Comments for Public Posting: I oppose the Reese Davidson project. It is a monstrous and expensive project that will have little effect on the Venice's homeless problems while having a huge impact on the character & quality of life of the neighborhood. We need common sense, nimble and efficient immediate solutions to our homeless problems. An enormously expensive and out of scale brutalist monolith of a building at the gateway to the beach, a major tourist attraction, in an area with massive traffic and parking problems and taking years to construct at massive cost to taxpayers is not a solution. It is just a new problem for Venice.

Comments for Public Posting: I oppose the Reese Davidson project. It is out of keeping with the surrounding neighborhood. It will exacerbate our traffic and parking problem. It will do nothing to remedy the problem of homelessness that we have in Venice and it will cost too much taxpayer money. We need practical efficient solutions to the homelessness problem. And our neighborhood does not need to be negatively impacted in so significantly. Venice already has more than its share of homeless housing and services. We need parking. We need bike lanes. We need improved pedestrian access for the hordes of tourists in the summer. We need better traffic management. This project will impact all of these areas negatively. It is short sighted & poorly conceived.
