Comments for Public Posting: This is a general public comment related to future promotional activities of the private and/or non-profit partners with which this Committee collaborates. It would be inappropriate for this Committee to support advertising programs that encroach upon the public right-of-way beyond that which is presented on transit shelters. There are significant problems with the current STAP program proposal as presented in that program's IS/MND that seek to expand advertising into the public right-of-way. Such actions would not only blight our City but they could undermine the City's ability to enforce sign regulations. They have not been adequately described, defined or evaluated under CEQA and should not be considered or permitted.
