Comments for Public Posting: I want to register my support for the need for a heat action plan as we move deeper into climate change (increasingly hot days and prolonged heat waves). Thank you.

Comments for Public Posting: As climate activist, resident of the Los Angeles area, and Co-Chair of the Climate Reality Project: Los Angeles Chapter (which consists of 1,200+ members), I strongly endorse the creation of a heat action plan including early warning and interagency response plan. The reality of climate change and exacerbation by current urban planning necessitates immediate action to prepare against the increasingly unbearable heat, to protect vulnerable communities first and foremost and to combat climate change as a means of doing both. To do this effectively, an advanced warning system and well-coordinated action plan are essential. While plans are not infallible, they provide general direction and increase the efficiency and effectiveness of actions taken. Plans do not ensure success but lack of planning underlies failure, inefficiency and dire consequences.
