**Comments for Public Posting:** Dear City Council, In my part of Los Angeles, I am kept awake by illegally loud exhaust noise. While I enjoy being in an urban environment, I didn't sign up for living on a racetrack. California law limits motorcycles and vehicles to 80 decibels, and yet I often hear cars and motorcycles well beyond that. People seem to drive with these illegally modified exhaust systems with impunity. While I do not wish to see more armed police officers doing traffic enforcement, I ask that the city clamp down on the shops performing these illegal exhaust modifications. Solving this problem will create a more livable city. Thank you, Virginia Wexman 1111 S. Grand Ave. Los Angeles, CA 90015

**Comments for Public Posting:** Dear Councilmembers - In Studio City, where I have lived for 25 years, I am being kept awake every night by illegally loud exhaust noise. This nuisance has been increasing over the past year. While I enjoy being in an urban environment, I didn't sign up for living on a racetrack. California law limits motorcycles and vehicles to 80 decibels, and yet throughout the day and night now I am assaulted by the noise of cars and motorcycles well beyond that. People seem to drive with these illegally modified exhaust systems with impunity. While I do not wish to see more armed police officers doing traffic enforcement, I ask that the city do everything in its power to clamp down on the shops performing these illegal exhaust modifications. Solving this problem will create a more livable city. Thank you - Melanie Winter Studio City 91604

**Comments for Public Posting:** Dear City Council, Chronic noise pollution is a serious public health issue as well as a nuisance. Excessive noise has been tied to increased stress and a range of other negative health outcomes, and it is low-income and minority neighborhoods that suffer the most. One way the city can make a difference is by taking the issue of illegally modified exhaust more seriously. While California law limits vehicle noise, including motorcycles, to 80 dB, illegally modified exhaust systems remain prevalent. While I do not wish to see more traffic enforcement by police, I ask that the city clamp down on the shops performing these illegal exhaust modifications. Solving this problem will create a more livable city, especially for those living with PTSD. Thank you, Cooper Johnston Venice, CA 90291
