Comments for Public Posting: Any report must consider the adverse impact of the full cost recovery policy that resulted in a \$99 million payment to the City in this fiscal year and \$750 million over last 12 years. This has resulted in the inability of the Department to maintain its facilities, including its bathrooms that were subject to a scathing report by Controller Ron Galperin. The consultant's report must also consider the management of the recommended improvements, especially given the City's inability to bring projects in on time and on budget. Witness the construction of permanent supportive housing under Prop HHH where the City overpromised and units are costing over \$800,000 according to Controller Ron Galperin. Oversight cannot be left in the hands of political appointees who do not have the necessary skills to oversee a multibillion program. We need outsiders who have the expertise to provide objective advice and opinions.
