**Comments for Public Posting:** As a member of the Los Angeles county community I do not consent to the outrageous destruction of our beautiful Griffith Park for the benefit of creating rock walls, parking structures, air trolleys, or the destruction of trees, habitat, etc to create improvements to the zoo & surrounding profit business areas. Creating profit is not what this donated land was intended for & takes away from the natural habitat ants in the park. Your plan increases to increase opportunities for thrill seekers & selfie opportunities before thinking of the habitat & families that can now barely afford to have a picnic there with your observatory parking rates is already a burden on the habitants & the families that have always treasured the park. Honestly, it's irresponsible & greedy. And it's barely put in front of the community to weigh in on. If that's what you want to do have it put to a vote during a presidential election when the community is out in force & let them vote on it.

**Comments for Public Posting:** I strongly urge the L.A. Zoo to only consider Alternative 1, the Environmentally Superior Alternative. Zoos should concentrate on animals, not amusement type attractions for kids. Please don't take down the natural habitat unless it is for the benefit of the animals. thank you.
