**Comments for Public Posting:** I have noticed that incidents of extremely loud exhaust noise and speed displays have increased noticeably in the past year or so, which seems to coincide with the pandemic. In some parts of the city this is particularly incessant at certain times such as weekend afternoons. I find the startling nature of this noise barrage troubling and disturbing in subtle ways, creating a psychologically stressful environment where I live. The effect is particularly dramatic when I visit quiet neighborhoods in LA far from where this occurs. The tranquility and peacefulness in those places contrasts dramatically with the noisy parts of the city. There is no question that there are many vehicles in our city with illegal exhaust systems (It is not unusual to see motorcycles with no mufflers at all; see photo attached). I ask that the city make this a higher priority by increasing the enforcement of noise regulations as well as targeting shops that enable illegal exhaust system modifications.
