Hi Armando,

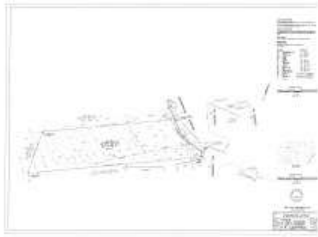

Pursuant to our conversation just now, please make a concerted effort to show the Council-members the survey of existing conditions at the site prior to the meeting so they may understand the need for addressing road improvement adjacent to the site which was absent in the B-Permit referral form, the gap between the temporary asphalt berm and the property line, before dedication.

I would like this image to be within view of the Council-members in the time in which I speak tomorrow.

Thanks

Padraic
