**Comments for Public Posting:** Nothing like destroying the Constitution one Right at a time- tell me where in the Constitution any government entity can mandate the injection of foreign, unapproved substances into a person's body? This is not about a virus- this is about control and the destruction of the rights of the individual- considering how communist this City has become- this is not surprising-

## Communication from Public

**Comments for Public Posting:** I am opposed to mandatory vaccination of all city employees. This is an unconstitutional political agenda, not based on facts. Employees will be terminated. Covid policies seem to benefit the democrat party, limit personal freedoms, increase dependence on government, and marginalize or eliminate persons who oppose Covid vaccination. No vax, no job? What happened to my body my choice? What happened to inclusivity? What is next for government overreach? Forced sterilization? Forced gender change? Elimination of medical insurance for "uncooperative" persons? The vaccine is experimental and dangerous. It adversely changes natural immunity. Risk is greatly exaggerated for employees and the public. Long term risk is unknown. For example, seems like of the 10,000 or so police officers, only 10 or so have died from Covid, assuming one believes the data. Most police officers are very low risk, and have already had or been exposed to Covid in their daily work. There are no options for employees who recovered from Covid and now have immunity. Vaccination does not make one unable to transmit Covid. The public protection argument is bogus. Natural immunity is superior to and longer lasting than vaccine. Mandatory vaccination exposes the City of Los Angeles to medical and disability costs associated with mandatory vaccinations. Do not recall any Council agenda items opposing Federal open boarder policy (southern boarder). One million illegal entries in six months? Many with Covid? No Covid passport needed?

**Comments for Public Posting:** Good morning. I am commenting on item 21. I've worked for the City of Los Angeles for 9 years and am currently a Registered Veterinary Technician. I oppose the City's last best final offer regarding mandatory vaccines because it is threatening fellow city employees with possible termination. Last year, Mayor Eric Garcetti was constantly complementing us for working through the pandemic. He placed his trust in us. Now, it seems as though our service has been forgotten and that his trust in us has been lost. Each one of us knows the reasons why we are or are not going to receive the vaccine. This should be respected. There are other ways to mitigate risks instead of shutting down everyone who has reasonable and valid concerns about the vaccine. All of us want to continue working. How could possibly firing large groups of employees be helping the City of LA's commitment to service? I hope that the City Council and the Mayor will listen to their fellow coworkers. If we are indeed a family, then please, show it now. Thank you for reading this, please, consider it.
