Comments for Public Posting: I want an amendment to the Housing Element coming before the Housing Committee on Wednesday. LA has over 40,000 people who are homeless, we should be workin harder to build and provide housing for them. The Housing Element should mandate a reasonable amount of affordable housing, inclusionary housing, which includes housing those who are extremely and very low income. This is a very important decision for the future of LA, I ask for a full hearing of this item when it comes to LA City Council. I also adopt other opposition to this item.
