Council File No: 21-0002-S175

Comments for Public Posting: I want to applaud Councilmember Raman for moving this important motion, and I would like to urge the Council to vote in support. The (primarily low-income BIPOC) communities around the Port of Los Angeles have suffered from decades of toxic pollution from the Port. The technology exists to clean up ocean shipping, the industry just needs a reason to adopt the technology. This motion would not only have positive impacts on our Port communities, it could also be a model for other ports around the world. Please pass this motion without delay and encourage other cities to do the same.
