**Council File No:** 21-1277

**Comments for Public Posting:** Please support council file 21-1277. Deadly heat waves are a known problem and one that we can see coming. There's no excuse for not planning and preparing our city for the inevitable. If we don't want LA to become famous for being the first great US city to become unlivable due to climate change, we must start focusing serious efforts on mitigating the effect of heat waves for our most vulnerable citizens.
