Comments for Public Posting: Special Item 1 Let me provide some Historic Context to explain the impact of Item 1 . The first Summer Olympics held in the U.S. was at the 1904 World's Fair. According to the Book Spectacle by Pamela Newkirk The World Fair featured a "Human Zoo" where people were trafficked from their nations to be forced into squalled "exhibits" on full display to celebrate American Scientists. The people who were killed, had their organs trafficked and many of their brains still belong to the Smithsonian. Ota Benga is the name of a black child who was trafficked by the World Fair, He was put on display as an adult "Cannibal" even though his age is now estimated to be around 10 years old. In 1906 he was then trafficked to the New York Bronx Zoo and put on display Naked in the Monkey House. We the people are opposed to the Continuation of the Eugenics Games.
