**Comments for Public Posting:** You and and the actions that have been done in the last years are making republicans out of us ! Think deeper than the knee jerk reaction to taking over a community and upending the living conditions of those that are living here . The only open space left in Venice , and building the largest building in the center as you enter the beach, no regulation on environmental impact to the surrounding neighborhood , the cost to all of us. This is just a developer finding a way in and a councilperson with a dumb agenda that shows it doesn't work.\$ 1,000,000 per small room built is not good work, it's going to be talked about as crazy forever and not good effect on community. Don't do this to Venice , we already have multiple locations. Enough. Think about taking the last open space !
