB](#) and [create inflammation](#) in the brain.
6. **High adverse events:** Even though most likely [under-reported](#), the overall number of serious adverse events versus other traditional vaccines remains very high. The [6,000+ deaths](#) seen [in the US] in six months exceed all the vaccine-related deaths in 30 years. This is quite disquieting, and tends to confirm the aforementioned alarms.
7. **Children more at risk:** The Covid-19 vaccines seem to be more harmful to children and teens, notably with a [growing number](#) of [myocarditis](#) events. The fact that vaccine doses are not adjusted for body weight is notably a cause for concern given the discovery of circulating nanoparticles and spike toxicity.

These are essentially just the short-term effects of these novel vaccines. There is no long-term clinical data regarding the implications of these vaccines, notably regarding autoreactive antibodies (antibodies that target one's own body creating autoimmune diseases). (15)

Comments for Public Posting: Hello Council Members I understand you want to protect Angelinos and keep people from spreading and transmitting corona virus. However this vaccine is not capable of that. 1. Rochelle Walensky, head of the CDC, stated that the vaccine is not holding up against this Delta Variant. 2. The vaccinated have 251x more virus and are pre-symptomatic spreaders based on recent Oxford study 3. The Pfizer and Moderna reports to the FDA to receive their emergency use states in section 8 of unknown data: no evidence for stopping infection or transmission. 4. Barnstable, Massachusetts took specimens after a major public event shows the 2/3rd of the cases were from the vaccinated. 5. Absolute risk reduction for both vaccines is between 0.7-1.1% - so no greater reduction risk with these vaccines. Therefore, mandating the vaccine does make sense if you are trying to prevent transmission. The safety profile of these vaccines is also very troubling: 1. Black box warning that states there is a of high risk of myocarditis and pericarditis (heart inflammation) is now on the fact sheets and the new inserts for the approved vaccines. And you want to mandate this. 2. Micro-blood clots are being found at high rates when a d-Dimer test is performed. Dr. Hoffe from Canada states 62% of his patients have micro clots – a ticking time bomb. • Other countries like Iceland and Denmark are seeing the failure of these vaccines as they have high vaccination rates and their hospitals are full. They are going back to sound strategies of protecting the elderly and vulnerable and letting the very young and healthy freely live their lives in order to reach herd immunity. • This vaccine is not allowing for herd immunity according to Gert Van den Bossche, developer of vaccines for GAVI, because indiscriminate vaccination during an outbreak puts pressure on the virus to produce the variants you are trying to prevent. In addition, it takes your innate immunity which is broad and narrows it to be so specific, it can't handle the variants its creating. This ordinance will NOT accomplish what you want and will cause more harm for which you could be held legally liable. Please vote no.

Comments for Public Posting: I would like you to vote NO on implementing mandates/passports for proof of vaccination to participate in several business and social practices in the city of Los Angeles. Please consider a few things when voting NO: 1) If this is about proof of antibodies (since antibodies are the only part of the immune system that vaccines are designed to affect), what are the considerations being made in regards to people with natural immunity from true infection? We know that individuals have sustained more robust antibodies due to routine convalescent plasma treatments for COVID-19 (they have to test the plasma every time for the presence of antibodies or the treatment is useless). Did you know that these companies conducting this treatment have stated they cannot accept individuals with only vaccine-induced antibodies since the response is being proven to be poor? 2) What about those with medical exemptions and religious exemptions? It is a violation of the first amendment of the constitution in regards to the religious and a violation of the Nuremburg code for the medical if these exemptions are not honored. There are many individuals upon receiving a shot (whether it be one or the first) who had a deadly reaction and were advised by their medical provider that they were not to continue because their risk from the shot outweighed the benefit. There are also those with health conditions who cannot receive shots at all- do they deserve to be barred from businesses and social settings? 3) If you vote Yes, you are creating a 2 Tier society based now in discrimination and fear. There is no proof that unvaccinated individual pose any more of a threat to others than the vaccinated if you are talking about the infection and transmission of COVID and variants. The CDC has admitted that vaccinated can transmit COVID if they have a breakthrough infection and are more likely to become spreaders because they can also be asymptomatic. 4) It is morally and ethically wrong to coerce a population to undergo a one-size fits all medical procedure that has not finished safety trials and has proven to be ineffective and flawed. Thank you for your consideration

Comments for Public Posting: Please vote no on Covid-19 vaccine requirement ordinance. It would violate the civil rights of those unable to receive them for medical reasons and turn them into second class citizens. It would NOT create herd immunity because they do not prevent infection or transmission. In fact, a recent Oxford study has found that those who have received it have 251 times the viral load of those who have not. <https://tinyurl.com/5h3hfc2>. It's a false binary because there are (and always have been) highly effective and much safer alternative treatments and preventatives (that had to be discredited and suppressed in order to the criteria to be met for emergency use authorization. <https://tinyurl.com/2arws5r7> <https://tinyurl.com/949wdvek> <https://tinyurl.com/cpjwwmr8> More people have suffered injury or death as a result of these shots than from all others combined over the last 30 years and the mechanisms of injury have been well established by independent (non-industry sponsored) scientists and doctors. <https://tinyurl.com/df2cckds> <https://tinyurl.com/9ajd7y5s> <https://tinyurl.com/3ejutsbr> <https://tinyurl.com/5567nsja> There are peer-reviewed studies showing that it is likely to cause long-term auto-immune disease <https://tinyurl.com/hd4vb9s6> and even neurodegenerative diseases. <https://tinyurl.com/4zkyy3y4> <https://tinyurl.com/2rvzjts2> Artificially induced immunity is much less long lasting and much less broad spectrum than natural immunity (because it harnesses only the adaptive arm of the immune system while overriding the innate one and many doctors and is narrowly targeted to a specific strain of part of a pathogen, as many doctors - who are being silenced by censorship - recognize), so coercing everyone into pursuing this route will lead to an endless game of whack-a-mole because the selection pressure created by immune escape will drive the emergence of an endless stream of variants against which vaccinees will not be protected, leading to the marketing of endless boosters. The infection mortality rate even without any treatment, (with figures distorted by the incentivized use of wrong treatment, widespread medical malpractice, widespread incentivized misdiagnosis and misattribution of deaths) is no more the 0.2%. Henry Ealy coauthored a peer-reviewed study on how the infection mortality data was manipulated: <https://tinyurl.com/3ya6cpmc> Bodily sovereignty is the most fundamental of all human rights. If you

support the erosion of this right you are supporting medical tyranny; a totalitarian takeover of the worst kind by monied interests. You will be selling your soul and selling out your fellow man. Is that really who you are or who you want to be? Please consider these points and questions carefully before making your decision. It may be the most important one you'll ever make.

Name: No Vaxx Ordinance

Date Submitted: 08/24/2021 05:46 PM

Council File No: 21-0878

Comments for Public Posting: Dear City Council Member, I urge you to vote NO on the Covid 19 Vaccination Requirement Ordinance. First I want to reiterate this is not from an Anti-Vaxer or Anti-Science citizen. On the contrary this is coming from someone who deeply cares for the safety of fellow humans. It is important to remind you that the "deadly virus" has >99% survival rate according to CDC. Numerous treatment options have been proposed by thousands of doctors globally, yet they have all been censored. On top of that the PCR test is not the correct test as it should have never been used for diagnosis purposes to begin with. In conclusion sadly the collected data of cases is obscured and questionable. Moreover, the shot aka vaccine in theory is not a vaccine like others; rather it is an mRNA technology hardly studied for safety in any age group. Thus the objection here is not about antivaccine movement, but about lack of information and the right to choose. To blame the unvaccinated for a pandemic which is not even a pandemic given the high survival rate, mis-diagnosis based on a flawed test, available treatment options all of which have been banned is not only unfair but unjust on many levels. On the level of civil rights, this is yet another form of segregating people, boxing them as vaccinated vs unvaccinated the hated in this case being the latter. This will hinder businesses, finances, healthcare, education and most importantly our children--and it does not have to be this way. Under the Constitutional rights when there is a question of true pandemic, there cannot be any form of mandating vaccines on anyone. Please reconsider voting NO to this horrendous human rights violation act mandating vaccine passports, tests, and all ordinances for anything and everything under the sun. This is not what America is about. Instead of mandating such appalling mandates, how about un-censoring the numerous scientists from around the world, allowing scientists be scientists--to discuss, argue, rationalize on the best mode of testing, treatment options, preventions, etc. instead of just relying on a few government hired doctors who created this "deadly virus" to begin with and now pushing an unstudied vaccine for profit. My pleas are not just for me and others but also for you, your loved ones, your children and future generations to come.

Comments for Public Posting: I want to vote NO on mandates and passports 1) what are their considerations for natural immunity and people with medical/religious exemptions? 2) what about the fact that vaccinated people can get infected and transmit the virus? 3) it is unconstitutional and morally wrong to create a 2 tier society with discrimination and segregation laws

Comments for Public Posting: My health Freedom and choices are protected by HIPPA Laws as well as the Nuremberg Code. It is legal to force any medical procedure on anyone who does not consent. Medical segregation is on par with how the Nazis forced Jews to wear a yellow badge. This is the reason I DEMAND a NO Vote on the Vaccination Government Ordinance.
