Date of Submission: Tue, 02/08/2022 - 20:42

Submission Letter:

Attention: Public Works Committee

If agenda item two (21-0979) is adopted, it would flush taxpayer dollars down the toilet.

The City should increase the number of public toilets available on the streets of Los Angeles. Odiously, agenda item two would remove 14 existing, fully functional public toilets that are maintained without taxpayer dollars. Then, the City would commit to spending \$1.5 million in taxpayer dollars to buy 14 new toilets, maintaining the exact number of LA public toilets that exist today. Additionally, agenda item two would commit the city to maintaining these toilets at an estimated cost of \$3 million per year which could quickly become tens of millions of dollars depending on the length of the contract.

At a time when 40,000 people live unhoused in Los Angeles, this item is as inhumane as it is incompatible with public health.

Simply put, it stinks.

We urge you to reject item two and instead take action to significantly increase the number of public toilets available in our city.
