#### 1.0 SUMMARY

This report presents the results of a Phase I Environmental Site Assessment (ESA) performed by Northgate Environmental Management, Inc. (Northgate) for Wactor & Wick LLP (Wactor & Wick) on behalf of their client, Holland Partner Group (Holland), at the Sunset Property located at 1911 to 1931 Sunset Boulevard in Los Angeles, California (the Site). The Site consists of approximately 0.95 acres of land developed with two single-story commercial structures occupied by a restaurant and a medical clinic with surface parking. The Site is identified as Assessor's Parcel Numbers (APNs) 5404-001-007, -008, and -034 in Los Angeles County. A Site Vicinity Map is shown on Figure 1 and a Site Plan is shown on Figure 2.

Northgate's review indicates that the Site has historically been developed with residences and commercial structures since the early 1900s. The Site has been occupied entirely by commercial development since the 1950s. Historic commercial land use at the Site includes restaurants, a furniture store, a laundry, and medical offices.

The Site is listed on the South Coast Air Quality Management District EMI database related to a permit for installation of a char-broiler at a restaurant in 1990, and on the California Department of Toxic Substances Control HAZNET database related to the off-Site disposal of photochemical waste from doctor's offices during the 1990s. Neither database listing indicates a significant potential for a hazardous materials release at the Site. The Site is also listed on the Environmental Data Resources proprietary (non-regulatory) historic cleaners database related to a directory listing for a laundry service present on the Site in 1942. No additional information is available regarding the nature of the laundry or cleaning activities performed or the types of chemicals, if any, used.

Northgate's review of regional environmental conditions indicates that the property immediately adjacent to the Site to the east (cross-gradient) was occupied by an automobile repair facility and gasoline service station from the 1920s through the 1970s. Another service station property located about 275 feet southwest (cross-gradient) of the Site presently contains up to six feet of light non-aqueous phase liquid (LNAPL) as gasoline floating on the groundwater surface. The full lateral extent of this offsite contamination plume has not been defined. In Northgate's opinion, documented or potential releases at both of these sites could potentially impact subsurface conditions at the subject Site.

In summary, Northgate has performed a Phase I ESA of the Sunset Property located at 1911 – 1931 Sunset Boulevard in Los Angeles, California in conformance with the scope and limitations of ASTM Practice E 1527-13 and the standards and practices of the All Appropriate Inquiry – Final Rule (40 Code of Federal Regulations Part 312). Any exceptions to, or deletions from,

1

these practices are described in Section 2.3 of this report. Our review did not identify the presence of Recognized Environmental Conditions (RECs) in connection with the property. However, or investigation did identify the following potential business environmental risks:

Northgate's review of regional environmental conditions indicates that the property immediately adjacent to the Site on the east was occupied by a gasoline service station and/or an automotive repair facility from the 1920s through the 1970s. Although there are no documented releases at the service station property, the long history of chemical use and the close proximity of the property indicate a potential for impacts to soil, soil vapor, or groundwater quality at the subject Site.

Northgate's review also indicates the presence of a significant gasoline release at an off-Site property located about 275 feet southwest (cross-gradient) of the Site. The reported high levels of contamination (up to six feet of LNAPL) and the absence of full evaluation of the lateral extent of contamination from the offsite property indicates a potential for impacts to soil vapor or groundwater quality at the subject Site.

A laundry facility was historically present on a portion of the Site in the 1940s. No documented hazardous chemical use or release has been identified at the facility. However, in Northgate's opinion, historic Site occupancy by a laundry facility represents a potential risk of impact to soil, soil vapor, or groundwater quality at the Site.

Given the redevelopment plans for the subject Site, Northgate conducted a concurrent Phase II ESA to evaluate potential impacts to soil and soil vapor related to the identified business environmental risks. The Phase II ESA included the analysis of 27 soil samples and three soil vapor samples from drilling six borings and installing three temporary soil vapor probes at the Site, specifically 4 borings and 18 soil and 2 soil vapor samples in the vicinity of the gas station and laundry. No groundwater samples were collected as part of this investigation because groundwater was not encountered in the borings to a drilled depth of 28 feet below ground surface (bgs). In general, this investigation did not show contamination of soil or soil vapor in excess of residential use screening levels, with the exception of the lead in one shallow sample in soil boring (B-5) and arsenic at 15 feet bgs (b-5) and ethylbenzene and 1,2-trichloroethane in soil vapor probe SVP3.

The VOC results indicate that there does not appear to be a soil vapor issue associated with historical laundry on the Site.

#### 2.0 INTRODUCTION

This report presents the results of a Phase I ESA performed by Northgate at the Sunset Property located at 1911 to 1931 Sunset Boulevard in Los Angeles, California. The Site consists of approximately 0.95 acres of land bordered by Sunset Boulevard on the south, and by Reservoir Street on the north. The Site is occupied by two single-story structures occupied by a restaurant and a medical clinic with surface parking. The Site consists of three legal parcels identified as Assessor's Parcel Numbers (APNs) 5404-001-007, -008, and -034 in Los Angeles County. A Site Vicinity Map is shown on Figure 1 and a Site Plan is shown on Figure 2.

### 2.1 Purpose

The purpose of the Phase I ESA has been to identify and evaluate the presence of RECs at the Site. The term "RECs" means the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The term is not intended to include *de minimus* conditions that generally do not present a material risk of harm to public health or the environment, and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

## 2.2 Scope of Services

Northgate has performed the Phase I ESA in general conformance with the scope and limitations of ASTM E-1527-13, *Standard Practices for Environmental Site Assessments: Phase I Environmental Site Assessment Process* and 40 CFR Part 312, *Standards and Practices for All Appropriate Inquiry – Final Rule*. This investigation was performed by Nicky Robinson, P.E., Project Engineer with assistance and review by Dennis Laduzinsky, C.E.G., Associate Geologist, and Derrick Willis, Northgate Principal. The scope of work for the investigation included the following services:

- Review of readily available information regarding the history of the Site, including historic aerial photographs, maps, previous reports, and other information, and discussions with individuals familiar with the Site;
- Review of environmental lien documents obtained for the Site:
- A reconnaissance of the Site and near vicinity;
- Discussions with regulatory officials and review of regulatory agency publications and files, as applicable;

- Evaluation of RECs, development of conclusions and scope of work to evaluate potential on-Site contamination concerns; and
- Preparation of this report.

### 2.3 Limitations and Exceptions

#### 2.3.1 Limitations

The purpose of an environmental assessment is to reasonably evaluate the potential for, or actual impact of, past practices on a given site area. In performing an environmental assessment, it is understood that a balance must be struck between a reasonable inquiry into the environmental issues and an exhaustive analysis of each conceivable issue of potential concern. No investigation is thorough enough to absolutely rule out the presence of hazardous materials at a given site. If hazardous conditions have not been identified during the assessment, such a finding should not be construed as a guarantee of the absence of such materials on the Site, but rather as the result of the services performed within the scope, limitations, and cost of the work performed.

Environmental conditions may exist at the Site that cannot be identified by visual observation. Where subsurface work was performed, our professional opinions are based in part on interpretation of data from discrete sampling locations that may not represent actual conditions at un-sampled locations.

Except where there is express concern of our client, or where specific environmental contaminants have been previously reported by others, naturally occurring toxic substances, potential environmental contaminants inside buildings, or contaminant concentrations that are not of current environmental concern may not be reflected in this document.

Where the scope of services is limited to interview and/or review of readily available reports and literature, any conclusions and/or recommendations are necessarily based largely on information supplied by others, the accuracy or sufficiency of which may not be independently reviewed by Northgate.

Any opinions and/or recommendations presented apply to Site conditions existing at the time of performance of services. We are unable to report on, or accurately predict, generally unforeseeable events that may impact the Site following performance of services, whether occurring naturally or caused by external forces. Therefore, we cannot assume responsibility for such events or their impact. We also cannot assume responsibility for changes in environmental standards, practices, or regulations.

### 2.3.2 Exceptions

The time intervals between some historical information sources may exceed five years due to the unavailability of such records. However, in our opinion, this data gap does not significantly impact our ability to evaluate historic land use conditions at the Site given the availability of other sources for this information.

Northgate did not receive responses to its request to review available files for the Site from several local government agencies including the Los Angeles Regional Water Quality Control Board and the Los Angeles County Fire Department, which constitutes a data gap as defined in the ASTM Standard. However, given the availability of other sources for information regarding the site use and potential impacts to the Site as well as Northgate's Phase II ESA for the Site, in Northgate's opinion, this data gap is insignificant and does not impact our ability to evaluate environmental conditions at the Site. Nevertheless, Northgate will issue an addendum to this report if information contained in the agency files when available changes the conclusions or recommendations in this report.

Finally, the Site owner was not available for an interview regarding land use history of the Site However, given that other credible evidence shows that the Site has historically been occupied by residences followed by a paved surface parking lot, that soil and soil vapor samples were collected by Northgate as part of a recently completed Phase II ESA for the Site, and that these data gaps are not anticipated to result in changes to the conclusions and recommendations presented in this report. There were no other limiting conditions.

#### 2.4 User Reliance

This report has been prepared for the exclusive use of Wactor & Wick LLP and its client Holland and their corporations, subsidiaries, affiliates, partners, partnerships, and lenders in evaluating environmental conditions at the Site (collectively User). Others may not use or rely on the information contained in this report without the express written consent of Northgate.

#### 3.0 SITE DESCRIPTION

## 3.1 Site Location and Legal Description

The Site consists of approximately 0.95-acres of land located at 1911 to 1931 Sunset Boulevard in the City of Los Angeles, California. The Site consists of three parcels identified as APNs 5404-001-007, -008, and -034 in Los Angeles County. The Site is currently developed with two single-story structures occupied by a restaurant and a medical clinic, with the remainder of the Site covered with paved surface parking. A Site Vicinity Map is shown on Figure 1 and a Site Plan is shown on Figure 2.

### 3.2 Site Vicinity General Characteristics

The Site consists of a commercial development property located within an area of mixed commercial and residential development in urban Los Angeles.

### 3.3 Geology and Groundwater

#### 3.3.1 Geology

The Site is located in the Transverse Ranges Geomorphic Province area of Los Angeles County. The Elysian Hills are located to the north and northwest of the Site. Subsurface soils in the Site vicinity have been reported to predominantly include silts and clays with some layers of sandy silt and sandy clay. The area is underlain by bedrock from the Puente Formation at depths of approximately 34 to 42 feet below the ground surface (bgs) (TRC, 2017).

#### 3.3.2 Groundwater

Groundwater is generally present at depths of approximately 10to 15 feet bgs in the Site vicinity. On a regional basis, groundwater flow is reported towards the southeast towards Echo Park Lake (TRC, 2017). Groundwater at the Site is estimated to be at least 28 feet bgs and is assumed to flow towards the southeast.

### 3.4 Current Use of the Property

The Site is currently developed with a one-story medical office building on the southwestern portion of the Site and a one-story restaurant on the eastern portion of the Site. The remainder of the Site is occupied by an asphalt paved surface parking lot.

### 3.5 Description of Structures, Roads, Sewage, and Potable Water Sources

The Site is currently developed with an approximate 4,000 square foot single-story medical office building on the southwestern portion of the Site. An approximate 18,420-square foot restaurant with a partial basement level occupies the eastern portion of the Site. The remainder of the Site is occupied by asphalt paved surface parking areas and driveways. Additional descriptions of the structures are provided in Section 6.0 below. Water and sewer connections are provided through the City of Los Angeles.

## 3.6 Current Uses of Adjoining Properties

The Site is bordered to the north by Reservoir Street followed by commercial and residential development. To the east, the Site is bordered by a commercial restaurant followed by the intersection of Sunset Boulevard and Reservoir Street followed by commercial development. Sunset Boulevard followed by residential and commercial development borders the Site to the south. The Site is bordered to the west by a library, and then a gasoline service station and other commercial development.

7

#### 4.0 USER PROVIDED INFORMATION

## 4.1 Environmental Liens or Activity and Use Limitations

An environmental lien and activity and use limitation (AUL) search was conducted for 1911 Sunset Boulevard (APN 5404-001-034) by Environmental Data Resources (EDR). EDR's review indicates that there are no environmental liens or activity and use limitations of record on the Site. A copy of the Environmental Lien and AUL Search is included in Appendix A (EDR, 2019a).

#### 4.2 Valuation Reduction for Environmental Issues

Northgate has not been provided with any information indicating that the value of the property has been reduced due to environmental issues.

### 4.3 Owner, Property Manager, and Occupant Information

According to the EDR Environmental Lien and AUL report (Appendix A) title to 1911 Sunset Boulevard is vested in Michael & Karri Taix, Trustees of the Michael and Karri Taix Family Trust. The commercial building on the eastern portion of the Site contains the Taix French Restaurant. The medical office building on the southwestern portion of the Site is occupied by a private internal medical practice for Dr. Silao.

### 4.4 Specialized Knowledge

The Client provided a previous Phase I ESA report prepared for the Site. The Client has not indicated that they possess any additional specialized knowledge regarding the Site.

#### 4.5 Reason for Performing the Phase I ESA

Northgate understands that Wactor & Wick is evaluating the property for their client Holland for potential purchase. Northgate understands that Holland intends to redevelop the Site with a podium style mixed-use building that is planned to include six-stories of apartments over three-stories of parking, retail space, and one to two and a half subterranean levels.

#### 5.0 RECORDS REVIEW

#### 5.1 Standard Environmental Record Sources

To determine if the Site has any documented environmental concerns, or if other sites with documented environmental concerns exist within the search radii of the Site prescribed by ASTM 1527-13 and *All Appropriate Inquiry*, Northgate reviewed a summary of regulatory agency database listings prepared by EDR. In addition, where appropriate, we reviewed local regulatory agency files for additional specific information regarding sites identified in the EDR report judged to be of possible concern to the subject Site. The EDR report presenting a summary of the agency databases reviewed and a map showing the location of the identified sites is provided as Appendix B (EDR, 2019b). The results of the database search and follow-up agency file review are summarized below.

Copies of information obtained for the Site are included in Appendix C and copies of information obtained from agency research for surrounding sites are included in Appendix D.

#### 5.1.1 Site

Street addresses for the Site have historically included even numbered addresses between 2008 – 2018 Reservoir Street, and odd numbered addresses between 1909 – 1931 Sunset Boulevard. Database listings for these addresses included in the EDR environmental database report are shown on the attached table. The records include a 1990 regulatory database listing for air quality emissions for Taix Restaurant, and HAZNET database listings for off-Site disposal of photochemical waste from a medical office group from 1993 – 1995. In Northgate's opinion, these database listings do not indicate a significant potential for a hazardous materials release at the Site.

The EDR report also contains an EDR proprietary (non-regulatory) database listing indicating the presence of an "Oriental Laundry" on the Site in 1942. The laundry listing does not specify the nature of the laundry operation (e.g., dry cleaning or washing only), does not indicate whether or not volatile chemicals were used, and does not indicate a documented release of hazardous materials at the Site. Given the historic occupancy by a laundry facility, Northgate performed a Phase II investigation, which indicated that there is no known or suspected contamination from the former laundry.

The database listings for the Site in the EDR report are summarized on the following table.

EDR Site#	Site Listing and Address	Regulatory Database	Information in EDR Report
A1	Les Freres Taix, Inc. 1911 Sunset Boulevard	EMI	The EDR database report contains a South Coast Air Quality Management District listing for the Site from 1990 for 1-ton/yr of PM-10 emissions. No other information is provided in the EDR report.
A2	Arbiter Cowan Beller, MDs 1931 Sunset Boulevard	HAZNET	The EDR database report contains a listing for hazardous waste removal from a medical office located on the Site from 1993 through 1995. Information in the EDR report indicates the off-Site disposal of 0.1 to 0.6 tons/yr (200 to 1,200 pounds) of photochemical processing waste. The EDR report does not contain information indicating a hazardous materials release at the Site.
A3	Sam Lee 1925 S Sunset Boulevard	EDR Hist Cleaner	The EDR report contains an EDR proprietary (non-regulatory) database listing for an "Oriental Laundry" located on the Site in 1942. No additional information is provided regarding the nature of the laundry or cleaning activities performed or the types of chemicals, if any, used.

## 5.1.2 Off-Site Sources

The regulatory agency database search prepared by EDR indicates the presence of 129 agency-listed sites located within an approximate one-mile radius of the Site. The EDR database report containing a list of the agency databases searched is attached in Appendix B. Sites with documented releases impacting groundwater located within 0.25-mile upgradient and/or cross-gradient of the Site, or otherwise judged to be of potential impact to soil, soil vapor, or groundwater quality at the Site, are summarized in the following table.

Property Name	Agency Database	Location Relative to Site	Potential Environmental Concern
RC Perkins - 1901 Sunset Boulevard, Los Angeles	EDR HIST AUTO	Adjacent to east (cross-gradient) of the Site	The facility is listed on the EDR proprietary (non-regulatory) Historic Auto database from 1937 to 1942. Other historic information sources indicate that this property was used as a gasoline service station from the 1920s to the 1940s, and for auto service and repair from the 1920s through at least the 1970s. Given the relatively close proximity to the subject Site and the long history of service station and auto service, this facility may have impacted soil or soil vapor quality at the subject Site.
WR Dolbier - 1920 South Sunset Boulevard, Los Angeles	EDR HIST AUTO	Approximately 60 to 100 feet south (downgradient) of the Site	This facility is listed on the EDR proprietary (non-regulatory) Historic Auto database as a gasoline and oil service station from 1933 to 1942. Historic aerial photographs indicate that the service station was no longer present in 1952. There are no records of a hazardous materials release at the facility. However, given the relatively close proximity to the subject Site (less than 100 feet) there exists a potential that hazardous materials releases at the facility, if present, could potentially impact soil vapor quality at the subject Site. Given the age of possible historic releases at the facility (approximately 70 years ago) potential impacts are not likely to be significant.
Jack McKinstry - 2005 South Sunset Boulevard, Los Angeles	EDR HIST AUTO	Adjacent to the Site on the west (upgradient)	The facility is listed in EDR as a historic automobile repair shop in 1933. Given the age of database listing (86 years ago) and absence of other information, this facility does not appear to represent a significant potential to impact soil, soil vapor, or groundwater quality at the subject Site.
Triunfo Del Arco - 2002 West Sunset Boulevard, Los Angeles	EDR HIST AUTO	Approximately 80 to 100 feet south-southwest (cross-gradient to downgradient) of the Site	The EDR report contains a listing for this facility as a gasoline service station in 2013 and 2014. However, the property at this address has historically been occupied by an apartment complex. Northgate could not confirm evidence of a gasoline service station at this location in 2013 to 2014. In our opinion the listing is in error and is likely is related to the Sunset Car Wash listing below.
Arthur Bergeron 2021 S Sunset Blvd	EDR HIST AUTO	Approximately 150 feet west-southwest (cross- gradient to upgradient) of the Site	The facility is listed on the EDR proprietary (non-regulatory) Historic Auto database as an automobile repair facility and gasoline service station from 1924 to 1937. No additional information is available. Given the relative age of the listing and absence of additional information, this facility does not appear to represent a significant potential to impact soil, soil vapor, or groundwater quality at the Site.

Property Name	Agency Database	Location Relative to Site	Potential Environmental Concern
Chevron - 2035 West Sunset Boulevard, Los Angeles	SWEEPS UST, HIST UST, CA FID UST, EDR HIST AUTO	Approximately 235 feet west-southwest (cross- gradient to up gradient) of the Site	This facility is an active Union 76 service station located along Sunset Boulevard west of the subject Site. The station appears to have been in operation since at least the 1960s. However, the facility is not listed on the SWRCB LUST list or other database indicating a documented hazardous materials release. Given the absence of a documented release, this facility does not appear to represent a significant potential to impact soil, soil vapor, or groundwater quality at the subject Site.
Sunset Car Wash 2028 to 2040 Sunset Boulevard, Los Angeles	SWEEPS UST, CAFID UST, LUST, HAZNET, EDR HIST AUTO	Approximately 275 feet southwest (cross-gradient) of the Site	Information on the GeoTracker website indicates that soil and groundwater contamination was discovered at the facility during removal of USTs in 1989. Subsequent investigations performed through 2009 indicated the presence of up to 15-feet of light non-aqueous phase liquid (LNAPL, i.e., free-product gasoline) floating on the groundwater surface beneath the facility. Manual free-product recovery began in 2006 and a high-vacuum dual-phase extraction system was installed and operated between January and August 2009. Investigations performed in 2015 initially suggested that there may be two different sources of fuel hydrocarbon release (a leaded gasoline and an unleaded gasoline release) which had not been fully identified. However, subsequent analysis did not identify any alternative sources.
			Additional free-product recovery wells were installed at the facility in 2016. Monitoring performed in June 2018 indicates the presence of a groundwater mound along the central portion of the facility that produces localized groundwater flow directed away from the mound to the northwest and the southeast (recall that the overall regional groundwater flow direction is toward the southeast). Up to 6-feet of free hydrocarbon product is locally present beneath the facility. At present, the RWQCB has requested submittal of an Interim Remedial Action Plan to further remove free hydrocarbon product from the subsurface. The full downgradient extent of the contamination impact has not been defined. Given the high levels of contamination and relative location (about 275 feet cross-gradient), contamination originating at this facility could potentially impact groundwater and soil vapor quality at the subject Site.

Property Name	Agency Database	Location Relative to Site	Potential Environmental Concern
Style Cleaner - 1448 North Alvarado Street, Los Angeles	EDR HIST CLEANER	Approximately 1100 feet north (upgradient) of the Site	This facility is listed on the proprietary (non-regulatory) EDR historic dry cleaner database as a drycleaner that historically used tetrachloroethene (PCE). However, the facility is not listed on the GeoTracker website, and no further information is available regarding this facility.
			Given the relative distance and absence of a reported release, this facility does not appear to represent a significant potential threat to soil, soil vapor, and/or groundwater quality at the subject Site.
Alvarado Property - 1453 and 1455 Alvarado Avenue, Los Angeles	ENVIROSTOR VCP	Approximately 1,400 feet north (upgradient) of the Site	This facility is listed as a Voluntary Cleanup Program (VCP) site on the DTSC ENVIRSTOR website. Information available on ENVIROSTOR indicates that relatively low levels of PCE (19 micrograms per liter or $\mu g/L$ ) and trichloroethene (TCE, $10~\mu g/L$ ) and moderate levels of methyl tert-butyl ether (MTBE, $340~\mu g/L$ ) are present in groundwater at the property, likely related to historic releases originating at a former drycleaner and service station located adjacent to the facility on the north. Based on the information provided to DTSC indicating that the contamination originates from offsite sources, DTSC has determined that no further action is warranted for the facility.
			Given the distance and relatively low levels of contaminants present, this facility does not appear to represent a potential threat to soil, soil vapor, and/or groundwater quality at the subject Site.
Exxon Gas Station / Rapid Gas 1465 Glendale Blvd.	CA FID UST, HIST CORTESE, UST, LUST	Approximately 1000 feet northeast (upgradient to cross-gradient) of the Site	This facility is listed as a closed LUST site on the GeoTracker website. Information on GeoTracker indicates that the facility is an active gasoline service station where five USTs were removed and replaced with three new USTs in 1998. Soil samples collected at that time contained up to 9,700 milligrams per kilogram (mg/kg) of petroleum hydrocarbons as gasoline. Through 2012, 17 groundwater monitoring wells were installed at the site and monitored on a quarterly basis. Monitoring results from 2012 indicate that the groundwater contamination plume is reasonably well defined and shown to extend offsite to the south for only a short distance. Although residual contamination remains in soil and groundwater at the facility, the facility received formal regulatory closure from the RWQCB on July 24, 2013 under a low-threat closure evaluation, and no further action is required.
			Given the distance and regulatory closure status, this facility does not appear to represent a potential threat to soil, soil vapor, and/or groundwater quality at the Site.

Property Name	Agency Database	Location Relative to Site	Potential Environmental Concern
PF Mason – 1353 Glendale Boulevard, Los Angeles	EDR HIST AUTO	Approximately 450 feet northeast (upgradient to cross-gradient) of the Site	The facility is listed on the proprietary (non-regulatory) EDR HISTORIC AUTO database as an automobile service station between 1924 and 1942. The property is now developed as a donut shop. Due to the absence of a documented release, this facility does not appear to represent a significant potential threat to soil, soil vapor, or groundwater quality at the subject Site.
76 Station #0779 – 1340 Glendale Boulevard, Los Angeles	LUST	Approximately 550 feet east (cross-gradient) of the Site	This vacant parcel is a former gasoline service station where a 12,000-gallon and a 10,000-gallon UST for gasoline and a 500-gallon waste oil UST were removed in 2004. 209 tons of contaminated soil and 14,000 gallons of impacted groundwater were removed from the facility at that time. Thirteen groundwater monitoring wells were installed and sampled semiannually between 2005 and 2014. The final groundwater monitoring event performed in January 2014 recorded the presence of 890 µg/L of gasoline, 170 µg/L of benzene, 290 µg/L of MTBE, and 680 µg/L of TBA. The depth to groundwater was measured at 5 to 10 feet bgs, with a flow direction toward the southeast. The RWQCB issued a formal regulatory closure on March 26, 2015 under a low-threat closure evaluation, and no further action is required.  Given the distance, cross-gradient location, and regulatory closure status, this facility does not appear to represent a significant potential threat to soil, soil vapor, or groundwater quality at the Site.
Garcia Property (McDonald's) – 1400 North Alvarado Street, Los Angeles	Closed LUST SWEEPS UST, FID UST	Approximately 635 north (upgradient) of the Site	This facility is listed on the State Water Resources Control Board GeoTracker website as a closed Leaking Underground Storage Tank (LUST) site with a regulatory closure date of 9/29/1997. No reports or other information are available on GeoTracker. EDR lists the facility on the SWEEPS UST and FID UST databases but provides no additional information. EDR also lists the facility on its proprietary (non-regulatory) HIST AUTO SERVICE STATION database indicating the property was used as a gasoline service station between 1933 and 1942. No further information is available regarding this facility.  Given the relative distance and regulatory closure status, this facility does not appear to represent a significant potential threat to soil, soil vapor, or groundwater quality at the Site.

### 5.2 Vapor Encroachment Screening

A vapor encroachment screening (VES) evaluation was performed for the Site using EDR's vapor encroachment condition application (VEC App), which assists in screening for vapor encroachment risk in accordance with ASTM E2600 "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions." A "Tier I" VES was performed to evaluate the potential for vapors associated with contaminated soil and/or groundwater to impact the Site, whether originating from the Site or from nearby off-Site sources. For properties where a VEC could not be ruled out, existing subsurface investigation reports, if available, were used to evaluate potential impacts to the Site (Tier 2 screening).

The EDR vapor encroachment screening report generated during this evaluation is attached in Appendix E (EDR, 2019c). The following table presents a summary of the VES findings:

Potential for Vapor Intrusion on Site			
Areas of Concern	Conclusion		
Site (existing conditions)	VEC not present.		
Site (former condition)	VEC not present.		
Adjoining Property or near-by Property Operations or Existing Conditions	VEC could not be ruled out.		
Historical Uses of Adjoining Property or Near-by Properties	VEC could not be ruled out.		

Our review indicates that the property located immediately adjacent to the Site on east has been used for automobile repair from the 1920s through the 1970s and as a gasoline service station from the 1920s through the 1940s. Our review also identified the presence of a Leaking Underground Storage Tank (LUST) site located about 275 feet southwest (cross-gradient) of the Site where up to six feet of non-aqueous phase liquid (NAPL) gasoline is present on the groundwater. The full downgradient extent of the LNAPL and dissolved-phase contamination plume has not been determined. Based on these conditions, and the presence of a number of historic gasoline service station in close proximity to the Site, a VEC could not be ruled out for the subject Site related to the off-Site issues.

### 5.3 Additional Environmental Record Sources

Northgate contacted local regulatory agencies for information regarding the use or storage of hazardous materials at the Site, and reviewed files at any agency maintaining a file for the subject Site. The following agencies were contacted for information regarding the use or storage of hazardous materials at the Site:

- Department of Toxic Substances Control (DTSC) EnviroStor Website;
- State Water Resources Control Board (SWRCB) GeoTracker Website;

- Los Angeles Regional Water Quality Control Board (LARWQCB);
- Los Angeles County Fire Department (LACFD);
- Los Angeles County, Public Health Department;
- Los Angeles County Department of Public Works;
- South Coast Air Quality Management District (SCAQMD); and
- Oil and Gas Wells.

The results of our review are described in the following sections. Relevant documents pertaining to the agency reviews are located in Appendix C.

#### 5.3.1 Department of Toxic Substances Control (DTSC) EnviroStor Website

The Site is not listed on the DTSC EnviroStor website, and thus, there are no files related to the property.

## 5.3.2 State Water Resources Control Board (SWRCB) GeoTracker Website

The Site is not listed on the GeoTracker website, and thus, there are no files related to the property.

## 5.3.3 Los Angeles Regional Water Quality Control Board (LARWQCB)

Northgate submitted a file review request to the LARWQCB. At the time this report was prepared, no response had yet been received from the LARWQCB However, information presented in a previous Phase I ESA of the Site prepared on November 7, 2018 provided by the Site owner indicates that the LARWQCB does not maintain any files for the Site (EFI, 2018). Nonetheless, Northgate will issue an addendum to this report if subsequent review of the files, when received, changes our conclusions or recommendations.

#### 5.3.4 Los Angeles County Fire Department (LACFD)

The LACFD maintains database lists online with property addresses identified as active or inactive facilities for underground storage tanks, aboveground petroleum storage tanks, and hazardous materials. The Site was not listed on any of the databases maintained by the LACFD.

### 5.3.5 Los Angeles County, Public Health Department

Northgate submitted a file review request to the Los Angeles County, Public Health Department. The Los Angeles County, Public Health Department referred the request to the LACFD [Refer to Section 5.3.5 for discussion of the regulatory file review referred to the LACFD].

### 5.3.6 Los Angeles County Department of Public Works

Northgate reviewed an online file review system maintained by the Los Angeles County Department of Public Works for industrial waste, USTs, and stormwater discharge permits. The online system did not contain a listing for any of the addresses associated with the Site.

### 5.3.7 South Coast Air Quality Management District (SCAQMD)

Northgate reviewed the SCAQMD's online Facility Information Detail (FIND) database for any files available for the Site. The FIND database contained a listing for the Site at 1911 Sunset Boulevard for the restaurant Les Freres Taix, Inc. The SCAQMD identified a permit to operate a charbroiler in 1989 that was cancelled later that year. No other equipment was listed at the facility. There were no notices of violation or notices to comply reported for the facility. No further information was available.

#### 5.3.8 Oil and Gas Wells

According to the EDR GeoCheck® - Physical Setting Source Addendum located in the Radius report (Appendix B), there is no record of an oil or gas well or related features on-Site. The records show 109 oil and gas wells located within 1-mile of the Site with the closest well being located about one-half a mile from the Site to the west (cross-gradient). The remaining wells are all located nearly one mile from the Site primarily to the south (downgradient) of the Site. Information available on the California Division of Oil, Gas, and Geothermal Resources website indicates that there are no wells located on or within a 0.25-mile radius of the Site. None of the wells appear to represent an environmental concern to the Site based on their relative locations and distances.

#### 5.4 Other Environmental Issues

## 5.4.1 Floodplain Maps

Northgate viewed an online version of the Federal Emergency Management Agency (FEMA) Flood Insurance Rate Map (FIRM) for Los Angeles County, Panel 1610F. According to the FIRM, the Site is located in Flood Zone X – areas determined to be outside the 0.2-percent

annual chance floodplain (FEMA, 2008). The Site does not lie within the 100- or 500-year flood zones.

#### 5.4.2 Radon

The California Department of Health Services' (DHS') online list of indoor radon levels indicates that with the exception of four samples, radon concentrations from 39 indoor air samples collected in zip code area 90026 were less than 4.0 pico-curies per liter (pCi/L) (DHS, 2010). According to the EDR Radius Report (Appendix B), the federal Environmental Protection Agency (EPA) radon zone for Los Angeles County is Zone 2 (indoor average level greater than or equal to 2 pCi/L and less than or equal to 4 pCi/L).

The State of California Division of Drinking Water and Environmental Management maintains a database of radon test results indicating that out of 63 samples collected in Los Angeles County, California, in the living area-first floor, 2% exceeded 4 pCi/L. The DHS and the EPA recommend that some form of mitigation be conducted for houses with indoor radon concentrations of 4 pCi/L or greater.

These results indicate that radon gas does not appear to constitute a significant environmental concern at the Site.

#### 5.4.3 Methane

The methane code for the City of Los Angeles stipulates testing and potential mitigation measures for methane for facilities located within the designated Los Angeles Methane or Methane Buffer Zones, areas of the city underlain by naturally-occurring methane-producing geologic formations. A review of the methane zone maps available online showed that the Site is not located within the methane or methane buffer zones.

### 5.5 Land Use History

Information on historical land use at the Sites and adjacent area was evaluated by reviewing historic aerial photographs, maps, and other documents. A summary of our investigation findings is presented below.

### 5.5.1 Aerial Photographs

Northgate reviewed historic aerial photographs of the Sites from 1923, 1928, 1938, 1948, 1952, 1964, 1970, 1977, 1981, 1989, 1994, 2002, 2005, 2009, 2012, and 2016 obtained from EDR (EDR, 2019d). Copies of the aerial photographs are provided in Appendix F. A summary of our aerial photograph review is presented below.

## 5.5.2 Sanborn Maps

Northgate reviewed Sanborn fire insurance maps for the Site obtained from EDR for the years 1906, 1919, 1950, 1953, 1954, 1957, 1960, 1961, 1964, 1965, 1966, 1968, 1969, and 1970. A copy of the Sanborn Maps are provided in Appendix G (EDR, 2019e). Information from the Sanborn maps is summarized below.

1906:	Two dwellings and storage structures are mapped on the central portion of the Site. A small structure occupied by a church Sunday school is mapped in the northwestern corner of the Site. The remainder of the Site is mapped as vacant land.
North:	Reservoir Street followed by unmapped areas.
East:	Vacant land followed by the intersection of Reservoir Street and Sunset Boulevard followed by unmapped areas.
South:	Sunset Boulevard followed by primarily vacant land with a few scattered dwellings.
West:	Primarily vacant land with one dwelling followed by North Alvarado Street then vacant land with a few scattered residences.

1919:	The Site is not mapped.
North:	Reservoir Street followed by primarily vacant land with scattered dwellings.
East:	Unmapped area.
South:	Unmapped area.
West:	Unmapped area.

1950:	Four dwellings and two automobile garages are mapped in the northwestern portion of the Site. The southwestern portion of the Site is developed with two commercial structures occupied by a furniture store, a restaurant, and two stores. The central portion of the Site is occupied by a surface parking lot. The eastern portion of the Site is developed with a commercial structure occupied by a restaurant.
North:	Reservoir Street followed by residential development and a church.
East:	An automobile service facility with a gasoline service station followed by the intersection of Reservoir Street and Sunset Boulevard then commercial development.
South:	Sunset Boulevard followed by residential development and limited commercial development including a machine shop to the southeast of the Site.
West:	Commercial development including a post office and three stores, apartment buildings, a church, and commercial development followed by North Alvarado Street then additional residential and commercial development.

1953:	The Site appears similar to the 1950 map.
North:	Appears similar to the 1950 map.
East:	Appears similar to the 1950 map except that the gasoline service station is no longer mapped at the automobile repair facility adjacent to the east of the Site.
South:	Appears similar to the 1950 map.
West:	Appears similar to the 1950 map, except that the stores are now shown as a paint store.

1954:	The Site appears similar to the 1953 map, except that the residences are no longer mapped in the northwestern potion of the Site.
North:	Unmapped area.
East:	Appears similar to the 1953 map.
South:	Appears similar to the 1953 map.
West:	Appears similar to the 1953 map.

1957:	The Site appears similar to the 1954 map.
North:	Appears similar to the 1953 map.
East:	Appears similar to the 1954 map.
South:	Appears similar to the 1954 map.
West:	Appears similar to the 1954 map.

1960:	The Site appears similar to the 1957 map, except that the commercial structure in the southwestern portion of the Site is now occupied by offices.
North:	Appears similar to the 1957 map.
East:	Appears similar to the 1957 map.
South:	Appears similar to the 1957 map.
West:	Appears similar to the 1957 map.

1961:	The Site is not mapped.
North:	Appears similar to the 1957 map.
East:	Unmapped area.
South:	Unmapped area.
West:	Unmapped area followed by residential and commercial development.

1964:	The Site appears similar to the 1960 map.
North:	Reservoir Street followed by unmapped areas.
East:	Appears similar to the 1960 map.
South:	Appears similar to the 1960 map.
West:	Appears similar to the 1960 map, except that the commercial structure identified as a paint store is not occupied by a store.

1965:	The Site appears similar to the 1964 map.
North:	Appears similar to the 1964 map.
East:	Appears similar to the 1964 map.
South:	Appears similar to the 1964 map.
West:	Appears similar to the 1964 map.

1966:	The Site is not mapped.
North:	Appears similar to the 1961 map.
East:	Unmapped area.
South:	Unmapped area.
West:	Unmapped area followed by residential and commercial development.

1968:	The Site appears similar to the 1964 map.
North:	Appears similar to the 1966 map.
East:	Appears similar to the 1964 map.
South:	Appears similar to the 1964 map.
West:	Appears similar to the 1964 map.

1969:	The Site is not mapped
North:	Appears similar to the 1968 map.
East:	Unmapped area.
South:	Unmapped area.
West:	Unmapped area followed by residential and commercial development.

1970:	The Site appears similar to the 1968 map.	
North:	Appears similar to the 1969 map.	
East:	Appears similar to the 1968 map.	
South:	Appears similar to the 1968 map.	
West:	Appears similar to the 1968 map.	

## 5.5.3 Topographic Maps

Northgate reviewed historic topographic maps for the Site obtained from EDR for the years 1894, 1896, 1898, 1900, 1902, 1920, 1921, 1928, 1953, 1966, 1972, 1981, 1991/1994, and 2012. Copies of the topographic maps are provided in Appendix H (EDR, 2019f). Information from the topographic maps is summarized below.

Quadrangle:	Los Angeles	<b>Scale:</b> 1:62,500	Series: 15 Minute	
1894:	The Site is shown as vacant land. Elysian Park is mapped to the north and east of the Site and a railroad followed by Echo Lake is mapped to the South of the Site followed by a grid of streets and residential development. The Los Angeles River and a railroad are mapped farther north of the Site beyond Elysian Park and several streams are mapped to the north and west of the Site.			
Quadrangle:	Santa Monica/Pasadena	<b>Scale:</b> 1:62,500	Series: 15 Minute	
1896:	The Site and vicinity appear similar to the 1894 map.			
Quadrangle:	Santa Monica	<b>Scale:</b> 1:62,500	Series: 15 Minute	
1898:	The Site and vicinity appear similar to the 1896 map.			
Quadrangle:	Pasadena/Los Angeles	<b>Scale:</b> 1:62,500	Series: 15 Minute	
1900:	The Site and vicinity appear similar to the 1898 map.			
Quadrangle:	Santa Monica	<b>Scale:</b> 1:62,500	Series: 15 Minute	
1902:	The Site is and vicinity appear similar to the 1900 map.			
1920:	The Site is shown as primarily vacant land with residences mapped in the northwestern portion of the Site. The vicinity is shown as mostly developed with commercial and residential structures. Echo Lake is mapped to the south of the Site and Silver Lake is mapped farther north of the Site.			

1921:	The Site and vicinity appear similar to the 1920 map.			
Quadrangle:	Glendale/Los Angeles Scale: 1:24,000 Series: 7.5 Minute			
1928:	The Site is mapped with three residential structures in the northwestern portion of the Site and commercial development along the southern portion of the Site. The vicinity is primarily shown as mostly developed with commercial and residential structures. Sunset Boulevard is mapped to the south of the Site.			
Quadrangle:	Hollywood/Los Angeles Scale: 1:24,000 Series: 7.5 Minute			
1953:	The Site and immediate vicinity are mapped as high-density urban development. The Hollywood Freeway is now mapped to the south of the Site beyond Echo Lake.			
1966:	The Site and vicinity appear similar to the 1953 map, except that the Glendale freeway is mapped to the northeast of the Site and Dodgers Stadium is now mapped farther east of the Site.			
1972:	The Site and vicinity appear similar to the 1966 map.			
1981:	The Site and vicinity appear similar to the 1972 map.			
1991/1994:	The Site and vicinity appear similar to the 1981 map.			
2012:	The Site and vicinity appear similar to the 1991/1994 map.			

### 5.5.4 City Directories

Northgate reviewed a summary of local city directory listings for the Site and nearby vicinity available at approximate five year intervals from 1924 to 2014 obtained from EDR. A copy of the EDR city directory search is provided in Appendix I (EDR, 2019g).

The eastern portion of the Site, historically listed at 1911 through 1929 Sunset Boulevard, was identified as a restaurant between about 1951 and 2014 and a liquor store between about 1951 and 1976. The southwestern portion of the Site, listed at 1931 Sunset Boulevard, was identified as a furniture store in 1951 followed by a medical office between 1962 and 2006 as well as a pharmacy between 1971 and 1990. No other listings were provided for the subject Site.

Listings in the vicinity of the Site consisted primarily of commercial development and residential development. A gasoline service station was identified approximately 235 feet to the west of the Site at 2035 Sunset Boulevard in 2000. Listings in the Site vicinity determined to be of potential environmental concern to the subject Site are described in detail in Section 5.1.2.

#### 5.6 Interviews

#### 5.6.1 Owner Interview

The current owner was not available for an interview during this investigation. This constitutes a data gap as defined in the ASTM Standard that could potentially impact our ability to evaluate environmental conditions at the Site.

### 5.6.2 Key Site Manager Interview

A key Site manager of the restaurant was not available for interview during this investigation. The on-site office manager for the Sunset Medical Building was interviewed as part of this assessment. She indicated that the facility has operated as a private medical office for many years. The office manager indicated that daily operations generate biohazardous waste from sharps for blood draws, which are discarded in specified containers that are routinely picked up each month for off-site disposal. She was not aware of any other hazardous materials that are currently or were historically used, generated, or stored at the facility.

#### 5.6.3 User Interview

Holland provided Northgate with a previous Phase I ESA prepared for the Site Owner on November 7, 2018. Northgate's review of that report is provided in Section 5.6 below and incorporated into relevant section of this report.

## **5.7** Previous Reports

Northgate reviewed a previous report for the Site provided by the User as summarized below. Copies of pertinent documents and reports for the Site are included in Appendix C.

Phase I Environmental Site Assessment, Taix French Restaurant, 1911 Sunset Boulevard and 1980 and 2007 West Reservoir Street, Los Angeles, California 90026 prepared by EFI Global dated November 7, 2018 (EFI, 2018).

This Phase I ESA was performed by EFI Global (EFI) and covered the Site and the property to the north of the Site across West Reservoir Street. The results of the investigation indicated that the Site was originally developed with residential structures on the central portion of the Site in 1905 that expanded in the early 1900s to include a church Sunday school and three total residential structures. In 1911, a four-unit apartment building and a detached automobile garage structure were developed in the northwestern portion of the Site. By 1923, two additional residential structures were developed in the northwestern portion of the Site. A commercial

structure was developed in the southwestern portion of the Site in 1924. Historic occupants of this structure were identified as Sam Lee Laundry between 1939 and 1942, liquor stores between 1951 and 1967, "Matlin Stationers" in 1951, and a café between 1951 and 1962. In 1929, the residential structure on the eastern portion of the Site was demolished and the area redeveloped with a commercial structure that has been occupied by a restaurant sine development.

The remaining residential structures were demolished between about 1946 and 1965 and an additional commercial structure was constructed adjacent to the restaurant on the eastern portion of the Site, which was occupied by another restaurant. These adjacent restaurant structures were combined into a single restaurant by 1968 and a basement level was added beneath a portion of the building. The remainder of the subject Site was occupied by paved parking areas. The surrounding area is used for commercial and residential purposes.

No RECs or potential environmental business concerns were identified during this assessment. No further investigation was recommended by EFI.

<u>Phase II Environmental Site Assessment, Sunset Property – 1911 to 1931 Sunset Boulevard, Los Angeles, California (Draft) prepared by Northgate dated February 12, 2019 (Northgate, 2019).</u>

Northgate recently conducted a Phase II ESA at the Site that included the analysis of 27 soil samples and three soil vapor samples from drilling six borings and installing three temporary soil vapor probes at the Site. No groundwater samples were collected as part of this investigation because groundwater was not encountered in the borings at the maximum depth of 28 feet bgs.

Low concentrations of total petroleum hydrocarbons as motor oil were reported in nine shallow soil samples; however, these concentrations were below regulatory screening criteria. Several hydrocarbon-related volatile organic compounds (VOCs), including benzene, ethylbenzene, 1,2,4-trimethylbenzene, and xylenes, were also reported at concentrations below regulatory screening criteria. Detected metals were below their respective screening criteria except for arsenic and lead. With the exception of 15-foot sample collected from the north central portion of the Site, arsenic concentrations were above both the regulatory screening levels for residential and commercial land use; but were below the upper limit background concentration. Lead was also reported in shallow soil in this location at a concentration exceeding regulatory screening levels for residential land use. Elevated concentrations of lead appear to be limited to the shallow soil to no deeper than 5 feet bgs.

Several VOCs were detected in two soil vapor samples. Ethylbenzene and 1,1,2-trichloroethane concentrations exceeded the regulatory screening criteria for residential land use. 1,1,2-trichloroethane also exceeded the regulatory screening level for commercial land use. The VOC

results indicate that there does not appear to be a soil vapor issue associated with historical laundry or other uses on the Site. The 1,1,2-TCA and ethylbenzene could be related to the former automotive maintenance facility to the east of the Site or the current gas station to the west of the Site.

#### 6.0 SITE RECONNAISSANCE

Current Site conditions were observed during a reconnaissance of the Site and near vicinity by Ms. Nicky Robinson of Northgate on February 11, 2019. Site photographs from the reconnaissance are attached at the end of this report.

### **6.1** Methodology and Limiting Conditions

The Site reconnaissance was performed by traversing the Site on foot and the general Site vicinity by car. The medical building was inspected on February 11, 2019. The restaurant building was inspected during a survey conducted on January 14, 2019. There were no other limiting conditions.

### **6.2** General Site and Vicinity Conditions

#### 6.2.1 Site

The Site is located north of Sunset Boulevard and south of Reservoir Street in Los Angeles, California. The Site is developed with a commercial structure in the southwestern portion of the Site, occupied by a medical office, and a commercial structure on the eastern portion of the Site, occupied by a restaurant. The remainder of the Site is occupied by asphalt paved surface parking areas.

A smaller, approximate 4,000-square foot single-story slab on grade commercial structure occupied the southwestern portion of the Site. This building is occupied by a medical office. The interior of the medical office includes a lobby, multiple exam rooms, offices, restrooms, a kitchen, storage areas, and a break room. Small quantities of medical biohazardous waste, including sharps, is generated and stored in containers in each exam room. The office manager indicated that these containers are routinely picked up by an outside vendor for proper disposal. A dumpster is present outside to the north of the structure. With the exception of the biohazardous waste and small quantities of household cleaners, no hazardous wastes, materials, or chemicals were observed to be stored, generated, or used at this facility.

The eastern portion of the Site is developed with an approximate 18,429-square foot commercial structure occupied by a restaurant. This restaurant was previously observed on January 14, 2019. This structure is slab on grade construction that includes a partial basement beneath the northwestern portion of the building. The interior of the structure includes several dining areas, restrooms, a kitchen, and storage areas. The basement is primarily utilized for the storage of furniture and beverages. The restaurant operations generate waste oil and grease that are handled and containerized by the facility. An enclosure for the facility's dumpsters is present outside the

northern portion of the structure. The remainder of the Site is occupied by asphalt paved surface parking areas. De minimis staining is present throughout the parking areas.

## 6.2.2 Site Vicinity

The Site is bordered to the north by Reservoir Street followed by commercial and residential development. To the east, the Site is bordered by a commercial restaurant followed by the intersection of Sunset Boulevard and Reservoir Street followed by commercial development. Sunset Boulevard followed by commercial development borders the Site to the south. The Site is bordered to the west by a library then a gasoline service station and commercial development.

#### 7.0 PHASE I ESA CONCLUSIONS AND RECOMMENDATIONS

This section of the report presents the results of a Phase I ESA performed at the Sunset Property located in the City of Los Angeles, California. The purpose of the investigation is to identify the potential presence of RECs at the Site.

A REC refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following RECs were identified during the course of this assessment:

• Northgate did not identify any RECs during the course of this assessment.

A Controlled Recognized Environmental Condition (CREC) refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

• Northgate did not identify any CRECs during the course of this assessment.

An HREC refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following HRECs were identified during the course of this assessment:

• Northgate did not identify any HRECs during the course of this assessment.

A business environmental risk is defined by ASTM E 1527-13 as a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice. Consideration of business environmental risk issues may involve addressing one or more non-scope considerations. Our review identified the following potential business environmental risks:

• Northgate's review of regional environmental conditions indicates that the property immediately adjacent to the Site on the east was occupied by a gasoline service station and/or an automotive repair facility from the 1920s through the 1970s. Although there are no documented releases at the service station property, the long history of chemical use and the close proximity of the property indicate a potential for impacts to soil, soil vapor, or groundwater quality at the subject Site.

- Northgate's review also indicates the presence of a significant gasoline release at an off-Site property located about 275 feet southwest (cross-gradient) of the Site. The high levels of contamination (up to six feet of LNAPL) and the absence of full downgradient evaluation of the extent of contamination from the property indicates a potential for impacts to soil vapor or groundwater quality at the subject Site.
- A laundry facility was historically present on the Site in the 1940s. No documented hazardous chemical use or release has been identified at the facility. In Northgate's opinion, historic Site occupancy by a laundry facility represents a potential risk of impact to soil, soil vapor, or groundwater quality at the Site; however, the results of the Phase II ESA indicated that there does not appear to be a soil vapor issue associated with historical laundry (or any other uses) on the Site.

Given the redevelopment plans for the subject Site, Northgate conducted a concurrent Phase II ESA to evaluate potential impacts to soil and soil vapor related to the identified business environmental risks. The VOC results indicate that there does not appear to be a soil vapor issue associated with historical laundry or other uses on the Site; however, the 1,1,2-TCA and ethylbenzene could be related to the former automotive maintenance facility to the east of the Site or the current gas station to the west of the Site.

TITLE REPORT AND EDR ENVIRONMENTAL LIEN AND AUL SEARCH REPORT

## **Sunset Property**

1911 Sunset Boulevard Los Angeles, CA 90026

Inquiry Number: 5553210.7

February 06, 2019

## **EDR Environmental Lien and AUL Search**

#### **EDR Environmental Lien and AUL Search**

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- · search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050 with any questions or comments.

## EXHIBIT "A" LEGAL DESCRIPTION

All that certain real property situated in the County of Los Angeles, State of California, described as follows:

#### Parcel 1:

The Southerly 140 feet of Lot 4 of Lake Side Tract, in the City of Los Angeles, County of Los Angles, State of California, as per Map recorded in Book 6 Page 42 of Maps, in the Office of the County recorder of said County.

#### Parcel 2:

Lot 3 of the Lake Side Tract, in the City of Los Angeles, County of Los Angles, State of Los Angles, State of California, as per Map recorded in Book 6 Page 42 of Maps, in the Office of the County recorder of said County.

Except that portion thereof described as follows:

Beginning at a point in the Northeasterly line of said Lot, distant Northwesterly thereon, 12 feet 10 inches from the Northeasterly corner of said Lot, thence Southerly parallel with the Westerly line of said Lot, a distance of 28 feet; thence Westerly parallel with the Southerly line of said Lot, a distance of 40 feet to said Westerly line; thence Northerly along said Westerly line, 60.20 feet to the Northwesterly corner of said Lot; thence Southeasterly along the Northeasterly line thereof, 52.31 feet, More or less, to the point of beginning.

#### Parcel 3:

Lot 2 of the Lake Side Tract, in the City of Los Angeles, County of Los Angles, State of California, as per Map recorder in Book 6 Page 42 of Maps, in the Office of the County recorder of said County.

Also that portion of Lot 1 of said Tract, described as follows:

Beginning at the Southwest corner of said Lot; thence Easterly along the Southerly line thereof, 50 feet; thence Northerly parallel with the West line of said Lot to the Southerly line of Reservoir Street; thence Northwesterly along said line to the most Northerly corner of said Lot; thence Southerly along the Westerly line of said Lot to the point of beginning.

#### Parcel 4:

6

Lots 4 and 5A of Lake Side Tract, in the City of Los Angeles, County of Los Angeles, State of California, as per Map recorded in Book 6 Page 42 of Maps, in the Office of the County recorder of said County.

Except the South 140 feet of said Lot 4.

Parcel 5:

That portion of Lot 3 of said Lake Side Tract described as follows:

Beginning at a point in the Northeasterly Line of said Lot, distant Northwesterly thereon 12 feet and 10 inches from the Northeasterly Corner of said Lot; thence Southerly parallel with the Westerly line of said Lot, 28 feet; thence Westerly parallel with the Southerly line of said Lot, 40 feet to the Westerly line of said Lot; thence Northerly along the Westerly line of said Lot, 60.20 feet to the Northwesterly corner of said Lot; thence Southeasterly along the Northwesterly line of said Lot 52.31 feet more or less, to the point of beginning.

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

### STANDARD ENVIRONMENTAL RECORDS

## Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 4 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 8 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

### State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/29/2018 has revealed that there are 9 ENVIROSTOR sites within approximately 1 mile of the target property.

## State and tribal leaking storage tank lists

LUST: Leaking Underground Storage Tank (LUST) Sites included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the LUST list, as provided by EDR, has revealed that there are 16 LUST sites within approximately 0.5 miles of the target property.

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, & disposal method. The source is the Department of Toxic Substance Control is the agency. This database begins with calendar year 1993.

A review of the HAZNET list, as provided by EDR, and dated 12/31/2017 has revealed that there is 1 HAZNET site within approximately 0.001 miles of the target property.

### **EDR HIGH RISK HISTORICAL RECORDS**

### **EDR Exclusive Records**

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 14 EDR Hist Auto sites within approximately 0.125 miles of the target property.

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 10 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

FINDS:

Registry ID: 110009543075

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110002866934

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Waste code: 131

. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide,

bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite,

perchlorate, and sulfide anions)

. Waste code: 141

. Waste name: Off-specification, aged, or surplus inorganics

Waste code: 214

. Waste name: Unspecified solvent mixture

Waste code: 232

Waste name: Pesticides and other waste associated with pesticide production

Waste code: 311

Waste name: Pharmaceutical waste

. Waste code: 791

Waste name: Liquids with pH < 2

. Waste code: D001

Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

. Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

. Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT

WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002

Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS

CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE

DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Case Worker: BA

Local Agency: Not reported
RB Case Number: 0075
File Location: Regional Board

Potential Media Affected: Aquifer used for drinking water supply, Soil, Soil Vapor Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE),

Trichloroethylene (TCE)

Site History: The site is a three-story building constructed in approximately 1915.

Hollyway Cleaners began operating in one of the units of the building in approximately 1941 and has been in operation under successive owners since then. Site investigation conducted in 1988 for property transaction indicated that the soil and groundwater beneath the site were contaminated with perchloroethylene (PCE), trichlorothene (TCE) and other volatile organic compounds (VOCs) as a result of release(s) from dry cleaning operations. Subsequent subsurface investigations involving soil vapor survey, soil and groundwater sampling and installation of groundwater monitoring wells confirmed the contamination of the soil, soil vapor and groundwater beneath the site. Groundwater monitoring began in 1998 and continued through 1999. However, it was discontinued 2000. A soil vapor extraction

(SVE) system was installed at the site in approximately 1994. The system operated intermittently and operating parameters are unknown.

From 2000 to 2001, bench-scale testing was conducted on soil and groundwater samples for bioremediation. No pilot test or full scale implementation of the proposed bioremediation was carried out. On December 21, 2011, the Regional Board issued a Cleanup and Abatement Order (CAO) to all responsible parties to complete site assessment and delineation of extent of contamination and to clean up the site. On July 26, 2013, the Regional Board issued an Amendment to Cleanup and Abatement Order No. R4-2011-0183. Site assessment and groundwater

monitoring are underway at the site.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

### STANDARD ENVIRONMENTAL RECORDS

#### Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

#### Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

### SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 12/12/2018 Date Data Arrived at EDR: 12/28/2018 Date Made Active in Reports: 01/11/2019

Number of Days to Update: 14

Telephone: 800-424-9346 Last EDR Contact: 12/28/2018

Next Scheduled EDR Contact: 04/29/2019 Data Release Frequency: Quarterly

#### Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 12/13/2018 Date Data Arrived at EDR: 12/28/2018 Date Made Active in Reports: 01/11/2019

#### Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

### Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018 Date Data Arrived at EDR: 03/28/2018 Date Made Active in Reports: 06/22/2018

Next Scheduled EDR Contact: 04/08/2019 Data Release Frequency: Quarterly

#### RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018 Date Data Arrived at EDR: 03/28/2018 Date Made Active in Reports: 06/22/2018

### State- and tribal - equivalent CERCLIS

**ENVIROSTOR:** EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Next Scheduled EDR Contact: 04/08/2019 Data Release Frequency: Quarterly

### ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

**DEED: Deed Restriction Listing** 

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

#### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013 Date Data Arrived at EDR: 03/21/2014 Date Made Active in Reports: 06/17/2014

Number of Days to Update: 88

Next Scheduled EDR Contact: 02/18/2019 Data Release Frequency: Quarterly

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017 Date Data Arrived at EDR: 05/08/2018 Date Made Active in Reports: 07/20/2018

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

#### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

### **EDR HIGH RISK HISTORICAL RECORDS**

#### **EDR Exclusive Records**

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

#### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

#### AHA Hospitals:

East Map: 5630795 LOS ANGELES, CA

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

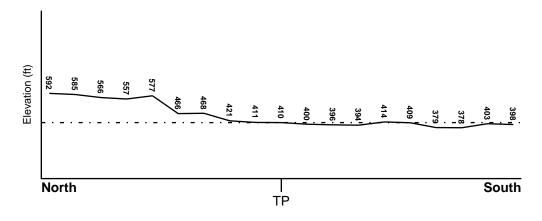

## **TOPOGRAPHIC INFORMATION**

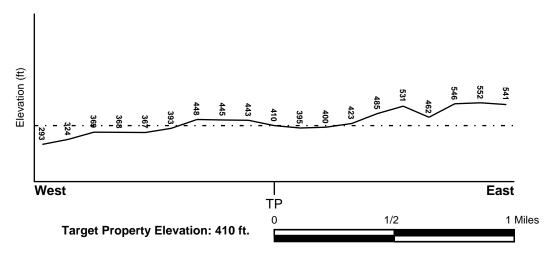

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

#### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

#### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

#### **FEMA FLOOD ZONE**

Additional Panels in search area: FEMA Source Type

06037C1628F FEMA FIRM Flood data

**NATIONAL WETLAND INVENTORY** 

NWI Quad at Target Property Data Coverage

HOLLYWOOD YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## Site-Specific Hydrogeological Data\*:

Search Radius: 1.25 miles Status: Not found

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

## **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

#### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

#### **GEOLOGIC AGE IDENTIFICATION**

Era: Cenozoic Category: Stratified Sequence

System: Tertiary Series: Miocene

Code: Tm (decoded above as Era, System & Series)

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

#### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: HAMBRIGHT

Soil Surface Texture: gravelly - loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high

water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to

water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 20 inches

Soil Layer Information									
	Boundary			Classification					
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)		
1	0 inches	7 inches	gravelly - loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 2.00 Min: 0.60	Max: 7.30 Min: 6.10		
2	7 inches	16 inches	very gravelly - loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel. COARSE-GRAINED SOILS, Gravels, Gravels with fines, Clayey Gravel.	Max: 2.00 Min: 0.60	Max: 7.30 Min: 6.10		
3	16 inches	20 inches	unweathered bedrock	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00		

## OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam

silty clay loam shaly - clay loam sandy loam clay

loamy sand clay loam

Surficial Soil Types: loam

silty clay loam shaly - clay loam sandy loam clay

loamy sand clay loam

Shallow Soil Types: silty clay

Deeper Soil Types: weathered bedrock

clay loam

## **LOCAL / REGIONAL WATER AGENCY RECORDS**

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

#### **TOPOGRAPHIC INFORMATION**

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map Source: U.S. Geological Survey

#### HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory Source: Department of Fish and Wildlife

Telephone: 916-445-0411

#### HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

#### **GEOLOGIC INFORMATION**

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

APPENDIX III: RADIUS MAP REPORT

APPENDIX IV: SUPPORTING DOCUMENTATION

#### **EXECUTIVE SUMMARY**

EFI Global, Inc. has performed a Phase I Environmental Site Assessment (Phase I) for Mr. Mike and Ms. Karri Taix (Client) for a commercial property located at 1911 Sunset Boulevard and 1980 and 2007 West Reservoir Street, in Los Angeles County, and the City of Los Angeles, California, Assessor's Parcel Numbers: 5404-001-007, 5404-001-034, 5419-003-031, and 5419-003-032. The research conducted for this study and the report prepared are in conformance with the United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) standard and the American Society for Testing and Materials (ASTM) E 1527-13 scope of work.

#### SITE DESCRIPTION

According to our research and information provided by the Client, the following addresses have been found to be associated with the subject property: 1909, 1911, 1915, 1921, 1921 ½, 1925, 1927, and 1929 Sunset Boulevard and 1928, 1930, 1932, 1934, 1936, 1938, 2008, 2010, 2011, 2011 ½, 2012, 2013, 2013 ½, 2014, 2015, 2016, 2018 West Reservoir Street, and 1301 Liberty Street, Los Angeles, California. The subject property consists of two properties located on the northeast and south sides of the Liberty Street and Reservoir Street intersection, in the City of Los Angeles. The subject property, which consists of four parcels, is approximately 1.29 total acres in size and is developed with a one-story restaurant structure and parking lot on the southern property, which is approximately 25,700 square feet in size. The building is occupied by Taix French Restaurant. The northern property consist of asphalt-paved parking area. The surrounding area is used for commercial and residential purposes. Groundwater is estimated to be less than 10 feet below ground surface in the area of the site and is assumed to flow towards the south-southwest.

 No significant hazardous material storage or recognized environmental conditions were observed at the site. Those interviewed, as persons familiar with the site were not aware of any negative environmental conditions associated with the property.

#### HISTORICAL LAND USE

According to EFI Global, Inc.'s interpretation of the historical research data, the subject property was developed with a residential structure (1921 Sunset Boulevard) on the central portion of the southern parcel in 1905. By 1906, a structure utilized as the Echo Park Methodology Sunday School (1936 Reservoir Street) occupied by the northwest corner of the southern parcel and second residential structure was constructed on the subject property (1911 Sunset Boulevard). In 1911, a four-unit residential structure (2011, 2011 ½, 2013, and 2013 ½ Reservoir Street) was constructed on the west portion of the northeastern parcel and associated garages were constructed in 1912. In 1922, a third residential structure (1928 Reservoir Street) was constructed on the northwest portion of the southern parcel. In 1923, two additional residential structures (1930 and 1938 Reservoir Street) were constructed on the southern parcel. In 1924, a commercial structure (1925, 1927, and 1929 Sunset Boulevard) was constructed on the southwest corner of the southern parcel. Tenants of this structure included Sam Lee Laundry (1939-1942), Jose Castillo Liquor Store (1951), Morries Liquors (1958), Echo Liquor Store (1962), and Taix Vin & Liqueur (1967) at 1925 Sunset Boulevard, Matlin Stationers (1951) at 1927 Sunset Boulevard, and Mike's Cafe (1951-1962) at 1929 Sunset Boulevard.

In 1929, the residential structure at 1911 Sunset Boulevard located on the easternmost portion of the southern parcel was demolished and that portion of the site was redeveloped with a restaurant structure (1911 Sunset Boulevard). Additions to the structure, including the addition of a

second-story were made in 1938, 1948, 1962, and 1963. Tenants of this structure include Botwins Café & Sierra Room (1951), Mike's Cafe (1958-1962), Wilshire Bar Association (2010), and Taix French Restaurant (1971-present).

In 1946, the residential structure at 1921 Sunset Boulevard was demolished. In 1947, a restaurant structure (1915 Sunset Boulevard) was constructed to the west of the existing restaurant structure. Between 1953 and 1954, the residential structures on the northwest corner of the southern parcel (1928, 1930, 1936, and 1938 Reservoir Street) and associated garages were demolished. In 1965, the residential structure located on the northeastern parcel was demolished. The vacant northeastern parcel was graded to be utilized for parking by 1967. In 1968, the commercial structure located on the southwest corner of the southern parcel was demolished and the restaurant structures (1911 and 1915 Sunset Boulevard) were combined and extended towards the west. A basement level was included in the addition. All other areas of the subject property were utilized for parking. The configuration of the subject property remains the same through the present.

 The earliest historical resource obtained during this investigation was a building permit from 1905 which indicated development of the subject property for residential uses. The lack of historical data sources for the subject property dating back to first developed uses represents a historical data source failure. However, it is assumed that prior to 1905, the subject property would have been developed for residential uses, if not undeveloped. Based on this notion, this limitation is not expected to significantly alter the findings of this investigation.

#### **ENVIRONMENTAL DATA SEARCH**

- Sam Lee (1925 Sunset Boulevard) The subject property is listed on the EDR Exclusive Historic Dry Cleaners (EDR US Hist Cleaners) database. According to the listing and additional research, Sam Lee operated a laundry facility on the subject property from at least 1939 to 1942. Historical research indicates this portion of the site was utilized as a liquor store by 1946 and that this structure was demolished in 1968. This portion of the subject property was redeveloped for vehicle parking by 1970. Based on the lack of evidence of chlorinated solvent usage and subsequent redevelopment of this portion of the site, the former laundry facility is not expected to represent a significant environmental concern for the subject property.
- In our opinion, none of the other sites listed on the regulatory database report pose a significant threat to the subject property as there is no indication of a release at the respective sites, a release has occurred but groundwater has not been impacted, a release has occurred but the case is closed, or the sites are located cross or down gradient of the subject property and in excess of 1/10 mile from the subject property.

The Los Angeles Regional Water Quality Control Board (LARWQCB), Department of Toxic Substances Control (DTSC), South Coast Air Quality Management District (SCAQMD), Los Angeles County Fire Department Health Hazardous Materials Division (LACFD HHMD), Los Angeles Fire Department Arson (LAFD RFI), and the City of Los Angeles Bureau of Sanitation (LABS) were contacted regarding permits, site investigation files, hazardous materials, underground storage tank, and industrial waste discharge records for the subject property. Additionally, the State Water Resources Control Board (SWRCB) GeoTracker, DTSC Hazardous Waste Tracking System (HWTS) and EnviroStor, SCAQMD Facility Information Detail (FIND), the LAFD Certified Unified Program Agency (CUPA) online databases

which include Active and Inactive Aboveground Storage Tanks (AST), Underground Storage Tanks (UST), and Hazardous Materials Inventory and UST Historical Files databases and the LACFD HHMD Active CUPA Program Records, Inactive CUPA Program Records, Site Mitigation Unit (SMU) Case Records, and California Accidental Release Program (CalARP) online databases were reviewed for information pertaining to the subject property.

- According to responses to our requests from the LARWQCB, DTSC, and LACFD HMMD, there
  are no files for the subject property. Furthermore, a review of the SWRCB GeoTracker, DTSC
  HWTS and EnviroStor, the LAFD CUPA online databases and UST Historical Files databases,
  and the LACFD HHMD Active CUPA Program Records, Inactive CUPA Program Records,
  SMU Case Records, and CalARP online databases found no records on file for the subject
  property.
- According to information available on the SCAQMD FIND online database, Les Freres Taix, Inc. at 1911 Sunset Boulevard applied for a permit to operate a charbroiler with natural gas on March 31, 1989. Permits to operate were issued in 1990 and 2000. The most recent permit issued in 2000 (permit number F26784) remains active. Based on the nature of use of the equipment for cooking purposes only, the equipment operated onsite is not expected to represent a significant environmental concern for the subject property.
- According to a response to our request from the LABS, Taix Restaurant at 1911 West Sunset
  Boulevard was issued an industrial wastewater permit on January 1, 1969 for a new or
  proposed point of discharge into the public sewer. Based on the restaurant nature of this
  facility, the wastewater produced by this facility is not expected to represent a significant
  environmental concern for the subject property.
- At the time this report was issued, no response has been received from LAFD RFI.
   Additionally, no response has been received from the SCAQMD regarding the subject
   property addresses 1911-1929 (odd) Sunset Boulevard. Should relevant information be
   obtained from these agency subsequent to issuing this report, EFI Global will prepare and
   issue an addendum to the Client.
- The Division of Oil, Gas, and Geothermal Resources (DOGGR) Online Mapping System was reviewed for information pertaining to oil and gas exploration on or nearby the subject property. No oil wells were identified within 500 feet of the subject property.
- The City of Los Angeles NavigateLA Online Mapping System was reviewed to obtain substructure maps for the subject property. According to a review of the substructure maps for the subject property, no USTs or other substructure features were identified in the area of the subject property.
- The User did not provide EFI Global any information either verbally or in writing (i.e. Title Report) regarding environmental cleanup liens or activity and use limitations encumbering the subject property. An environmental lien search was not requested by the User; however, based on our review of the DTSC EnviroStor Database, no environmental liens enforced by the DTSC were identified.

#### **ADDITIONAL ISSUES**

- Based on the age of the onsite structure, there is a potential for asbestos-containing building
  materials at the subject property; however, no testing was completed as part of this report.
  Suspect asbestos-containing materials (ACMs) were observed in the form of stucco, drywall
  partitions, carpeting, and ceramic tiles and associated mastics. All building materials
  appeared in good condition at the time of site reconnaissance. Individual suspect materials
  would need to be tested as part of an asbestos survey prior to any renovation or demolition
  in order to confirm the presence or non-presence of asbestos.
- Based on the age of the onsite structure, there is a potential for lead-based paint at the site. All painted surfaces appeared in good condition at the time of site reconnaissance.
- The potential for radon at the subject property is considered to be low.
- EFI Global, Inc. did not observe visible or olfactory indications of the presence of mold, nor did EFI Global, Inc. observe obvious indications of significant water damage. No sampling was conducted as part of this assessment.
- The City of Los Angeles Department of Building and Safety methane zone data was reviewed
  to determine if the subject property is located in a methane or methane buffer zone.
  According to the information reviewed, the subject property not located within a methane or
  methane buffer zone.

#### CONCLUSIONS

EFI Global, Inc. has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice 1527-13, at 1911 Sunset Boulevard and 1980 and 2007 West Reservoir Street, Los Angeles, California, the subject property. Any exceptions to or deletions from this practice are described in the individual sections of this report. This assessment has revealed no evidence of recognized environmental conditions or *de minimis* conditions in connection with the subject property.

## RECOGNIZED ENVIRONMENTAL CONDITIONS (REC)

In our opinion, no RECs were identified during the course of this assessment.

#### HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS (HREC)

In our opinion, no HRECs were identified during the course of this assessment.

## **CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS (CREC)**

In our opinion, no CRECs were identified during the course of this assessment.

#### **DE MINIMIS CONDITIONS**

In our opinion, no *de minimis* conditions were identified during the course of this assessment.

## **RECOMMENDATIONS**

Based on the foregoing, no additional investigation is recommended at this time.

#### 1.0 INTRODUCTION

EFI Global, Inc. has performed a Phase I Environmental Site Assessment (Phase I) for the property located at 1911 Sunset Boulevard and 1980 and 2007 West Reservoir Street, in Los Angeles County and the City of Los Angeles, California (Subject Property). This report has been prepared for the sole use of Mr. Mike and Ms. Karri Taix (Client).

The research conducted for this study and the report prepared are in general conformance with the EPA "All Appropriate Inquiries" standard and the ASTM 1527-13 "Standard Practices for Environmental Site Assessments: Phase I Environmental Site Assessment Process". The primary purpose for performing a Phase I ESA is to "...permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations (commonly known as landowner liability protections) on Comprehensive Environmental Response Compensation and Liability Act (CERCLA) liability." (ASTM, 2013) An environmental site assessment meeting or exceeding this practice and completed less than 180 days prior to the date of acquisition is presumed to be valid under this standard. In order to maintain landowner liability protections, the User also has a "continuing obligation to not interfere with activity and use limitations associated with the property," must take "reasonable steps to prevent releases" and must "comply with legal release reporting obligations." (ASTM, 2013) Further, it is the goal of this study to identify business risks related to the property associated with environmental conditions. This investigation is not an environmental compliance audit and is not designed to determine if the operations of an existing facility are in compliance with applicable environmental laws and regulations.

The goal of this process is to identify any (1) recognized environmental conditions (RECs), (2) historic recognized environmental conditions (HRECs), (3) controlled recognized environmental conditions (CRECs), and/or (4) *de minimis* conditions associated with the subject property.

- A recognized environmental condition is defined as "...the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment." This definition does not include de minimis conditions defined as "a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies" (ASTM, 2013).
- A historical recognized environmental condition is defined as "a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)." (ASTM, 2013). The HREC designation requires the comparison of residual contamination concentrations, if any, to current regulatory standards.
- A controlled recognized environmental condition is defined as "a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (for example, as evidenced by the issuance of a no further action letter or

equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls)" (ASTM, 2013).

A de minimis condition is defined as "a condition that generally does not present a threat
to human health or the environment and that generally would not be the subject of an
enforcement action if brought to the attention of appropriate governmental agencies.
Conditions determined to be de minimis conditions are not recognized environmental
conditions nor controlled recognized environmental conditions" (ASTM, 2013).

In order to identify environmental conditions at the site, the Phase I ESA includes a site inspection, interviews with parties familiar with the property, historical research into the past uses of the property, and an environmental records search with regard to the subject property, adjoining and immediately surrounding properties, and the surrounding area. In addition, EFI Global, Inc. provides an opinion regarding the potential for asbestos containing materials, lead-based paints, mold, radon, oil and gas exploration, and methane as they relate to the subject property. Reviewing those documents that are publicly available, reasonably ascertainable, and practically reviewable controls the completeness of this assessment. The inability to review documents which do not exist or are not publicly available, reasonably ascertainable, or practically reviewable may result in a data gap.

#### 1.1 Significant Assumptions

While this report provides an overview of potential environmental concerns, both past and present, the environmental assessment is limited by the availability of information at the time of the assessment. It is possible that unreported disposal of waste or illegal activities impairing the environmental status of the property may have occurred which could not be identified. The conclusions and recommendations regarding environmental conditions that are presented in this report are based on a scope of work authorized by the Client. Note, however, that virtually no scope of work, no matter how exhaustive, can identify all contaminants or all conditions above and below ground.

#### 1.2 Limitations and Exceptions

This report has been prepared in accordance with generally accepted environmental methodologies referred to in ASTM 1527-2013, and contains all of the limitations inherent in these methodologies. No other warranties, expressed or implied, are made as to the professional services provided under the terms of our contract and included in this report. The conclusions of this report are based in part, on the information provided by others. The possibility remains that unexpected environmental conditions may be encountered at the site in locations not specifically investigated. The services performed and outlined in this report were based, in part, upon visual observations of the site and attendant structures. Our opinion cannot be extended to portions of the site that were unavailable for direct observation, reasonably beyond the control of EFI Global, Inc. The objective of this report was to assess environmental conditions at the site, within the context of our contract and existing environmental regulations within the applicable jurisdiction. Evaluating compliance of past or future owners with applicable local, provincial, and federal government laws and regulations was not included in our contract for services. Our observations relating to the condition of environmental media at the site are described in this report. It should be noted that compounds or materials other than those described could be present in the site environment.

#### 1.3 Reliance

This report has been prepared for the sole use of Mr. Mike and Ms. Karri Taix. The contents should not be relied upon by any other parties without the express written consent of Mr. Mike and Ms. Karri Taix and EFI Global, Inc.

#### 1.4 User Responsibilities

The United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) and ASTM E 1527-13 Phase I Standards require that the User conduct independent research and consider certain information before purchasing a property:

- Obtain a recent (less than 180 days old) title report prepared for the subject property. The report should be reviewed to obtain information regarding environmental clean-up liens or activity and use limitations (AULs) with regard to the subject property. If environmental cleanup liens or AULs encumbering the subject property or in connection with the subject property are identified, the User should provide that information to the Environmental Professional (EFI Global, Inc.). If the User has actual knowledge of environmental cleanup liens or AULs encumbering the subject property or in connection with the subject property, the User should provide that information to the Environmental Professional (EFI Global, Inc.).
- The User should provide the Environmental Professional (EFI Global, Inc.) with any specialized knowledge the User has with regard to recognized environmental conditions in connection with the property.
- If the User is aware of any commonly known information in the community about the subject property with respect to recognized environmental conditions, the User should provide the information to the Environmental Professional (EFI Global, Inc.).
- If this Phase I ESA was prepared as due diligence for a property transaction, it is the
  responsibility of the User to consider the relationship of the purchase price to the fair
  market value of the property. If the purchase price is significantly lower than the fair market
  value, the User should identify the alternate reason for the low purchase price if the lower
  purchase price is not related to the property being affected by hazardous substances or
  petroleum products.

#### 2.0 SITE DESCRIPTION

EFI Global, Inc. has performed a Phase I for a commercial property located at 1911 Sunset Boulevard and 1980 and 2007 West Reservoir Street, in Los Angeles County and the City of Los Angeles, California . The subject property consists of two properties located on the northeast and south sides of the Liberty Street and Reservoir Street intersection, in the City of Los Angeles. The subject property, which consists of four parcels, is approximately 1.29 total acres in size and is developed with a one-story restaurant structure and parking lot on the southern property, which is approximately 25,700 square feet in size. The building is occupied by Taix French Restaurant. The northern property consist of asphalt-paved parking area. The surrounding area is used for commercial and residential purposes.

Natural gas is provided to the subject property by Southern California Gas Company. Potable water and electrical services are provided by the City of Los Angeles Department of Water and Power. Sewer services are provided by the Los Angeles Bureau of Sanitation.

#### 2.1 Current and Historical Addresses

According to our research and information provided by the Client, the following addresses have been found to be associated with the subject property: 1909, 1911, 1915, 1921, 1921  $\frac{1}{2}$ , 1925, 1927, and 1929 Sunset Boulevard and 1928, 1930, 1932, 1934, 1936, 1938, 2008, 2010, 2011, 2011  $\frac{1}{2}$ , 2012, 2013, 2013  $\frac{1}{2}$ , 2014, 2015, 2016, 2018 West Reservoir Street, and 1301 Liberty Street, Los Angeles, California

## 2.2 Legal Description

According to the Los Angeles County Assessor's Office, the subject property is located in the City of Los Angeles, and is described by the Assessor's Parcel Numbers: 5404-001-007, 5404-001-034, 5419-003-031, and 5419-003-032.

## 2.3 Physical Setting

The elevation of the subject property is approximately 415 feet above sea level (United States Geological Survey Hollywood, California 7.5 minute topographic quadrangle). Based on our review of the GeoCheck Section of the Environmental Data Resources, Inc. (EDR) Radius report, the subject property is not situated within a 100-year Federal Environmental Management Agency (FEMA) Flood Zone. No wetlands were identified at the property or adjoining/immediately surrounding properties. Based on our review of groundwater data presented in the State Water Resources Control Board (SWRCB) GeoTracker website, groundwater was detected at a leaking underground storage tank site (1340 Glendale Boulevard) approximately 0.1 mile (500 feet) north of the subject property at approximately 5 to 10 feet below ground surface. Based on regional groundwater data, regional groundwater flow direction is estimated to be towards the south-southwest; however, local groundwater flow direction may vary.

#### 3.0 SITE RECONNAISSANCE/INTERVIEWS

#### 3.1 Site Reconnaissance

On October 26, 2018, Ms. Susana Corletto, of EFI Global, Inc. conducted a site reconnaissance of the subject property. The site inspection was conducted to attempt to identify current site use(s), current hazardous materials storage, and evidence of past site uses and hazardous material storage and to identify evidence of other recognized environmental conditions. The following table summarizes our Site Reconnaissance observations:

Yes	No	Observed Feature(s)	
<b>✓</b>		Hazardous Substances and Petroleum Products Containers	
	~	Underground and/or Aboveground Storage Tanks	
✓		ains/Sumps/Clarifiers/Sewer Interceptors/Septic Systems	
	<b>✓</b>	tained or Corroded Surfaces/Stained Soil or Stressed Vegetation	
	~	Pits/Ponds/Lagoons/Wetlands	
	<b>✓</b>	lectrical Equipment with the Potential to contain Fluids	
	<b>*</b>	Production or Monitoring Wells	
	<b>*</b>	Evidence of Solid Waste Disposal/Dumping/Fill Areas	

#### 3.1.1 Exterior Observations

The exterior portions of the site consist of asphalt-paved parking areas on the northeast and southwest portions. Paved surfaces were in moderate condition with cracking typical of vehicular traffic and tree root growth. The parking areas are utilized by Taix Restaurant and a film production crew.

An attached enclosed trash area of concrete masonry unit (CMU) construction was located on the northwest side of the subject property building. This area was accessed from the inside of the structure and was utilized for storage of two garbage containers, water softener solution, approximately nine one- and five-gallon containers of paint, approximately ten 50-pounds sacks of salt, two 75-gallon grease storage bins, and miscellaneous items (mops, brooms, empty trash bins, etc.). No spills or leaks were observed in the vicinity of the paint and grease bins. No hazardous materials disposal was observed in the vicinity of the trash bins. One storm drain was observed in this portion of the site. Based on the types of materials observed (paints and grease only) and lack of evidence of spillage or improper disposal in this area, these materials are not expected to represent a significant environmental concern for the subject property. No pole or pad mounted transformers or polychlorinated biphenyls (PCB)-containing equipment were observed on-site.

No recognized environmental conditions were observed in the exterior portions of the subject property.

#### 3.1.2 Interior Observations

The subject property consists of a one-story structure that is currently occupied by Taix Restaurant. The structure is of brick construction, with slab-on-grade foundation, and a flat roof. The northwest portion of the structure is built over a basement level and the northeast portion of the structure is developed with a second-story, which is utilized for office purposes. Building

materials observed included wood and drywall partitions, smooth concrete floors, carpeting, ceramic floor and wall tiles, and stucco ceilings. The structure consisted of a kitchen and food preparation areas, offices, restroom, employee dressing room, a boiler room, a basement utilized for food/liquor/dry storage, grand dining areas, and several banquet rooms.

Several floor drains were observed in the kitchen and food preparation areas within the subject property building as well as inside the restrooms and the boiler room. No staining or hazardous materials were observed in the vicinity of the floor drains. Equipment in the boiler room appeared to be in good condition with no evidence of staining or leaking. Various cleaning solutions in retail-capacities (one-gallon or less) such as glass, steel, and oven cleaner as well as liquid detergents, sanitizers, and degreasers were stored in the basement area and in the boiler room. Several one-gallon or less containers of paint were also observed in the basement area. Based on the nature of the solutions for cleaning/maintenance purposes only, evidence of proper storage and good house keeping, and small quantities of solutions stored, these materials are not expected to represent a significant environmental concern for the subject property.

No significant hazardous material storage or recognized environmental conditions were observed in the interior portions of the subject property.

#### 3.1.3 Reconnaissance Limitations

No significant limitations were encountered during our reconnaissance of the subject property.

#### 3.2 Adjoining and Immediately Surrounding Properties

The adjoining and immediately surrounding properties (within 100-feet of the subject property boundary) were visually and physically observed from public right-of ways and the subject property in an attempt to identify recognized environmental conditions. Our observations are summarized in the following table:

Location	Address(es)	Uses/Observations
North	1342 N Alvarado Street	Vons Grocery Store
Southeast		Citibank
	1918 Sunset Boulevard	Brite Spot Diner
Southwest	2002 Sunset Boulevard	Residential
East	1901 Sunset Boulevard	Baby Blues BBQ restaurant
	1310 Liberty Street	InsideOut Church
West	1931 Sunset Boulevard	Park Sunset Professional Building
	1226 North Alvarado Street	Echo Park United Methodist Church
	2017 Reservoir Street	Residential

 The adjoining/immediately surrounding properties to the southeast, southwest, and east were listed on the regulatory database report and are further discussed in Section 5.2 below.

## 3.3 Surrounding Area Observations

## 3.3.1 Surrounding Property Uses

The surrounding area is developed with commercial and residential structures.

## 3.3.2 Surrounding Geography

The surrounding area is mostly flat with a slight topographic slope to the east-southeast. No nearby hills or bedrock outcroppings were observed in the area of the site. The Echo Park Lake is located approximately 0.2 mile (1,050 feet) south of the subject property.

#### 3.4 Interviews

#### 3.4.1 Property Owner

Mr. Mark Tarczynski, Executive Vice President of Colliers International and representative for the owner, was interviewed during the course of the site reconnaissance conducted on October 26, 2018. Mr. Tarczynski was unaware of any environmental conditions associated with the property.

## 3.4.2 Key Site Manager

Mr. Alex (last name withheld), the site manager, was interviewed during the course of the site reconnaissance conducted on October 26, 2018. According to Mr. Alex, no hazardous materials are utilized at the subject property. Mr. Alex was not aware of any environmental conditions at the subject property.

#### 3.4.3 Property Occupants

No occupants were available for interview during the completion of this report.

#### 3.4.4 Past Owners, Operators and Occupants

Past owners, operators and occupants were not able to be identified for an interview for this report.

## 3.4.5 Prospective Purchaser

As the User of this report is the owner of the property performing due diligence on the subject property in contemplation of a future sale or refinance, there is no prospective purchaser included in the transaction.

#### 3.4.6 Neighboring Property Owners/Tenants

Per ASTM, an attempt to interview neighboring property owners/tenants should be conducted when the subject property is vacant and unsecured land.

As the subject property is currently developed and utilized for dining purposes, no neighboring property owners/tenants were interviewed during this assessment.

#### 3.5 User Provided Information

The United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) and ASTM 1527-13 Phase I Standards require that the Report User conduct independent research and consider certain information before purchasing a property. EFI Global, Inc. recommends that the User documents completion of the following items:

#### 3.5.1 Lien Search

The User is required to obtain a recent (less than 180 days old) title report prepared for the

subject property. The report should be reviewed to obtain information regarding environmental clean-up liens or activity and use limitations with regard to the subject property. If environmental cleanup liens or activity and use limitations encumbering the subject property or in connection with the subject property are identified, the User should provide that information to the Environmental Professional (EFI Global, Inc.). If the User has actual knowledge of environmental cleanup liens or activity and use limitations encumbering the subject property or in connection with the subject property, the User should provide that information to the Environmental Professional (EFI Global, Inc.).

The User did not provide EFI Global any information either verbally or in writing (i.e.
Title Report) regarding environmental cleanup liens or activity and use limitations
encumbering the subject property. An environmental lien search was not requested
by the User; however, based on our review of the DTSC EnviroStor Database, no
environmental liens enforced by the DTSC were identified.

#### 3.5.2 Specialized Knowledge

The User should provide the Environmental Professional (EFI Global, Inc.) with any specialized knowledge the User has with regard to recognized environmental conditions in connection with the property.

• The User has no specialized knowledge with respect to recognized environmental conditions in connection with the property.

# 3.5.3 Commonly Known or Reasonably Ascertainable Information

If the User is aware of any commonly known information in the community about the subject property with respect to recognized environmental conditions, the User should provide the information to the Environmental Professional (EFI Global, Inc.).

• The User is not aware of any commonly known information in the community about the subject property with respect to recognized environmental conditions.

#### 3.5.4 Property Valuation

If this Phase I ESA was prepared as due diligence for a property transaction, it is the responsibility of the User to consider the relationship of the purchase price to the fair market value of the property. If the purchase price is significantly lower than the fair market value, the User should identify the alternate reason for the low purchase price if the lower purchase price is not related to the property being affected by hazardous substances or petroleum products.

 As the User of this report is the owner of the property performing due diligence on the subject property in contemplation of a future sale or refinance, there is no prospective purchaser included in the transaction.

#### 3.5.5 Purpose of Performing Phase I ESA

According to the User, the User is the owner of the property performing due diligence on the subject property in contemplation of a future sale.

## **3.6 User Provided Documents**

No documents were provided to EFI Global, Inc. by the Report User.

## 4.0 HISTORICAL LAND USE

A review of historical data derived from standard historical resources is provided in this section. The objective of consulting historical sources is to develop a history of the previous uses of the property and surrounding area, in order to help identify the likelihood of past uses having led to recognized environmental conditions in connection with the property. During our historical review, acute attention is paid to the subject property. Data relating to the adjoining and immediately surrounding properties (within 100-feet of the subject property boundary) and the surrounding area is reviewed to the extent that it is revealed in the course of researching the property itself.

#### 4.1 Aerial Photography Review

Aerial Photography of many portions of the United States dates back to the 1920's. Items searched for in each photograph included, but were not limited to: evidence of tanks, gas stations, industrial site usage, water drainage pathways, areas which show evidence of drums or excessive debris, discolored or stained soils, areas of distressed vegetation, et cetera.

Aerial Photograph Coverage was available from EDR for the years: 1928, 1938, 1948, 1952, 1964, 1972, 1981, 1989, 1994, 2005, 2009, 2010, and 2012. A summary of our observations is presented in the following table.

Year	Subject Property	Notable Adjoining Property Observations	Notable Observations of the Surrounding Area
	The southern parcels appear to be developed with structures in the center and northwest portions and with vacant land throughout the remainder of the parcels.  The northeastern parcels appear to be developed with a residential structure on the west portion.	Residential South: Commercial East:	The surrounding properties appear to be residential and commercial.

Year	Subject Property	Notable Adjoining Property Observations	Notable Observations of the Surrounding Area
1938	The southern parcels appear to be developed with two commercial structures and an auto parking area on the southern portion and three residential structures on the northwest corner. The northeastern parcels appear to be developed with a residential structure on the west portion.	North: Residential South: Commercial and gasoline station East: Commercial and gasoline station West: Residential and commercial	The surrounding properties appear to be residential and commercial.
1948 and 1952	The southern parcels appear to be developed with three commercial structures and an auto parking area on the southern portion and three residential structures on the northwest corner. The northeastern parcels appear to be developed with a residential structure on the west portion.	North: Residential South: Commercial and gasoline station East: Commercial and gasoline station West: Residential and commercial	The surrounding properties appear to be residential and commercial.
1964	The southern parcels appear to be developed with one commercial structure on the southwest corner, one commercial structure on the southeast corner, and auto parking areas on the remaining portions.  The northeastern parcels appear to be developed with a residential structure on the west portion.	North: Commercial South: Commercial East: Commercial West: Residential and commercial	The surrounding properties appear to be residential and commercial.

Year	Subject Property	Notable Adjoining Property Observations	Notable Observations of the Surrounding Area
2005, 2009, 2010, and 2012	with one commercial structure on the southeast corner and auto parking areas on the remaining portions. The northeastern parcels appear to be utilized as auto parking.	Commercial South: Commercial East:	The surrounding properties appear to be residential and commercial.

## **4.2 Building Department Records Review**

The addresses identified as current and historical addresses for the subject property were researched at the City of Los Angeles Department of Building and Safety. Items considered in the course of the building permit review are previous site usage, previous ownership, and the construction or demolition of any structures that may have had a negative environmental impact on the property. The following table summarizes relevant building permits obtained and reviewed:

1911 Sunset Boulevard			
Date	Owner/Occupant	Purpose	
07/28/1906	Chas H. Roberts	Construct a private residence with eight rooms	
04/07/1920	Lillian Gelbert	Addition of room to a residence	
12/26/1925	Mrs. Spaulding	Alterations to a residence	
03/11/1929	Wherberg Mead	Demolish residence

• The remaining permits obtained and reviewed were for minor tenant improvements, sign permits, or other permits which are not significant and did not contain information about the historical site use or the potential for recognized environmental conditions.

## **4.3 City Directory Review**

City directories have been published since the 1800's and provide detailed occupant information for the property and its surrounding area at five-year intervals. The purpose of the City Directory research is to attempt to determine the businesses that historically occupied the subject property. Historical City Directories provided by EDR and reviewed by EFI Global, Inc. are listed below.

1911 Sunset Boulevard		
Date	Listing	
1951	Botwins Café & Sierra Room	
1958 and 1962	Mike's Café	
1971, 1976, 1981, 1986, and 1990	Les Freres Taix French Restaurant	
1991, 2000, 2006, and 2014	Taix French Restaurant	
2010	Taix French Restaurant and Wilshire Bar Association	

1925 Sunset Boulevard		
Date	Listing	
1951	Jose Castillo liquor store	
1958	Morries Liquors	
1962	Echo Liquor Store	
1967, 1971, and 1976	Taix Vin & Liqueur	

1927 Sunset Boulevard	
Date	Listing
1951	Matlin Stationers

1929 Sunset Boulevard	
Date	Listing
1951, 1958, and 1962	Mike's Café
2000	Leo Hammerschmit

1928 Reservoir Street	
Date	Listing
1929 and 1933	Residential

1930 Reservoir Street	
Date	Listing
1924, 1929, and 1933	Residential

1936 Reservoir Street	
Date	Listing
1924 and 1929	Residential

1938 Reservoir Street	
Date	Listing
1929	Residential

2008 Reservoir Street	
Date	Listing
1937 and 1951	Residential

2010 Reservoir Street	
Date	Listing
1937, 1942, and 2000	Residential

2011 Reservoir Street			
Date		Listing	
1924, 1929, 1933, 1937, 1942, 1951, 1958, and 1962	Residential		

2013 Reservoir Street			
Date	Listing		
1924, 1929, 1933,	Residential		
1937, 1942, 1951,			
1958, and 1962			

2016 Reservoir Street			
Date Listing			
1937	Residential		

2018 Reservoir Street			
Date Listing			
1937	Residential		

Listings for adjoining and immediately surrounding properties reviewed during the course of researching the subject property did not reveal any uses of concern.

#### 4.4 Sanborn Map Review

Originally compiled by the Sanborn Map Company of Pelham, New York for fire insurance companies to assess fire risks related to building materials and hazardous materials storage, today Sanborn Maps are an invaluable tool for Environmental Professionals in determining historical site use and the potential for environmental conditions. Sanborn Map Coverage is available from as early as 1867 in some cities. Although Sanborn maps were created for approximately twelve thousand cities and towns in the United States, Canada, and Mexico, Sanborn Map Coverage is not available in newer and more rural communities. Sanborn Map Coverage was available from EDR for the years: 1906, 1919, 1950, 1953, 1954, 1957, 1960, 1961, 1964, 1965, 1966, 1968, 1969, and 1970. A summary of our observations is presented in the following table.

Year	Subject Property	Notable Adjoining Property Observations	Notable Observations of the Surrounding Area
1906	The southern parcels are depicted with Echo Park Sunday School on the northwest corner and two residential structures and an associated structure on the center portion. The remaining portions are depicted as undeveloped/ vacant land. The northeastern parcels are not depicted.	South: Residential and undeveloped/	The surrounding area is depicted with undeveloped/vacant lots and residential structures.

Year	Subject Property	Notable Adjoining Property Observations	Notable Observations of the Surrounding Area
1919	The southern parcels are not depicted. The northeastern parcels are depicted with a two-story residential structure with four flats and associated garage, toilet, and shed on the northwest and west portions. The remaining portions are depicted as undeveloped/vacant land.	North: Residential South: Not depicted East: Undeveloped/ vacant land West: Undeveloped/ vacant land	The surrounding area is depicted with undeveloped/vacant lots and residential structures.
1950 and 1953	The southern parcels are depicted with two restaurants on the eastern portion, auto parking on the center portion, a commercial building with two stores and a restaurant on the southwest corner, and four single-family residential structures with two associated auto garages on the northwest corner.  The northeastern parcels are depicted with a two-story residential structure with four flats and associated garage, toilet, and shed on the northwest and west portions. The remaining portions are depicted as undeveloped/vacant land.	commercial, and machine shop (1151-1153 Glendale Boulevard)	The surrounding area is depicted with commercial and residential structures.

Year	Subject Property	Notable Adjoining Property Observations	Notable Observations of the Surrounding Area
1954	The southern parcels are depicted with two restaurants on the eastern portion, auto parking on the center and northwest portions, and a commercial building with two stores and a restaurant on the southwest corner.  The northeastern parcels are not depicted.	North: Not depicted South: Gasoline station (1920 Sunset Boulevard), restaurant, commercial, and vacant light industrial East: Auto repair (1901 1/2 Sunset Boulevard) West: Residential, Echo Park Methodist Church, and furniture store	The surrounding area is depicted with commercial and residential structures.
1957 and 1960	The southern parcels are depicted with two restaurants on the eastern portion, auto parking on the center and northwest portions, and a commercial building with two stores and a restaurant on the southwest corner.  The northeastern parcels are depicted with a two-story residential structure with four flats and associated garage, toilet, and shed on the northwest and west portions. The remaining portions are depicted as undeveloped/vacant land.	North: Residential South: Gasoline station (1920 Sunset Boulevard), restaurant, commercial, and woodworking facility; Woodworking facility converted to machine shop by 1960 East: Auto repair (1901 1/2 Sunset Boulevard) and Alvarado Church of Christ West: Residential, Echo Park Methodist Church, and furniture store; Furniture store converted to offices by 1960	The surrounding area is depicted with commercial and residential structures.

Year	Subject Property	Notable Adjoining Property Observations	Notable Observations of the Surrounding Area
1961	The southern parcels are not depicted. The northeastern parcels are depicted with a two-story residential structure with four flats and associated garage, toilet, and shed on the northwest and west portion. The remaining portions are depicted as undeveloped/vacant land.	North: Residential South: Not depicted East: Alvarado Church of Christ West: Residential	The surrounding area is depicted with commercial and residential structures.
1964 and 1965	The southern parcels are depicted with two restaurants on the eastern portion, auto parking on the center and northwest portions, and a commercial building with two stores and a restaurant on the southwest corner.  The northeastern parcels are not depicted.	North: Not depicted South: Restaurant, commercial, and machine shop; Restaurant and commercial by 1965 East: Auto repair (1901 1/2 Sunset Boulevard) West: Residential, Echo Park Methodist Church, and offices	The surrounding area is depicted with commercial and residential structures.
1966	The southern parcels are not depicted. The northeastern parcels are depicted with a two-story residential structure with four flats on the west portion. The remaining portions are depicted as undeveloped/vacant land.	North: Commercial South: Not depicted East: Alvarado Church of Christ West: Residential	The surrounding area is depicted with commercial and residential structures.
1968	The southern parcels are depicted with one restaurant (previously two separate restaurant structures) on the eastern portion, auto parking on the center and northwest portions, and a commercial building with two stores and a restaurant on the southwest corner.  The northeastern parcels are depicted as auto parking.	North: Commercial South: Restaurant and commercial East: Auto repair (1901 1/2 Sunset Boulevard) and Golden West Christian Christ Church West: Residential, Echo Park Methodist Church, and offices	The surrounding area is depicted with commercial and residential structures.

Year	Subject Property	Notable Adjoining Property Observations	Notable Observations of the Surrounding Area
1969	The southern parcels are not depicted. The northeastern parcels are depicted as auto parking.	North: Commercial South: Not depicted East: Golden West Christian Christ Church West: Residential	The surrounding area is depicted with commercial and residential structures.
1970	The southern parcels are depicted with one larger restaurant structure extended towards the west and auto parking on the remaining portions. The northeastern parcels are depicted as auto parking.	North: Commercial South: Restaurant and commercial East: Auto repair (1901 1/2 Sunset Boulevard) and Golden West Christian Christ Church West: Residential, Echo Park Methodist Church, and offices	The surrounding area is depicted with commercial and residential structures.

- Sanborn maps indicate that the adjoining property to the east (1901 Sunset Boulevard) was developed with a gasoline station in at least 1950 and an auto repair facility from at least 1950 to 1970. For further discussion on this property, refer to Section 5.2.
- Sanborn maps indicate that the adjacent property to the south (1901 Sunset Boulevard) was developed with a gasoline station from at least 1950 to 1960. For further discussion on this property, refer to Section 5.2.
- Sanborn maps indicate that the adjacent property to the south (1151 and 1153 Glendale Boulevard) was developed with a machine shop in at least 1950 to 1953 and 1960 to 1964. Machine shops typically use small amounts of oil-based lubricants, compressed air, water-based coolants, and hydraulic fluid. Based on the relative distance across Sunset Boulevard (100 feet), down-gradient location with regard to the subject property, and subsequent redevelopment of the property, this former machine shop is not expected to represent a significant environmental concern for the subject property.

## 4.5 Historical Summary

## 4.5.1 Subject Property

According to EFI Global, Inc.'s interpretation of the historical research data, the subject property was developed with a residential structure (1921 Sunset Boulevard) on the central portion of the southern parcel in 1905. By 1906, a structure utilized as the Echo Park Methodology Sunday School (1936 Reservoir Street) occupied by the northwest corner of the southern parcel and second residential structure was constructed on the subject property (1911 Sunset Boulevard). In 1911, a four-unit residential structure (2011, 2011 ½, 2013, and 2013 ½ Reservoir Street) was constructed on the west portion of the northeastern parcel and associated garages were

constructed in 1912. In 1922, a third residential structure (1928 Reservoir Street) was constructed on the northwest portion of the southern parcel. In 1923, two additional residential structures (1930 and 1938 Reservoir Street) were constructed on the southern parcel. In 1924, a commercial structure (1925, 1927, and 1929 Sunset Boulevard) was constructed on the southwest corner of the southern parcel. Tenants of this structure included Sam Lee Laundry (1939-1942), Jose Castillo Liquor Store (1951), Morries Liquors (1958), Echo Liquor Store (1962), and Taix Vin & Liqueur (1967) at 1925 Sunset Boulevard, Matlin Stationers (1951) at 1927 Sunset Boulevard, and Mike's Cafe (1951-1962) at 1929 Sunset Boulevard.

In 1929, the residential structure at 1911 Sunset Boulevard located on the easternmost portion of the southern parcel was demolished and that portion of the site was redeveloped with a restaurant structure (1911 Sunset Boulevard). Additions to the structure, including the addition of a second-story were made in 1938, 1948, 1962, and 1963. Tenants of this structure include Botwins Café & Sierra Room (1951), Mike's Cafe (1958-1962), Wilshire Bar Association (2010), and Taix French Restaurant (1971-present).

In 1946, the residential structure at 1921 Sunset Boulevard was demolished. In 1947, a restaurant structure (1915 Sunset Boulevard) was constructed to the west of the existing restaurant structure. Between 1953 and 1954, the residential structures on the northwest corner of the southern parcel (1928, 1930, 1936, and 1938 Reservoir Street) and associated garages were demolished. In 1965, the residential structure located on the northeastern parcel was demolished. The vacant northeastern parcel was graded to be utilized for parking by 1967. In 1968, the commercial structure located on the southwest corner of the southern parcel was demolished and the restaurant structures (1911 and 1915 Sunset Boulevard) were combined and extended towards the west. A basement level was included in the addition. All other areas of the subject property were utilized for parking. The configuration of the subject property remains the same through the present.

## 4.6 Historical Data Gaps

The earliest historical resource obtained during this investigation was a building permit from 1905 which indicated development of the subject property for residential uses. The lack of historical data sources for the subject property dating back to first developed uses represents a historical data source failure. However, it is assumed that prior to 1905, the subject property would have been developed for residential uses, if not undeveloped. Based on this notion, this limitation is not expected to significantly alter the findings of this investigation.

#### 5.0 REGULATORY DATABASE REPORT

A radial database search was conducted in accordance with the specifications defined in ASTM E 1527-13 which sets the radial search distances for each regulatory database. The radial database search was conducted by EDR on October 19, 2018. A copy of the database report is presented in Appendix II of this report. The following table summarizes required databases reviewed, the approximate search distances, and indicates if the subject site, adjoining/immediately surrounding properties or surrounding sites are listed on the respective database.

Following the table are summaries of the information found in the relevant database listings and our opinion regarding the potential for the subject property to be impacted. Our opinion is based on the information found in the database listings, through other historical and regulatory resources, "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" (ASTM E2600-15), and assumed groundwater flow direction. As discussed in Section 2.3, groundwater is estimated to be approximately 5 to 10 feet below ground surface in the area of the site and is assumed to flow towards the south-southwest.

DATABASE	Search Distance (Miles)	Site	Adjacent Site (Yes/No)	Listings
Federal National Priorities List (NPL)	1.0	No	No	0
Federal De-listed NPL	1.0	No	No	0
Federal CERCLIS	0.5	No	No	0
Federal CERCLIS NFRAP	0.5	No	No	0
Federal RCRA CORRACTS	1.0	No	No	0
Federal RCRA non-CORRACTS TSD	0.5	No	No	0
Federal RCRA Generators	0.25	No	No	12
Federal Institutional/Engineering Controls	0.5	No	No	0
Federal ERNS	Property	No	No	0
State/Tribal Equivalent NPL	1.0	No	No	0
State/Tribal Equivalent CERCLIS	1.0	No	No	9
State/Tribal Landfill	0.5	No	No	1
State/Tribal Underground Storage Tank (UST)	0.25	No	No	33
State/Tribal Leaking Underground Storage Tank (LUST/SLIC)	0.5	No	No	21
State/Tribal Institutional/Engineering Controls	0.5	No	No	0
State/Tribal Voluntary Clean-up Sites	0.5	No	No	2
State/Tribal Brownfield Sites	0.5	No	No	1

## **5.1 Subject Property**

**Sam Lee (1925 Sunset Boulevard)** - The subject property is listed on the EDR Exclusive Historic Dry Cleaners (EDR US Hist Cleaners) database. According to the listing and additional research, Sam Lee operated a laundry facility on the subject property from at least 1939 to 1942. Historical research indicates this portion of the site was utilized as a liquor store by 1946 and that this structure was demolished in 1968. This portion of the subject property was redeveloped for vehicle parking by 1970. Based on the lack of evidence of chlorinated solvent usage and subsequent redevelopment

of this portion of the site, the former laundry facility is not expected to represent a significant environmental concern for the subject property.

## **5.2 Adjoining and Immediately Surrounding Properties**

**C.R. Perkins/W.C. Barnett (1901 Sunset Boulevard)** - The east adjoining property (hydrologically cross-gradient) is listed on the EDR Exclusive Historical Auto (EDR Hist Auto) database. According to the listing and historical resources (aerials and Sanborn maps), this property was occupied by a gasoline station from at least 1937 to 1950. This property was also occupied by an auto repair facility from at least 1950 to 1970. Although hazardous substances and petroleum products were likely associated with the former auto repair operations and gasoline station conducted on the subject property, there is no evidence of a documented release. Based on the cross-gradient with regard to the subject property, lack of evidence of a documented release, and subsequent redevelopment to a restaurant establishment, the former facilities are not expected to represent a significant environmental concern for the subject property.

**Jack McKinstry (2005 Sunset Boulevard)** - The southwest adjoining property (hydrologically down-gradient) is listed on the EDR Hist Auto database. According to the listing, Jack McKinstry operated an automobile repairing facility at the property in 1933. Based on the down-gradient location with regard to the subject property and lack of evidence of a documented release, this former facility is not expected to represent a significant environmental concern for the subject property.

**W.R. Dolbier/R.A. Olivas/O.M. Cox (1920 Sunset Boulevard)** - The adjacent property located approximately 100 feet south of the subject property (hydrologically down-gradient) across Sunset Boulevard is listed on the EDR Hist Auto Database. According to the listing and historical resources (aerials and Sanborn maps), the property was occupied by a gasoline station from at least 1933 to 1960. Based on the down-gradient with regard to the subject property, relative distance across Sunset Boulevard (in excess of 100 feet), lack of evidence of a documented release, and subsequent redevelopment of the property, the former gasoline station is not expected to represent a significant environmental concern for the subject property.

**Arco Del Triunfo (2002 Sunset Boulevard)** - The adjacent property located approximately 120 feet south-southwest of the subject property (hydrologically down-gradient) across Sunset Boulevard is listed on the EDR Hist Auto Database. According to the listing, the property was occupied by a gasoline station from at least 2013 and 2014. Historical resources (aerials and Sanborn maps) and additional research indicate that this property has been occupied by a residential structure since sometime prior to 1950 through the present. Therefore, this listing is considered to be erroneous.

No other adjoining/immediately surrounding properties (within 100-feet) were listed on any of the regulatory databases researched or the listings were not associated with the storage or disposal of hazardous wastes including aboveground or underground storage tanks, did not indicate a known chemical release, and did not indicate a property use where the use of hazardous chemicals would be expected.

## **5.3 Surrounding Area**

In our opinion, none of the other sites listed on the regulatory database report pose a significant threat to the subject property as there is no indication of a release at the respective sites, a release has occurred but groundwater has not been impacted, a release has occurred but the case is closed, or the sites are located cross or down gradient of the subject property and in excess of 1/10 mile from

the subject property.

## 5.4 Orphan Sites

Orphan sites are unmappable sites which appear in a list form in the Radius Map Report rather than on the standard Radius Map. Two orphan sites were identified in the Radius Map Report prepared for this site. The sites were manually mapped to determine the location of the site relative to the subject property and groundwater gradient. The following conclusions were made:

In our opinion, none of the orphan sites listed pose a significant threat to the subject property as there is no indication of a release at the respective sites, a release has occurred but groundwater has not been impacted, a release has occurred but the case is closed, or the sites are located cross or down gradient of the subject property and in excess of 1/10 mile from the subject property.

#### **6.0 AGENCY FILE REVIEWS**

#### **6.1 State Agencies**

The Los Angeles Regional Water Quality Control Board (LARWQCB), Department of Toxic Substances Control (DTSC), and South Coast Air Quality Management District (SCAQMD) were contacted regarding permits and site investigation files for the subject property. Additionally, the State Water Resources Control Board (SWRCB) GeoTracker, DTSC Hazardous Waste Tracking System (HWTS) and EnviroStor, and SCAQMD Facility Information Detail (FIND) databases were reviewed for information pertaining to the subject property.

- According to responses to our requests from the LARWQCB and DTSC, there are no files for the subject property. Furthermore, a review of the SWRCB GeoTracker and DTSC HWTS and EnviroStor online databases found no records on file for the subject property.
- According to information available on the SCAQMD FIND online database, Les Freres Taix, Inc. at 1911 Sunset Boulevard applied for a permit to operate a charbroiler with natural gas on March 31, 1989. Permits to operate were issued in 1990 and 2000. The most recent permit issued in 2000 (permit number F26784) remains active. Based on the nature of use of the equipment for cooking purposes only, the equipment operated onsite is not expected to represent a significant environmental concern for the subject property.

The Division of Oil, Gas, and Geothermal Resources (DOGGR) Online Mapping System was reviewed for information pertaining to oil and gas exploration on or nearby the subject property.

• No oil wells were identified within 500 feet of the subject property.

## **6.2 City/County Agencies**

The Los Angeles County Fire Department Health Hazardous Materials Division (LACFD HHMD), Los Angeles Fire Department Arson (LAFD RFI), and the City of Los Angeles Bureau of Sanitation (LABS) were contacted regarding hazardous materials, underground storage tank, and industrial waste discharge records for the subject property. In addition, the LAFD Certified Unified Program Agency (CUPA) online databases which include Active and Inactive Aboveground Storage Tanks (AST), Underground Storage Tanks (UST), and Hazardous Materials Inventory and UST Historical Files databases and the LACFD HHMD Active CUPA Program Records, Inactive CUPA Program Records, Site Mitigation Unit (SMU) Case Records, and California Accidental Release Program (CalARP) databases were reviewed for additional information pertaining to the subject property.

- According to a response to our requests from the LACFD HHMD and a review of the aforementioned online databases, there are no files for the subject property.
- According to a response to our request from the LABS, Taix Restaurant at 1911 West Sunset
  Boulevard was issued an industrial wastewater permit on January 1, 1969 for a new or
  proposed point of discharge into the public sewer. Based on the restaurant nature of this
  facility, the wastewater produced by this facility is not expected to represent a significant
  environmental concern for the subject property.

The City of Los Angeles NavigateLA Online Mapping System was reviewed to obtain substructure maps for the subject property.

• According to a review of the substructure maps for the subject property, no USTs or other substructure features were identified in the area of the subject property.

## **6.3 Agency File Review Limitations**

At the time this report was issued, no response has been received from LAFD RFI. Additionally, no response has been received from the SCAQMD regarding the subject property addresses 1911-1929 (odd) Sunset Boulevard. Should relevant information be obtained from these agency subsequent to issuing this report, EFI Global will prepare and issue an addendum to the Client.

# 7.0 NON-SCOPE ENVIRONMENTAL RISKS

ASTM Standard E1527-13 identifies additional conditions which, should they exist at the subject property, may create a human health risk to the occupants of the site. These risks may also create additional costs to the property owner in the form of identification, operations & maintenance, and cleanup or remediation.

# 7.1 Asbestos Containing Building Materials

Asbestos is a group of naturally occurring minerals used in many products, including building materials vehicle brakes, insulation and other products that require resistance to heat and corrosion. Asbestos includes: chrysotile, amosite, crocidolite, tremolite asbestos, anthophyllite asbestos, actinolite asbestos, and any of these materials that have been chemically treated and/or altered.

The inhalation of asbestos fibers by workers can cause cancer and other serious diseases of the lungs and other organs that may not appear until years after the exposure has occurred. For instance, asbestosis can cause a buildup of scar-like tissue in the lungs and result in loss of lung function. Asbestos fibers associated with these health risks are too small to be seen with the naked eye, and smokers are at higher risk of developing some asbestos-related diseases.

Asbestos-containing materials (ACM) do not always pose a hazard to occupants and workers in buildings that contain these materials. Intact, undisturbed ACMs generally do not pose a health risk. ACMs may become hazardous and pose an inhalation risk when they are damaged, disturbed in some manner, or deteriorate over time and asbestos fibers are released into building air.

ACM can be found in a multitude of building products which include decorative and acoustical plaster texture, fire-proofing (Monokote), joint compound, attic and wall insulation, resilient floor covering, mastic, recessed lighting fixtures, wiring, elevator brakes, fire doors, pipe insulation, pipe gaskets, duct insulation, duct tape, siding and roofing materials (tar/shingles), textured paint, stucco, concrete, asphalt underlayment (Petromat) and plaster.

Local jurisdictions have specific laws and regulations regarding asbestos and actions including building renovations and building demolition.

Based on the age of the onsite structure, there is a potential for asbestos-containing building
materials at the subject property; however, no testing was completed as part of this report.
Suspect asbestos-containing materials (ACMs) were observed in the form of stucco, drywall
partitions, carpeting, and ceramic tiles and associated mastics. All building materials
appeared in good condition at the time of site reconnaissance. Individual suspect materials
would need to be tested as part of an asbestos survey prior to any renovation or demolition
in order to confirm the presence or non-presence of asbestos.

#### 7.2 Lead-Based Paint

Although the use of lead-based paint in residential structures has been prohibited since 1978, it may still be used in commercial and industrial buildings. It is approximated that 80 percent of buildings built prior to 1978 contain lead paint. Even at low levels, lead poisoning can cause IQ deficiencies, reading and learning disabilities, impaired hearing, reduced attention spans, hyperactivity and other behavior problems with children under 6 years old being most at risk.

Lead is a highly toxic metal that was used for many years in products found in and around our homes and commercial buildings. Lead can be found in dust from friction surfaces of windows and doors

that are painted with lead-based paint and from building components coated with lead-based paint that has begun peeling, flaking and chalking. There is also the potential for soil to have elevated lead levels due to leaching from lead based paint on nearby structures and deposition of airborne lead when leaded fuel was in use prior to the 1976 ban and phase out.

Since the 1980's, lead has been phased out in gasoline, reduced in drinking water, reduced in industrial air pollution, and banned or has been limited in use in consumer products.

Between the local, State and Federal agencies, including the Environmental Protection Agency (EPA), Department of Housing and Urban Development (HUD), Occupational Safety & Health Administration (OSHA) and the California Department of Public Health (CDPH), each state has various action limits that have been enacted with the intent to prevent human exposure and contamination of the surrounding environment.

• Based on the age of the onsite structure, there is a potential for lead-based paint at the site. All painted surfaces appeared in good condition at the time of site reconnaissance.

#### 7.3 Radon

Radon is a radioactive gas that has been found in structures all over the United States. Radon is produced from the natural breakdown of uranium in soil, rock, and water. Radon typically moves up through the ground and into structures through cracks and other holes in the foundation. Movement of radon through the earth is strongly influenced by moisture content and permeability of soil, porosity, and degree of fracturing in rocks, as well as surface meteorological conditions. High levels of radon have been discovered in every state.

Radon cannot be seen, smelled, or tasted. Breathing air-containing radon may increase the risk of getting lung cancer. The Surgeon General of the United States has warned that radon is the second leading cause of lung cancer in the United States today after smoking.

Testing for the presence of radon is fairly inexpensive, simple and is the only way to be certain of the on-site concentrations. Various types of sampling methods exist to determine the concentration. On-site radon sampling was not performed during the completion of this assessment.

• Based on our research at the United States Environmental Protection Agency (USEPA), the average radon concentrations for Los Angeles County are between 2.0 picocuries per liter (pCi/L) and 4.0 pCi/L, below the 4.0 pCi/L action level set by the USEPA. However, according to the California Geological Survey Radon Potential Radon Zone Map for Southern California, dated January 2005, shows no concentrations of radon in the vicinity of the subject property. Site specific radon levels vary greatly within the EPA radon zones and on-site radon measurements would need to be collected in order to determine the radon levels at the subject property.

### 7.4 Wetlands

According to the Clean Water Act, a wetland is "those areas that are inundated or saturated by surface or groundwater at a frequency and duration sufficient to support, and that under normal circumstances do support, a prevalence of vegetation typically adapted for life in saturated soil conditions." Wetland areas have been identified as ecologically diverse and sensitive areas and are generally subject to more stringent development, re-development, and building regulations.

• The U.S. Fish and Wildlife Service (USFWS) National Wetlands Inventory was reviewed to determine if the subject property is situated within an identified wetland. According to the USFWS, the subject property is not located within a wetland area.

# **7.5 Mold**

Mold and mildew are simple, microscopic organisms in the Fungi kingdom that can grow virtually anywhere if they have adequate moisture, nutrients, air and appropriate temperatures. Depending on the particular mold or fungus, growing colonies can be almost any color. Most household molds and fungi (mildews) are white, black, grey, or brown colored. Spores of dozens of kinds of mold and fungus (mildew) are present at all times in indoor and outdoor air. These spores can settle, germinate and grow wherever good growth conditions are found. They can grow on soil, plants, dead plant materials, foods, fabrics, paper, wood and many other materials found within buildings. Many molds are not harmful and actually have a beneficial role in the environment and in living systems. In soil, molds play a crucial part in decomposition of organic matter and in making nutrients available to plants.

When mold and fungi (mildews) growth occurs in buildings, it can be very destructive to the materials on which they grow and cause high levels of airborne mold spores and volatile organic compounds associated with the characteristic musty / moldy odor. They cause staining, decomposition (rotting of materials) and objectionable, musty odors. Where colonies are extensive they can also produce enough spores, and by-products to be harmful to health. Many of the by-products of mold and fungus (mildew) are irritating to skin, eyes and respiratory tracts. Some molds produce true allergic sensitization and allergic reactions in susceptible people. Some molds produce toxic by-products that could be harmful to skin, and poisonous if ingested or inhaled in quantity. Persons with compromised immune systems may even experience systemic fungal infections of the respiratory tract.

EFI Global, Inc. observed a limited amount of interior areas of the subject building in order to identify the significant, visible presence of mold. This activity was not intended to discover all areas which may be affected by mold growth at the subject property. Potential areas of mold not observed as part of this limited assessment, include but are not limited to, pipe chases, HVAC systems and within enclosed wall and ceiling cavities that may be present in the subject property. A complete mold assessment, which may include various types of sampling, would be required to determine if mold levels within the subject building are at levels acceptable by industry standards.

• EFI Global, Inc. did not observe visible or olfactory indications of the presence of mold, nor did EFI Global, Inc. observe obvious indications of significant water damage. No sampling was conducted as part of this assessment.

# 7.6 Methane Gas

In response to growing concern regarding methane intrusion into buildings and to the potential for methane build-up underneath buildings, certain municipalities have established methane requirements for structures based on the proximity to oil wells and landfills. If a subject property is located in the proximity of active or abandoned oil wells or landfills, methane mitigation devices installed prior to construction activities at a subject property may be necessary.

The City of Los Angeles Department of Building and Safety methane zone data was reviewed
to determine if the subject property is located in a methane or methane buffer zone.
 According to the information reviewed, the subject property not located within a methane or

methane buffer zone.

# 8.0 FINDINGS

EFI Global, Inc. has performed a Phase I Environmental Site Assessment (Phase I) for Mr. Mike and Ms. Karri Taix (Client) for a commercial property located at 1911 Sunset Boulevard and 1980 and 2007 West Reservoir Street, in Los Angeles County and the City of Los Angeles, California, Assessor's Parcel Numbers: 5404-001-007, 5404-001-034, 5419-003-031, and 5419-003-032. The research conducted for this study and the report prepared are in conformance with the United States Environmental Protection Agency (USEPA) All Appropriate Inquiry (AAI) standard and the American Society for Testing and Materials (ASTM) E 1527-13 scope of work.

#### 8.1 CONCLUSIONS

EFI Global, Inc. has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice 1527-13, at 1911 Sunset Boulevard and 1980 and 2007 West Reservoir Street, Los Angeles, California, the subject property. Any exceptions to or deletions from this practice are described in the individual sections of this report. This assessment has revealed no evidence of recognized environmental conditions or *de minimis* conditions in connection with the subject property.

# **Recognized Environmental Condition (REC)**

In our opinion, no RECs were identified during the course of this assessment.

# **Historical Recognized Environmental Condition (HREC)**

In our opinion, no HRECs were identified during the course of this assessment.

# **Controlled Recognized Environmental Condition (CREC)**

In our opinion, no CRECs were identified during the course of this assessment.

### **De Minimis Condition**

In our opinion, no *de minimis* conditions were identified during the course of this assessment.

#### 8.2 RECOMMENDATIONS

Based on the foregoing, no additional investigation is recommended at this time.

# 9.0 SIGNATURES

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Prepared By: Date: November 7, 2018

Susana Corletto **Project Manager** 

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of 40 CFR 312. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

# **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

# STANDARD ENVIRONMENTAL RECORDS

# Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 3 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/01/2018 has revealed that there are 8 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/01/2018 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

## State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 07/30/2018 has revealed that there are 9 ENVIROSTOR sites within approximately 1 mile of the target property.

# Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 9 SWEEPS UST sites within approximately 0.25 miles of the target property.

### **EDR HIGH RISK HISTORICAL RECORDS**

# **EDR Exclusive Records**

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 16 EDR Hist Auto sites within approximately 0.125 miles of the target property.

FINDS:

Registry ID: 110009543075

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FINDS:

Registry ID: 110006474314

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

File Location: Regional Board

Potential Media Affected: Aquifer used for drinking water supply, Soil, Soil Vapor Potential Contaminants of Concern: Other Chlorinated Hydrocarbons, Tetrachloroethylene (PCE),

Trichloroethylene (TCE)

Site History: The site is a three-story building constructed in approximately 1915.

Hollyway Cleaners began operating in one of the units of the building in approximately 1941 and has been in operation under successive owners since then. Site investigation conducted in 1988 for property transaction indicated that the soil and groundwater beneath the site were contaminated with perchloroethylene (PCE), trichlorothene (TCE) and other volatile organic compounds (VOCs) as a result of release(s) from dry cleaning operations. Subsequent subsurface investigations involving soil vapor survey, soil and groundwater sampling and installation of groundwater monitoring wells confirmed the contamination of the soil, soil vapor and groundwater beneath the site. Groundwater monitoring began in 1998 and continued through

site. Groundwater monitoring began in 1998 and continued through 1999. However, it was discontinued 2000. A soil vapor extraction (SVE) system was installed at the site in approximately 1994. The system operated intermittently and operating parameters are unknown. From 2000 to 2001, bench-scale testing was conducted on soil and groundwater samples for bioremediation. No pilot test or full scale implementation of the proposed bioremediation was carried out. On December 21, 2011, the Regional Board issued a Cleanup and Abatement Order (CAO) to all responsible parties to complete site assessment and delineation of extent of contamination and to clean up the site.

On July 26, 2013, the Regional Board issued an Amendment to Cleanup and Abatement Order No. R4-2011-0183. Site assessment and groundwater

monitoring are underway at the site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

#### Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

### Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Next Scheduled EDR Contact: 10/15/2018 Data Release Frequency: Varies

### SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

#### Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 07/17/2018 Date Data Arrived at EDR: 08/09/2018 Date Made Active in Reports: 09/07/2018

#### Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 03/01/2018 Date Data Arrived at EDR: 03/28/2018 Date Made Active in Reports: 06/22/2018

## Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018

Next Scheduled EDR Contact: 01/07/2019
Data Release Frequency: Quarterly

### RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 03/01/2018 Date Data Arrived at EDR: 03/28/2018 Date Made Active in Reports: 06/22/2018

Next Scheduled EDR Contact: 01/07/2019 Data Release Frequency: Quarterly

### State- and tribal - equivalent NPL

RESPONSE: State Response Sites

Identifies confirmed release sites where DTSC is involved in remediation, either in a lead or oversight capacity.

These confirmed release sites are generally high-priority and high potential risk.

Date of Government Version: 07/30/2018
Date Data Arrived at EDR: 07/31/2018
Date Made Active in Reports: 09/07/2018

Number of Days to Update: 38

Source: Department of Toxic Substances Control

Telephone: 916-323-3400 Last EDR Contact: 07/31/2018

Next Scheduled EDR Contact: 11/12/2018
Data Release Frequency: Quarterly

### State- and tribal - equivalent CERCLIS

**ENVIROSTOR:** EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

## ADDITIONAL ENVIRONMENTAL RECORDS

#### Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Next Scheduled EDR Contact: 04/27/2009 Data Release Frequency: No Update Planned

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 05/18/2018 Date Data Arrived at EDR: 06/20/2018 Date Made Active in Reports: 09/14/2018

Next Scheduled EDR Contact: 01/14/2019 Data Release Frequency: Semi-Annually

#### **DEED: Deed Restriction Listing**

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 09/04/2018 Date Data Arrived at EDR: 09/05/2018 Date Made Active in Reports: 10/02/2018

Data Release Frequency: No Update Planned

### Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

#### EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

### 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017 Date Data Arrived at EDR: 05/08/2018 Date Made Active in Reports: 07/20/2018

#### RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995 Date Data Arrived at EDR: 07/03/1995 Date Made Active in Reports: 08/07/1995

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

### UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

#### ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

### **EDR HIGH RISK HISTORICAL RECORDS**

#### **EDR Exclusive Records**

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Date of Government Version: N/A Date Data Arrived at EDR: N/A Date Made Active in Reports: N/A Number of Days to Update: N/A Source: EDR, Inc. Telephone: N/A Last EDR Contact: N/A

### EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

### OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

#### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services,

a federal agency within the U.S. Department of Health and Human Services.

### **Nursing Homes**

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

## **GROUNDWATER FLOW DIRECTION INFORMATION**

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

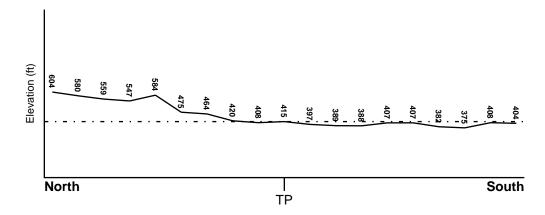

### **TOPOGRAPHIC INFORMATION**

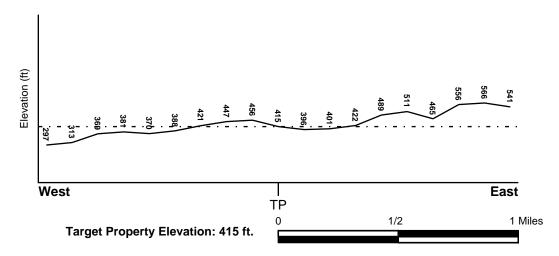

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SE

#### SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

### HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

### **FEMA FLOOD ZONE**

Flood Plain Panel at Target Property FEMA Source Type

06037C1610F FEMA FIRM Flood data

Additional Panels in search area: FEMA Source Type

06037C1628F FEMA FIRM Flood data

**NATIONAL WETLAND INVENTORY** 

NWI Quad at Target Property Data Coverage

HOLLYWOOD YES - refer to the Overview Map and Detail Map

### HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### Site-Specific Hydrogeological Data\*:

Search Radius: 1.25 miles Status: Not found

### **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

### **GROUNDWATER FLOW VELOCITY INFORMATION**

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### **GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY**

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

#### **ROCK STRATIGRAPHIC UNIT**

#### **GEOLOGIC AGE IDENTIFICATION**

Era: Cenozoic Category: Stratified Sequence

System: Tertiary Series: Miocene

Code: Tm (decoded above as Era, System & Series)

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

#### DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: HAMBRIGHT

Soil Surface Texture: gravelly - loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high

water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to

water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 20 inches

Soil Layer Information									
	Boundary			Classification					
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)		
1	0 inches	7 inches	gravelly - loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel	Max: 2.00 Min: 0.60	Max: 7.30 Min: 6.10		
2	7 inches	16 inches	very gravelly - loam	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Silty Gravel. COARSE-GRAINED SOILS, Gravels, Gravels with fines, Clayey Gravel.	Max: 2.00 Min: 0.60	Max: 7.30 Min: 6.10		
3	16 inches	20 inches	unweathered bedrock	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00		

## OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam

silty clay loam shaly - clay loam sandy loam clay

loamy sand clay loam

Surficial Soil Types: loam

silty clay loam shaly - clay loam sandy loam clay

loamy sand clay loam

Shallow Soil Types: silty clay

Deeper Soil Types: weathered bedrock

clay loam

## **LOCAL / REGIONAL WATER AGENCY RECORDS**

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

#### **TOPOGRAPHIC INFORMATION**

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

#### HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

#### HYDROGEOLOGIC INFORMATION

AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

#### **GEOLOGIC INFORMATION**

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

#### LOCAL / REGIONAL WATER AGENCY RECORDS

#### FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

#### STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

# OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

#### RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208 Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency

(USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at

private sources such as universities and research institutions.

EPA Radon Zones Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor

radon levels.

Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

# The EDR Aerial Photo Decade Package

# **EDR Aerial Photo Decade Package**

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

### **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT. Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

### **DESCRIPTION**

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

#### **RECORD SOURCES**

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by EFI Global Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

## Application for the Erection of Buildings

To the Board of Building and Safety Commissioners of the City of Los Angeles:

Application is hereby made to the Board of Building and Safety Commissioners of the City of Los Angeles, through the office of the Soperintendent of Building, for a building permit in accordance with the description and for the purpose hereinafter set forth. This application is made subject to the following conditions, which are hereby agreed to by the undersigned applicant and which shall be deemed conditions entering into the exercise of the permit.

First: That the permit does not grant any right or privilege to erect any building or other structure therein described, or any portion thereof, upon any street, alley, or other public place or portion thereof, appendix the permit does not grant any right or privilege to use any building or other structure therein described, or any portion thereof, for any purpose that is, or may hereafter be prohibited by ordinance of the City of Los Angeles.

Third: That the granting of the permit does not affect or prejudice any claim of title to, or right of possession in, the property described in such permit.

#### STATEMENT OF RESPONSIBILITY

I certify that in doing the work authorized hereby I will not employ any person in violation of the Labor Code of the State of California relating to workmen's compensation insurance.

"This permit is an application for inspection, the issuance of which is not an approval or an authorization of the work specified herein. This permit does not authorize or permit, nor shall it be construed as authorizing or permitting the violation or failure to comply with any applicable law. Neither the City of Los Angeles, nor any board, department, officer or employee thereof make any warranty or shall be responsible for the performance or results of any work described herein, or the condition of the property or soil upon which such work is performed:"

**Subject:** Public Records Request

Hello,

This firm is performing a Phase I Environmental Site Assessment for the property located at the following addresses:

1911-1929 (odd) W. Sunset Blvd., 1910-1918 (even), 2000-2018 (all) and 1980 W. Reservoir St., Los Angeles, CA 90026 (APNs: 5404-001-007, 5419-009-034 and 5419-009-031, 5419-009-032)

We are requesting any information from your department pertaining to the above properties.

Please feel free to contact Susana Corletto with any questions or concerns at 310-854-6300 or Susana.Corletto@efiglobal.com.

Thank you for your assistance with this information.

October 23, 2018

Ms. Ramona Thomas EFI Global, Inc. 5261 West Imperial Highway Los Angeles, CA 90045

VARIOUS SITES PR3-101918-05

Dear Ms. Thomas:

We have received your Public Records Act Request for records from the Department of Toxic Substances Control.

After a thorough review of our files we have found that no such records exist at this office pertaining to the sites/facilities referenced below.

- 1911-1929 W. Sunset Boulevard, Los Angeles, CA 90026 (odd only)
- 1910-1918 W. Reservoir Street, Los Angeles, CA 90026 (even only)
- 2000-2018 W. reservoir Street, Los Angeles, CA 90026 (all)
- 1980 W. Reservoir Street, Los Angeles, CA 90026
- APNs: 5404-001-007, 5419-009-034, 5419-009-031 and 5419-009-032
- 2020 and 2032 E. 220<sup>th</sup> Street, Carson CA 90810
- APNs: 7316-027-015 and 7316-027-016

We would like to inform you about EnviroStor, a database that provides information and documents on over 5,000 DTSC cleanup sites. EnviroStor can be accessed at: http://www.envirostor.dtsc.ca.gov/public. Also, a computer is available in the Central Files of each DTSC Regional Office for use by community members to view EnviroStor.

#### INSTRUCTIONS FOR REQUESTING RECORDS

(California Public Records Act, Govt. Code Sections 6250-6276.48)

- 1. In order to expedite your request, please fill out the form completely. Requests may also be submitted by phone at (909) 396-3700, by facsimile to (909) 396-3330, or by email to PublicRecordsRequests@aqmd.gov.
- 2. Requests must be for records prepared, owned, used, or retained by the District (Gov. Code Sec. 6252(e)). Requests should be for clearly identifiable records. The District is not required to create a new record in response to a request. The District will assist the requestor in making a request that describes reasonably identifiable records (Gov. Code Sec. 6253.1). Documents will not be provided if disclosure would infringe upon a copyright, trade secret, or is otherwise exempt in accordance with state law.
- 3. A search for facility records can only be conducted by one or all of the following:
- -- a) Facility Name, Address, or Identification Number
- -- b) Facility Application Number, or Permit to Operate Number; or
- -- c) Facility Notice of Violation/Notice to Comply Number.
- 4. You will be notified within ten (10) days whether your request seeks copies of disclosable public records prepared, owned, used, or retained by this agency. In some cases, the District may need an additional 14 days to respond. If so, you will be notified in writing. You will also be provided an estimated date of when the records will be made available.
- 5. Communications regarding your request, and any records, will be provided by email, unless specified otherwise.
- 6. If the search for records finds the records voluminous, you will be notified of the approximate number of pages and/or length of time it will take to process your request.
- 7. If the records you requested have been marked confidential by the source of the record, you will be notified and given the option of continuing with the District's Trade Secret process.
- 8. If your request is to review records, rather than receive copies, the District will notify you once the records are gathered, and arrangements will be made for your review.
- 9. The charge for the direct cost of duplication is as follows: Paper Copies, \$0.15/page each over 10 pages (first 10 pages are free); Copied CD's or flash drives, no charge; and Copied Audio Tapes, \$5.00 each. After a preliminary estimate, advance payment may be required.
- 10. If the request is for information in an electronic format, the requestor shall bear the cost of producing a copy of the record, including the cost to construct the record and the cost of programming and computer services necessary to produce a copy of the record, when either of the following applies: (1) the District would be required to produce a copy of an electronic record and the record is one that is produced only at otherwise regularly scheduled intervals, or (2) the request would require data compilation, extraction, or programming to produce the record. (Gov. Code Sec. 6253.9(b)). The transfer of gathered electronic records onto CD, DVD or flash drive typically costs \$10.00 each. An invoice will accompany your records when completed.

Note: For further information, please refer to the District's Guidelines for Implementing the California Public Records Act. The Guidelines are available in the lobby of the District Headquarters or on the District's web site at www.aqmd.gov.

Note: If you have questions pertaining to the submittal of a Public Records Act request, you may contact the Public Records Unit, (909) 396-3700, Tuesday through Friday, 7:00 a.m. to 5:30 p.m. Our Fax number is (909) 396-3330. Our email address is PublicRecordsRequests@agmd.gov.

#### INSTRUCTIONS FOR REQUESTING RECORDS

(California Public Records Act, Govt. Code Sections 6250-6276.48)

- 1. In order to expedite your request, please fill out the form completely. Requests may also be submitted by phone at (909) 396-3700, by facsimile to (909) 396-3330, or by email to PublicRecordsRequests@aqmd.gov.
- 2. Requests must be for records prepared, owned, used, or retained by the District (Gov. Code Sec. 6252(e)). Requests should be for clearly identifiable records. The District is not required to create a new record in response to a request. The District will assist the requestor in making a request that describes reasonably identifiable records (Gov. Code Sec. 6253.1). Documents will not be provided if disclosure would infringe upon a copyright, trade secret, or is otherwise exempt in accordance with state law.
- 3. A search for facility records can only be conducted by one or all of the following:
- -- a) Facility Name, Address, or Identification Number
- -- b) Facility Application Number, or Permit to Operate Number; or
- -- c) Facility Notice of Violation/Notice to Comply Number.
- 4. You will be notified within ten (10) days whether your request seeks copies of disclosable public records prepared, owned, used, or retained by this agency. In some cases, the District may need an additional 14 days to respond. If so, you will be notified in writing. You will also be provided an estimated date of when the records will be made available.
- 5. Communications regarding your request, and any records, will be provided by email, unless specified otherwise.
- 6. If the search for records finds the records voluminous, you will be notified of the approximate number of pages and/or length of time it will take to process your request.
- 7. If the records you requested have been marked confidential by the source of the record, you will be notified and given the option of continuing with the District's Trade Secret process.
- 8. If your request is to review records, rather than receive copies, the District will notify you once the records are gathered, and arrangements will be made for your review.
- 9. The charge for the direct cost of duplication is as follows: Paper Copies, \$0.15/page each over 10 pages (first 10 pages are free); Copied CD's or flash drives, no charge; and Copied Audio Tapes, \$5.00 each. After a preliminary estimate, advance payment may be required.
- 10. If the request is for information in an electronic format, the requestor shall bear the cost of producing a copy of the record, including the cost to construct the record and the cost of programming and computer services necessary to produce a copy of the record, when either of the following applies: (1) the District would be required to produce a copy of an electronic record and the record is one that is produced only at otherwise regularly scheduled intervals, or (2) the request would require data compilation, extraction, or programming to produce the record. (Gov. Code Sec. 6253.9(b)). The transfer of gathered electronic records onto CD, DVD or flash drive typically costs \$10.00 each. An invoice will accompany your records when completed.

Note: For further information, please refer to the District's Guidelines for Implementing the California Public Records Act. The Guidelines are available in the lobby of the District Headquarters or on the District's web site at www.aqmd.gov.

Note: If you have questions pertaining to the submittal of a Public Records Act request, you may contact the Public Records Unit, (909) 396-3700, Tuesday through Friday, 7:00 a.m. to 5:30 p.m. Our Fax number is (909) 396-3330. Our email address is PublicRecordsRequests@agmd.gov.

RE: PRA of October 19, 2018, Reference # H001802-101918.

Dear Project Manager Ramona Thomas,

The Los Angeles County Fire Department, Health Hazardous Materials Division, being the custodian or keeper of records, certify that a thorough search for the records you requested has been carried out.

Re: 1911 Sunset Blvd Los Angeles CA 90026

### The search revealed that your noted address did not match our database.

It should be understood that this does not mean that the records you requested do not exist. It is possible that such records may be misfiled; exist under another spelling, another name, or may have been destroyed based on this Department's Record Retention Policy. However, with the information furnished to our office, and to the best of our knowledge, no records were located.

For businesses in Burbank, Culver City, Downey, City of LA, La Habra, Monrovia, Pasadena, Santa Monica, Torrance & Underground Storage Tanks in Los Angeles County jurisdiction click here.

RE: PRA of October 29, 2018, Reference # H002199-102918.

Dear Project Manager Ramona Thomas,

The Los Angeles County Fire Department, Health Hazardous Materials Division, being the custodian or keeper of records, certify that a thorough search for the records you requested has been carried out.

Re: 1932 Reservoir St Los Angeles CA 90026

### The search revealed that your noted address did not match our database.

It should be understood that this does not mean that the records you requested do not exist. It is possible that such records may be misfiled; exist under another spelling, another name, or may have been destroyed based on this Department's Record Retention Policy. However, with the information furnished to our office, and to the best of our knowledge, no records were located.

For businesses in Burbank, Culver City, Downey, City of LA, La Habra, Monrovia, Pasadena, Santa Monica, Torrance & Underground Storage Tanks in Los Angeles County jurisdiction click here.

• □ Urgent	□ For Review □ Please Com	ment X P	• • Please Reply □ For Information	1

In preparation for a Phase I Environmental Site Assessment, I would like to request available records pertaining to industrial wastewater discharge, clarifiers, storm water/waste water, and inspection records for the following addresses:

1911-1929 (odd) W. Sunset Blvd., 1910-1918 (even), 2000-2018 (all) and 1980 W. Reservoir St., Los Angeles, CA 90026 (APNs: 5404-001-007, 5419-009-034 and 5419-009-031, 5419-009-032)

If permits are found for the aforementioned property, please fax the information to us, otherwise standard mailing is sufficient. We understand that a fax fee will be accrued for faxing the information.

Thank you.

• Urgent	□ For Review □ Please Com	ment X P	elease Reply □ For Information	n

In preparation for a Phase I Environmental Site Assessment, I would like to request available records pertaining to industrial wastewater discharge, clarifiers, storm water/waste water, and inspection records for the following addresses:

1928-1978 (even) Reservoir Street, Los Angeles, CA 90026

1301 Liberty Street, Los Angeles, CA 90026

If permits are found for the aforementioned property, please fax the information to us, otherwise standard mailing is sufficient. We understand that a fax fee will be accrued for faxing the information.

Thank you.

Sincerely,

Susana Corletto

#### **Professional Summary:**

Ms. Corletto has been in the environmental industry since 2017. Ms. Corletto started her career in the environmental field by researching the effects of species conservation on the livelihood of people who reside in fishing communities in Southeast Asia. Ms. Corletto also worked with the Department of Toxic Substances Control as part of the Exide cleanup project in Maywood, California. Currently, Ms. Corletto conducts historical research, performs site inspections, and works with regulatory bodies to investigate historical and current uses of properties as part of the Phase I Environmental Site Assessment

#### **Licenses and Certifications:**

OSHA 40-Hour Hazardous Waste Operations Certified, Safety Unlimited Inc, CA, #1709061209065

#### **Project Experience:**

EFI Global and Department of Toxic Substances Control (DTSC), Los Angeles, CA Soil Testing and Cleanup

The California DTSC tested for lead in soil at homes which may have been contaminated by Exide Technologies facility operations in Vernon, California. Thousands of residential properties, in addition to daycares, churches, and community centers were potentially affected by such operations, leading to a huge effort to remove contaminated soil from impacted locations.

christopher\_rude@efiglobal.com

#### **Professional Summary:**

Mr. Christopher Rude is an Environmental Professional with approximately twenty-six years of experience in hazardous materials, lab packing of hazardous wastes, Phase I Environmental Site Assessments, and Phase II Environmental Site Assessments throughout the country. Mr. Rude has worked directly with clients and regulatory agencies' to determine and assess environmental impacts, develop plans by which mitigate such conditions, and carry out the planned approach for closure. Mr. Rude's experience includes all aspects of environmental projects including Phase I Environmental Site Assessments, soil, soil vapor and groundwater sampling - Phase II Subsurface Site Assessments, site characterization, removal of Underground Storage Tanks (USTs) and multi-stage clarifiers, and remedial cleanups of properties impacted by arsenic, organochlorine pesticides, chlorinated solvents, and fuel hydrocarbons. Mr. Rude has successfully obtained closure for numerous Brownfield sites on behalf of clients from DTSC, Los Angeles Regional Water Quality Control Board, Los Angeles County, Los Angeles City, and Ventura County Environmental Health. Mr. Rude has conducted numerous soot sampling assessments for insurance companies associated with the Thomas Fire and Creek Fire.

- Environmental Consulting
- Environmental Compliance
- Management of all stages of environmental projects including Phase I/II environmental site assessments

#### **Licenses and Certifications:**

Asbestos Contractor/Supervisor (AHERA), California ASR0608180009N15494
Lead Sampling Technician (California Department of Public Health)
Environmental Professional, per the CFR Title 40, Chapter I, Subchapter J, Part 312, Subpart C, Section 312.21

#### **Project Experience:**

Current responsibilities as Senior Project Manager include the preparation of Phase I and Phase II Environmental Site Assessments within Los Angeles, Ventura, Santa Barbara, San Luis Obispo, Tulare, Kern, Fresno, and Kings Counties. Additional responsibilities include managing, mentoring and training Project Managers in all aspects of Phase I Environmental Site Assessments, marketing, and client relations, business development and project management.

### Sunflower Valley Farms LLC, Multiple Locations in Kings and Kerns Counties, CA Phase I Environmental Site Assessment

Senior Project Manager of a Phase I Environmental Site Assessment for a 12,685 acre ranch developed with agricultural land, 120 active or abandoned oil wells, active oil sumps, hazardous materials, pesticide storage areas, and aboveground storage tanks. Phase II recommendations were made for active oil wells and oil sumps.

© 2018 EFI Global, Inc. 1

### Primestor Development, Inc. Phase I Environmental Site Assessment

Served as the Senior Project Manager of a Phase I ESA and Asbestos/Lead Based Paint Survey of a 31-acre retail-commercial mall developed with twelve retail structures and medical clinic totaling approximately 383,000 square feet. The retail mall had undergone numerous subsurface assessments and remedial cleanup associated with a Leaking Underground Storage Tank (LUST) and Spills, Leaks, Investigations, and Cleanups (SLIC) cases associated with a former gasoline service station and former dry cleaning facilities. Case closure was issued by the overseeing regulatory agency for the LUST case. Review of available documentation indicated that the SLIC case was to be issued case closure for soil and groundwater.

#### LS Realty Group, Los Angeles, CA Phase I / II Environmental Site Assessment

Served as the Senior Project Manager of a Phase I Environmental Site Assessment report which was completed concurrently with a Phase II Environmental Site Assessment. The site was assessed due to the former underground storage tanks and long-term auto repair use of the property by multiple tenants. Results of the soil and soil vapor sampling assessment indicated that the former/current uses did not represent an unacceptable risk to human health for commercial use.

Has performed and provided project management on numerous Phase II Subsurface Site Assessments on properties impacted by chlorinated solvents, fuel hydrocarbons, agricultural pesticides, and heavy metals. Assessment activities also included oversight of geophysical surveys, sampling of soil, soil vapor, and groundwater using Geoprobe, hollow stem augers, and/or dual percussion air rotary rigs. Assessments also included monitoring for vapor intrusion and fixed gases. Conducted and prepared quarterly groundwater monitoring reports.

#### **Professional Experience:**

EFI Global Inc., Los Angeles, CA, Senior Project Manager, 2012 - Present California Environmental, Agoura Hills, CA, Environmental Scientist, 1997 – 2012 MSE Environmental, Camarillo, CA, Environmental Specialist, 1992 – 1996

California Regional Water Quality Control Board Los Angeles Region 320 West 4<sup>th</sup> Street, Suite 200 Los Angeles, California 90013

ATTN: MR. BIZUAYEHU AYELE

SITE: HOLLYWAY CLEANERS

1157 ECHO PARK AVENUE LOS ANGELES, CALIFORNIA RWOCB CASE #2048E00

RE: WORK PLAN FOR ADDITIONAL ASSESSMENT AND REMEDIAL TESTING

Dear Mr. Ayele:

TRC submits this work plan to conduct additional site assessment and remedial testing activities at Hollyway Cleaners (Site), located at 1157 Echo Park Avenue, Los Angeles, California (see Figure 1). This work plan is prepared pursuant to the Outline of Proposed Scope of Work from Mr. Jeff Findl dated March 28, 2016, and the Los Angeles Regional Water Quality Control Board (RWQCB) letter dated July 11, 2016. This work plan was prepared to further assess the lateral extent of chlorinated compounds in soil vapor and groundwater both at the Site and downgradient of the Site, as well as to evaluate the effectiveness of soil vapor extraction (SVE) as a remedial alternative.

#### SITE LOCATION AND LAND USE

Hollyway Cleaners is an active dry cleaning facility located at the southwestern corner of Echo Park Avenue and West Sunset Boulevard in Los Angeles, California. The Site is in an area of commercial and residential properties. Adjacent properties include a parking lot to the south and southwest, single and multifamily residential buildings further to the south, industrial and commercial buildings to the north and northwest, and commercial and residential buildings to the northeast (see Figure 1). The dry cleaning operations at the Site were initiated in 1941 and have been conducted at the Site since that time (Genesis, 2015).

#### SITE GEOLOGY AND HYDROGEOLOGY

The Site is located at the southern boundary of the Transverse Ranges Geomorphic Province, a range of mountains and valleys that runs east-west and includes the Santa Monica Mountains, which are located to the northwest of the Site. Elysian Hills, a series of foothills created by the Elysian Fault and Elysian Park Anticline, are located to the north and northwest of the Site. The Site is located adjacent to the eastern edge of a narrow alluvial valley that is flanked by low hills composed of Puente Formation siltstone bedrock (Gannett Fleming, 2014).

Work Plan For Additional Assessment and Remedial Testing March 21, 2017

Subsurface soils beneath the Site are predominantly silts and clays with some layers of sandy silt and sandy clay. Bedrock from the Puente Formation siltstone is encountered between 34 and 42 feet below ground surface (bgs). This underlying bedrock is identified as Unnamed Shale that is included in the Puente Formation (Gannett Fleming, 2014).

Groundwater is encountered between 5 and 15 feet bgs. Groundwater flow is to the southwest towards Echo Park Lake, which is located approximately 700 feet downgradient of the Site (Genesis, 2015).

#### PREVIOUS INVESTIGATIONS

Subsurface investigations were initiated in 1988. Tetrachloroethene (PCE), trichloroethene (TCE), cis-1,2-dichloroethene (cis-1,2-DCE) are the predominant volatile organic compounds (VOCs) encountered in soil, soil vapor, and groundwater in the vicinity of the Site.

Maximum historical soil concentrations encountered are as follows:

- 10,360 micrograms per kilogram (ug/kg) PCE in Soil Boring B-3 at 10 feet bgs;
- 650 ug/kg TCE in Soil Boring B-3 at 10 feet bgs; and
- 3,300 ug/kg in Soil Boring B-3 at 10 feet bgs.

Soil Boring B-3 is located in the southwest corner of the Site building near the back entrance (Law Environmental, 1989).

Maximum historical soil vapor concentrations encountered are as follows:

- 23,000,000 micrograms per cubic meter (ug/m³) PCE in Vapor Sample SG-10;
- 4,200,000 ug/m<sup>3</sup> TCE in Vapor Sample SG-13; and
- 9,900,000 ug/m<sup>3</sup> cis-1,2-DCE in Vapor Sample SG-19.

From January to March 1990, 28 soil borings with temporary gas probes (SG-1 through SG-28) were advanced in the parking lot to the west of the Site to depths of 2 and 2.5 feet bgs. Results of these soil gas samples indicated the a "hot spot" of PCE-impacted soil vapor in the vadose zone in the parking lot west of the Site (Law Environmental, 1990).

Maximum groundwater concentrations during the Fourth Quarter 2016 monitoring and sampling event are as follows:

- 550 micrograms per liter (ug/L) PCE in Well MW-5;
- 130 ug/L TCE in Well MW-7;
- 950 ug/L cis-1,2-DCE in Well MW-4; and
- 48 ug/L vinyl chloride in Well MW-4.

Wells MW-4 and MW-5 are located in the parking lot southwest of the Site between the dry cleaners and the northern portion of the residential community. Well MW-7 is located further downgradient within the residential complex. Impacted groundwater extends from the site downgradient to the southwest at least 600 feet (Genesis, 2015, 2016).

Work Plan For Additional Assessment and Remedial Testing March 21, 2017

Refer to Attachment A for historical soil, soil vapor, and groundwater figures and tables.

#### REMEDIATION HISTORY

A SVE system was installed at the Site in 1994 and operated for approximately two years on four vadose zone wells. In December 2001, a bench scale bioremediation pilot study was conducted, with results indicating that application of Bac-Terra would be effective in remediating PCE and TCE in soil and groundwater. Work plans to apply Bac-Terra and to do a bioremediation pilot study using Bio-Trapp were submitted in 2002 and 2010, respectively (Gannett Fleming, 2014).

#### PROPOSED FIELD ACTIVITIES

TRC proposes to install six indoor soil vapor probes, seven outdoor soil vapor probes, and three SVE wells, advance five Geoprobe soil borings for groundwater sample collection, and conduct a 1-day soil vapor extraction test. See Figure 2 for the locations of the proposed vapor probes, Geoprobe borings, and SVE wells.

#### PRE-DRILLING WORK ACTIVITIES

A video survey of the two drains at the Site will be conducted using a plumbing camera with a digital video. The video survey will be conducted to find potential breaks in the piping and the potential source locations of VOC-affected wastewater which would have impacted soil and groundwater. All soil vapor probe, SVE well, and Geoprobe boring locations will be marked and Underground Service Alert (USA) will be notified approximately 48 hours prior to initiation of the field activities. Permits will be obtained from the Los Angeles County Department of Environmental Health (County) for the Geoprobe borings. Access agreement(s) will be obtained as necessary to install the vapor probes and SVE wells and advance the Geoprobe borings. A geophysical survey will be conducted to clear each vapor probe, SVE well, and Geoprobe boring locations will be cleared using a hand auger to 5 feet bgs prior to initiating the drilling activities. TRC work and safety protocols will be followed with respect to the hole-clearing operations.

#### **DRILLING ACTIVITIES**

The following drilling activities will be conducted:

- Six indoor nested soil vapor probes will be installed to depths of 5 and 10 feet bgs within the interior of Hollyway Cleaners to evaluate the effectiveness of previous SVE operations.
- Six outdoor nested soil vapor probes will be installed in the vicinity of the adjacent downgradient residential neighborhood. Three of the probes will be installed to depths of 5 and 10 feet bgs in the rear parking lot adjacent to the apartment building. Three of the nested probes in adjacent alleyways where groundwater is not as deep will be installed to depths of 2.5 and 6 feet bgs. Probe depths will be adjusted based on depth to groundwater.
- One additional outdoor nested soil vapor probe will be installed in the former PCE vapor "hot spot" in the rear parking lot to assess current PCE vapor concentrations in the vadose zone.

Work Plan For Additional Assessment and Remedial Testing March 21, 2017

- Three SVE wells will also be installed in the rear parking lot (former PCE "hot spot") to a depth of 10 feet bgs in order to conduct an SVE test to evaluate the radius of influence for SVE in the vadose zone. The SVE wells will be 2 inches in diameter and screened from 5 to 10 feet bgs.
- Five Geoprobe borings will be advanced to 15 feet bgs. Groundwater samples will be collected from these borings to assess the lateral extent of VOC-affected groundwater to the west of the Site. Groundwater samples will be analyzed for VOCs by EPA Method 8260B.

All 13 soil vapor probes will have appropriate vapor probe tips and valves. Vapor samples will be collected from all 13 soil vapor probes (26 samples total) using a syringe for each sample and analyzed immediately for VOCs using EPA Method 8260B. Sampling will be conducted in accordance with California Environmental Protection Agency (Cal EPA) and Department of Toxic Substances Control (DTSC) guidelines (Cal EPA and DTSC, 2015).

All 13 soil vapor probes and three SVE wells will be installed with flush-mounted traffic-worthy well boxes and water-tight locking casing caps.

Soil samples will be collected from all 13 soil vapor probes, three SVE wells, and five Geoprobe borings for soil description using the Unified Soil Classification System (USCS) and for hydrocarbon vapor screening using a photoionization detector (PID) or equivalent instrument.

#### SOIL VAPOR EXTRACTION TEST

An SVE test will be conducted using the three SVE wells over the course of one day. SVE testing will include conducting step test(s) to determine the optimum vacuum to achieve the maximum flow rate in the vadose zone, as well as constant rate test(s) to determine concentration, flow, vacuum, and radius of influence. The step test may require as many as 3 to 4 vacuum rates to determine the optimum vacuum to achieve the maximum flow rate. Constant rate tests will be conducted on at least one SVE well. Vapor concentrations during SVE testing will be measured using a PID. Vapor samples may be collected during SVE testing to verify concentrations and may be analyzed for VOCs using EPA Method 8260B.

#### WASTE DISPOSAL

Soil and decontamination water generated during drilling and SVE test activities will be temporarily stored onsite in labeled, Department of Transportation-approved, 55-gallon drums pending receipt of laboratory analysis results and offsite transport to appropriate recycling facilities.

#### REPORTING

A report summarizing the video survey, soil vapor probe and SVE well installation, Geoprobe advancement, vapor sampling, groundwater sampling, and SVE testing will be submitted within 45 days of completion of field activities. The report will include field measurements, laboratory analytical reports, findings, conclusions, and recommendations. The report will also include a comparison of vapor concentrations to risk screening levels and groundwater concentrations to Maximum Contamination Levels (MCLs).

Work Plan For Additional Assessment and Remedial Testing

March 21, 2017

If you have any questions regarding this work plan, please call the undersigned at (949) 727-9336.

Sincerely,

TRC

   "c" Analyte was less than the listed Laboratory Reporting Limit
   "MCL" Refers to the California DPH Maximum Contaminant Level
   "NS" not sampled

# ATTACHMENT B GENERAL FIELD PROCEDURES

#### ATTACHMENT B

### **GENERAL FIELD PROCEDURES**

#### DRILLING AND SOIL SAMPLING

Soil vapor probes, vapor wells, and Geoprobe borings will be advanced with a direct push rig. Soil samples will be obtained from the boring for soil description and field hydrocarbon vapor screening. During drilling activities, soil is screened for combustible vapors using a PID. For each hydrocarbon vapor screening event, a 6-inch long by 2.5-inch diameter sample container is filled approximately 1/3 full with the soil sample, capped at both ends, and shaken. The PID probe is then inserted through a small opening in the cap, and a reading is taken after approximately 15 seconds and recorded on the boring log. The remaining soil recovered is removed from the sample insert or sampler and described in accordance with the USCS. For each sampling interval, field estimates of soil type, density/consistency, moisture, color, and grading is recorded on the boring log.

#### WELL INSTALLATION

The SVE wells will be constructed using 2-inch diameter, Schedule 40, PVC casing with the screened interval (0.020 screen slot size) extending from 5 to 10 feet bgs. Filter pack sand is placed into the annular space between the hollow-stem auger and well casings. The remaining annulus is completed to the surface with concrete and a flush-mounted, traffic-rated protective cover set in concrete will be placed over the wellheads upon completion. A locking, watertight cap is installed on each wellhead for the SVE wells and soil vapor probes to prevent unauthorized access to the wells and limit infiltration of surface fluids.

#### CHAIN OF CUSTODY PROTOCOL

Chain of custody protocol is followed for the vapor and groundwater samples selected for laboratory analysis. The chain of custody form(s) accompanies the samples from the sampling locality to the laboratory, providing a continuous record of possession prior to analysis.

### **DECONTAMINATION**

### **Drilling and Soil Sampling**

Drilling equipment is decontaminated by steam cleaning before being brought on site. The equipment is also steam cleaned before the start of drilling activities. Prior to use, the sampler and sampling tubes are brush-scrubbed in a Liqui-nox and potable water solution and rinsed twice in clean potable water. Sampling equipment and tubes are decontaminated before each use.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Northgate Env. Management, Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

#### **DESCRIPTION**

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

#### **RECORD SOURCES**

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

#### **RESEARCH SUMMARY**

2004, 2003, 2001, 1999, 1996, 1995, 1992, 1985, 1980, 1975, 1972, 1970, 1969, 1966, 1965, 1964, 1963, 1961, 1960, 1957, 1956, 1955, 1954, 1952, 1950, 1949, 1948, 1947, 1946, 1945, 1944, 1942, 1940, 1939, 1938, 1937, 1936, 1935, 1934, 1933, 1932, 1931, 1930, 1929, 1928, 1927, 1926, 1925, 1924, 1923, 1921, 1920

# APPENDIX J ENVIRONMENTAL PROFESSIONAL QUALIFICATIONS

## DERRICK S. WILLIS PRINCIPAL II

Mr. Willis has over 24 years' experience serving both public sector and private clients in California and Canada on a wide variety of environmental projects. For the last several years, Mr. Willis' focus has been on formulating and facilitating closure and development strategies for large, complex, high profile, environmental projects for aerospace, industrial, and real estate development firms. Mr. Willis has extensive experience with due diligence/property transfer and development issues in a wide variety of industrial and regulatory settings. He is familiar with the industrial processes that generate environmental wastes, the fate and transport of chemicals in the environment, the potential adverse effects of these substances on human and ecological receptors, compliance challenges faced by business operators, the performance of remedial technologies, and how these issues play into site acquisition, development, and divestiture.

## REPRESENTATIVE EXPERIENCE

#### **Environmental Site Assessments**

- RREEF, Multiple Sites, Southern California Mr. Willis serves as client director for RREEF on
  multiple projects including acquisition studies (which include mold, asbestos and indoor air quality
  surveys), tenant audit programs, soil remediation, groundwater investigation and remediation, third
  party oversight, agency negotiation, and mold and asbestos abatement programs.
- Watson Land Company, Multiple Sites, Southern California Mr. Willis has directed over 40 acquisition-related due diligence investigations for Watson Land Company (Watson). Scope of work has included Phase I ESAs, soil and groundwater investigations, risk evaluations, agency negotiation, and aiding Watson in evaluating and quantifying the potential risk associated with recognized environmental concerns.
- Various Clients, Various Locations, Southern California Project manager for more than 200
  Phase I environmental assessments (ESAs) for industrial facilities including aerospace, furniture
  and paper manufacturing factories; utility companies, vehicle and equipment maintenance facilities;
  and landfills as well former agricultural land. The objective of the ESAs was to evaluate and
  quantify potential liabilities associated with the acquisition and development of the properties.

#### Site Investigation and Remediation

Kimco Realty Corporation, multiple locations in California and Nevada, – Serves Principal-in-Charge and program manager for investigation and remediation of several dry-cleaner sites in California (Cupertino, Daly City, Lakewood, and LaVerne) and Reno, Nevada. Projects range from investigation of soil impact to remediation of soil and groundwater. Mr. Willis is responsible for developing remedial strategies, negotiating with regulatory agencies, and providing technical direction to staff in order to evaluate and remediate site impacts, and bring sites to regulatory closure.

G

- Baker Cold Storage, Port of Long Beach Pier B Facility, California Serves as project manager for investigation, remediation and redevelopment support of a 12-acre former wood treatment facility in the Port of Long Beach. The site is impacted with pentachlorophenol (PCP), metals, VOCs, and dioxins/furans. In addition, tidally influenced groundwater is impacted with PCP and petroleum hydrocarbons and methane charged from oilfield operations. Mr. Willis evaluated investigation data, managed a groundwater investigation program and develop a remedial approach for soil and groundwater. Mr. Willis successfully streamlined the regulatory process by aggregating the remedial work plans including RCRA closure of a drip pad, into one encompassing work plan (Soil and Groundwater Response Plan) and one Remedial Design Document ([RDD] that incorporated the facility design components into building mitigation design), and securing agency approvals on components of site construction concurrent with development of the RDD. Site is currently being developed with a 250,000 square-foot cold storage facility.
- RREEF, Villa Marina Marketplace, Marina Del Rey, California Mr. Willis managed the design
  and installation of a groundwater treatment system to treat groundwater impacted from metals and
  selenium to meet NPDES discharge requirements for a basement dewatering system for a
  shopping center. He currently manages the operation, maintenance and reporting associated with
  the ongoing dewatering system.
- Black Mountain Industrial Complex Remedial Design and Implementation, Nevada Served as project manager for expedited investigation and remediation program for the Tronox industrial facility within the BMI Complex. Previously the world's largest magnesium production facility during World War II, the site was later utilized for the manufacture of rocket fuel, other products, and most recently alkali and manganese oxide-based chemicals. Historical Industrial operations resulted in subsurface impacts from heavy metals, perchlorate, pesticides, chlorinated solvents, asbestos, radionuclides, and other chemicals. Developed streamlined investigation and remedial approach, prepared remedial plans, and rapidly mobilized and managed a team of staff and subcontractors to remove approximately 800,000 cubic yards of soil from the site to meet commercial soil cleanup goals for direct contact exposure in an expedited timeframe.
- Hawaii Wood Preserving Company Treatment Facility, Maui, Hawaii Served as project manager, for decommissioning, investigation, remediation, and closure for a former wood treatment facility to allow for redevelopment. The site operated as from 1972 to 2001 to treat lumber with PCP, chromated copper arsenate (CCA), permithrin, and disodium octoborate. Chemicals were profiled, all equipment was decontaminated and ecommissioned, and verification sampling was conducted as part of decommissioning. A remedial investigation and remedial alternatives analysis was developed and implemented to investigate and develop a path-forward to closure. The implemented remedial approach consisted of site capping and long-term groundwater monitoring.
- Lockheed Martin Former International Light Metals Facility, Torrance, California Served as project manager and principal investigator for a 67-acre aerospace facility where client objective was expedited redevelopment. The project included facility demolition, preparation and implementation of a Resource Conservation and Recovery Act (RCRA) closure plan for 11 permitted RCRA units, negotiations with the Department of Toxic Substance Control (DTSC), preparation of a RCRA Facility Assessment (RFA) (210 features identified that required intrusive investigation), implementation of a RCRA Facility Investigation (RFI) for soil and groundwater, preparation of a health-based risk assessment, and implementation of soil remediation. Site closure for soil was granted only three years after project initiation, in contrast to the normal six to eight year process, and has been used as an example by head DTSC officials as an example of

- industry and the regulatory community working together to achieve expedited site closures for property redevelopment purposes. Mr. Willis also developed strategy for groundwater investigation and remediation and negotiated the corrective action consent agreement (CACA) with DTSC.
- Playa Capital Corporation, Playa Vista Development Project, Los Angeles, California Mr. Willis served as program manager for the Playa Vista project, one of the largest and most visible brownfield development projects in the country. At 1,100 acres, it is the largest underway in Los Angeles County. His primary responsibility included environmental program management (including scoping, developing, scheduling, and tracking environmental activities for the development project), risk management (including developing and negotiating with agencies for appropriate cleanup criteria), remedial strategy/management (including development and implementation of pilot tests and oversight of investigation and remediation activities), agency/RP/buyer negotiations, consultant and contractor selection/oversight, coordination with Playa's infrastructure group on the development/implementation of integrated remedial approach where appropriate, litigation support, data management, and transactional support with respect to the sale of remediated parcels.
- Project Manager, Confidential Client, Buena Park, California Served as project manager for
  multi-media remediation project at a commercial development in Buena Park, California. The site
  was a former food processing facility that was redeveloped into commercial offices and warehouse
  space. Evaluated the environmental liability for a Real Estate Investment Trust (REIT) that
  subsequently purchased the property, and managed remediation program in conjunction with site
  redevelopment.
- Project Manager, Brownfield Redevelopment, Torrance, California Served as project manager for site redevelopment project for a PacTrust. Evaluated environmental liabilities associated with a 12-acre parcel that was part of a butadiene plant (Del Amo Superfund Site) left undeveloped as a brownfield, and formulated a strategy to expedite regulatory closure and redevelopment. A comprehensive investigation was completed on the parcel, and the report submitted to the Environmental Protection Agency (EPA) for review. Successfully negotiated with EPA to conduct a non-Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) closure program. Conducted soil remediation program under EPA oversight in conjunction with site construction activities.
- Project Manager, Investigation and Remediation Program, Safety Kleen, Vancouver, British
  Columbia, Canada Managed remediation of former solvent recycler transfer stations in British
  Columbia and Alberta, Canada. Sites involved characterization and remediation of soil and
  perched groundwater zones. Assessed feasibility of vapor extraction for cleanup of vadose zone
  contamination, and designed and installed a dewatering system for perched water in former tank
  cavities and surficial saturated zone for Vancouver transfer station. Achieved regulatory site
  closure two years faster than previous consultant's estimate.
- Cupples Manufacturing, Investigation and Remediation Program, La Mirada, California —
  Project manager for soil/groundwater characterization and remediation program at a truck
  maintenance facility in La Mirada, California. Conducted an underground storage tank and clarifier
  removal program in conjunction with site characterization activities. Implemented remediation of
  soil and groundwater impacted with petroleum hydrocarbons. Negotiated and received closure
  from Regional Water Quality Control Board (RWQCB).
- Alberta Environment, Abandoned Wood Treatment Sites, Various Locations, Alberta, Canada
   Project manager for the Wood Preserving Sites Characterization Program for Alberta

G

Environment. Performed site characterization of four former wood preservation sites in Alberta, Canada. The sites had been used for many years for treating wood poles and railroad ties with a pentachlorophenol/diesel mixture. Soil and/or groundwater were impacted at the sites. Soil borings and groundwater monitoring wells were installed, and laboratory analysis of soil and groundwater was performed, to help determine the lateral and vertical migration of dissolved-phase hydrocarbons in the groundwater and dense non-aqueous phase liquids (DNAPLs) through glacial tills and several non-confining layers. Detailed drilling and sampling plans were necessary to ensure correct evaluation of vertical DNAPL migration. Aquifer tests were performed and receptor data were collected in order to formulate a quantitative assessment of both health-based and environmental risk.

- Texaco Refining and Marketing Inc., Investigation and Remediation Programs, Various Locations, Southern California Responsible for remediation programs at several petroleum retail outlets for Texaco in the southern California area. Projects included soil and groundwater investigation programs, underground storage tank (UST) removals, remedial design (including design and implementation of vapor extraction and aquifer tests), implementation of remedial program, and operation and maintenance of remediation systems. This included designing, specifying, permitting, and installing of all equipment (including piping, downhole pumps, off-gas treatment, and water treatment).
- Groundwater Contamination Investigation and Analysis, Technisol, Raymond, Alberta, Canada Conducted a groundwater investigation program at a solvent recycling facility located in southern Alberta, Canada. The program was implemented to determine the lateral and vertical extent of several species of chlorinated volatile organic compounds present in the confined aquifer beneath the facility. Aquifer testing was performed to estimate migration rates and to provide preliminary data for remedial action. Successfully negotiated with Alberta Environment (lead regulatory agency) for monitored natural attenuation approach.
- Pier A Railyard, Port of Los Angeles, Los Angeles, California Managed a soil and
  groundwater investigation program at a Port of Los Angeles rail transfer yard. The objective of the
  project was to characterize previously identified polynuclear aromatic compounds, volatile organic
  compounds, and petroleum hydrocarbons in the soil and groundwater, and identify any regulated
  building materials in the site structures in order to facilitate an expedited redevelopment program.
  The project was finished ahead of schedule and under budget.
- Soil and Groundwater Remediation, Texaco, Various Locations, Southern California —
  Conducted vapor extraction tests, performed data analysis, and generated recommendations for an
  industrial manufacturing facility to determine the viability of using vapor extraction for remediating
  chlorinated solvents, primarily tetrachloroethene (PCE), present in the soil beneath the facility. Each
  test was designed to assess air flow rates and vacuums, vertical interference and crossflow, radii of
  influence, potential for water upwelling, and effectiveness of vapor extraction in both vadose and
  capillary zones. Extracted vapors were collected to determine volatile organic compound
  concentrations. Data were used to determine well spacing and slotting intervals, optimum flow
  rate/vacuum combinations, extraction blower sizing, and vapor treatment equipment.
- **Texaco, Various Locations, Southern California** Responsible for preparation of South Coast Air Quality Management District (SCAQMD) permitting, installation, operation and maintenance of thermal and catalytic oxidizers/vapor extraction systems for the remediation of soil (containing petroleum hydrocarbons) beneath operating service stations.

#### **Litigation Support**

- Litigation Support, Confidential Client, City of Commerce, California Conducted site review
  of historical records, developed and implemented soil, soil vapor, and groundwater investigation,
  and developed Site Conceptual Model (SCM) for former aerospace facility that was now developed
  as a multi-tenant warehouse. Successful in being able reconstruct historical SCM to show that
  environmental impacts were caused by historic aerospace operations from the 1940s to 1960s and
  not from the more recent tenant operations. Provided information and deposition for property
  management firm's counsel.
- Mediation Support, Confidential Client, Los Angeles, California Project manager for mediation support of insurance claim for cost reimbursement for handling, transportation and disposal of petroleum contaminated soil encountered during development of a high rise on a former hospital site. Work consisted of using photogrammetry and historical records to develop a volume of contaminated soil and expert witness report using spatial data analysis, rebuttal of expert witness reports, and expert witness testimony as part of mediation where a judgement was made in favor of our client for the full reimbursement cost.

## **EDUCATION**

B.S., Geology, University of Alberta, Alberta, 1988

#### PROFESSIONAL HISTORY

Northgate Environmental Management, Principal, 2006 to date
LFR Levine Fricke, Principal Hydrogeologist, 2002 – 2006
Integrated Environmental Services, Director of Operations/Senior Program Manager, 1999–2002
ARCADIS Geraghty & Miller, Inc. Senior Hydrogeologist, 1993 – 1999
Environmental Design Corporation, Vice President, 1992
Environmental Science & Engineering, Inc., Staff Geologist, 1991
Terracon Geotechnique, Ltd., Geologist, 1989 – 1991
Contract Positions, Various Locations, Geologist, 1988

## REGISTRATIONS

Certified Environmental Manager, Nevada, No. EM 2252

## NICKY G. ROBINSON, PE PROJECT I ENGINEER

Ms. Robinson has a variety of experience serving both public sector and private clients. Her professional engineering and management experience has been focused in remediation design and construction site oversight, Phase I and II environmental site assessments, environmental field sampling, environmental audits, site inspections, and technical data review. Ms. Robinson's environmental field experience includes soil and groundwater sampling, soil vapor studies, stormwater sampling, indoor air quality studies, air monitoring activities, and site cleanups. She has considerable experience managing and performing environmental due diligence and property transfer projects. Ms. Robinson is a licensed Civil Engineer in the state of California and has received the OSHA 40 Hour HAZWOPER Training.

### REPRESENTATIVE EXPERIENCE

#### **Environmental Characterization and Remediation**

- Baker Cold Storage Facility Brownfield Clean-up, Long Beach, California Ms. Robinson is the engineer of record for the remedial design for a site that is impacted with pentachlorophenol (PCP), metals, VOCs, and dioxins/furans and under the regulation of the DTSC. She assisted with the development of the Soil and Groundwater Response Plan and the Remedial Design Document for the site that is currently being developed with a 250,000 square-foot cold storage facility. During development, Ms. Robinson conducted oversight of the site activities, including soil import/export, excavation, construction, and the installation of a methane barrier, and she has performed work zone and perimeter air monitoring. She also prepared daily activity reports including the analysis of air monitoring and Rule 1166 monitoring data to submit to the DTSC. Ms. Robinson coordinated field activities including the decontamination and sampling of former drip pads, air monitoring activities, and wastewater sampling. She managed the data obtained from daily field activities and trained the field staff. Ms. Robinson prepared the Remedial Action Completion Report and the Operation and Maintenance Plan for the remedial activities.
- Black Mountain Industrial Complex, Henderson, Nevada Ms. Robinson was a field engineer on site for the remediation of Tronox's industrial facility in Henderson, Nevada in which approximately 800,000 cubic yards of impacted soil were removed. Previously the world's largest magnesium production facility during World War II, the site was later utilized for the manufacture of rocket fuel, other products, and most recently alkali and manganese oxide-based chemicals. Historical Industrial operations resulted in subsurface impacts from heavy metals, perchlorate, pesticides, chlorinated solvents, asbestos, radionuclides, and other chemicals. Her responsibilities included providing technical oversight of excavation, construction, and groundwater pumping well installation activities; collecting groundwater samples; obtaining soil and air samples; monitoring dust levels; and conducting weekly site inspections for SWPPP compliance. Ms. Robinson coordinated with design engineers to oversee the installation of their remediation and monitoring systems and provide field support and input for design revisions.

G

- CenterCal Development, Long Beach, California Ms. Robinson is the engineer of record for the remedial design of a property in Long Beach that was formerly partially occupied by a gasoline service station with documented leaking underground storage tanks (USTs) impacting the subsurface. Historic site operations also included oil wells and crude oil pipelines. Ms. Robinson assisted with the design of an excavation program to remove impacted materials to accommodate the development of a mixed-use commercial and residential facility. Her work included analyzed historic investigation results and analytical data to determine the remediation program and provide support for the engineering decisions to reach a settlement agreement with the responsible party for the contamination present at the Site. Ms. Robinson also assisted with the preparation of various documents and reports for the site including a Remedial Action Plan, remedial costing analysis, and responses to questions from regulators and the responsible party.
- Kimco Lakewood Plaza, Bellflower, California Ms. Robinson conducted soil and indoor air sampling to help determine a remedial design for soil impacts with VOCs from a former dry cleaning operation. She oversaw excavation activities and collected confirmation samples. Ms. Robinson managed the data and documents associated with the project and assisted with the preparation of final reports.

## Environmental Site Assessments, Due Diligence, and Site Investigations

- Baker Cold Storage Facility Brownfield Clean-up, Long Beach, California Ms. Robinson prepared an initial Phase I ESA and conducted site visits for the site that is impacted with pentachlorophenol (PCP), metals, VOCs, and dioxins/furans and under the regulation of the DTSC. In addition, tidally influenced groundwater is impacted with PCP and petroleum hydrocarbons and methane charged from oilfield operations. She also conducted a groundwater investigation program to evaluate impacts for the design of the remedial actions and prepared reports documenting the field investigations for submittal to the DTSC.
- CenterCal Development, Long Beach, California Ms. Robinson prepared an initial Phase I ESA, conducted site visits, coordinated a site investigation program with soil, groundwater, and soil vapor sampling, and prepared reports and documentation for a property in Long Beach that was formerly partially occupied by a gasoline service station. The site was purchased by a developer to construct a mixed-use commercial and residential facility after remediating the known impacts that resulted from releases at the underground storage tanks associated with the gasoline station.
- Historic Oil Fields, Brea, California Ms. Robinson conducted a Phase I ESA of historic oil fields spanning over 3,000 acres in Brea with operations still active across portions of the site. She coordinated a limited Phase II investigation across the site and utilized the results to prepare remedial cost documents, estimate of impacted material, and recommendations for areas of potential concern for redevelopment. She prepared all documentation, figures, and spreadsheets for meetings with developers interested in redeveloping the site.
- Park and Market Redevelopment, San Diego, California Ms. Robinson managed and performed field activities, investigations, and oversight of the redevelopment of a property located in downtown San Diego that was formerly occupied by automobile repair facilities and several burn wells and pits associated with historic residential development. She conducted a Phase I and II ESA of the site which is currently being redeveloped with a high-rise residential tower over commercial development with subterranean parking extending to approximately 50 feet below ground surface. During excavation activities, impacted soils were encountered when former burn wells impacted with elevated concentrations of lead up to 60,000 parts per million. Ms. Robinson

G

prepared a site specific Health and Safety Plan and a Soil Management Plan for use during redevelopment. She also collected samples of impacted areas encountered, provided guidance to the developer regarding the disposal of the impacted material and proper handling procedures, and provided oversight of all work conducted with impacted materials. Ms. Robinson prepared summary reports of the field activities including analytical results, impacted soil removal totals, and photograph documentation of all activities.

- Monsanto Former Detergent Manufacturing Facility, Carson, California Ms. Robinson
  measured groundwater levels and collected groundwater samples to monitor for hydrocarbons,
  predominantly benzene, which migrated through the soil to the groundwater beneath the site and
  migrated downgradient. Some samples were collected on the adjacent oil refinery property and
  Ms. Robinson received the appropriate training to access the refinery.
- Oxygen Biosparge Pilot Scale Investigation, Carson, California Ms. Robinson collected groundwater samples using low flow sampling techniques as part of an oxygen biosparge in situ treatment system. Work was performed using supplied air in Level B personal protective equipment. She also routinely works in conjunction with a mobile laboratory to simultaneously collect and analyze soil vapor samples to monitor benzene concentrations as part of the pilot scale investigation.
- Los Angeles World Airports, Los Angeles International Airport, Los Angeles, California –
   Ms. Robinson reviewed historical reports, documents, and data for multiple portions of the Los
   Angeles International Airport and prepared summary documents. She also managed the review of
   similar work by other consultants for the facility. Ms. Robinson utilized the results of these
   investigation efforts to develop a facility wide groundwater monitoring program.
- Former Paint Facility, City of Commerce, California Ms. Robinson was responsible for
  coordinating the field activities associated with collecting soil vapor and LNAPL samples for a
  former paint facility. A soil vapor extraction system was operated on the site and sampling was
  performed to develop a conceptual site model to assess the effectiveness of continued remediation
  at the Site. Ms. Robinson was responsible for coordinating the sample collection and analysis with
  the laboratory and worked to draft the analytical report.
- Los Angeles Residential Redevelopment, Los Angeles, California Ms. Robinson has
  performed various Phase I and II ESAs for locations in Los Angeles slated for redevelopment for
  commercial and/or residential use. She has also conducted and completed preliminary
  endangerment assessments and obtained necessary permits for construction (NPDES, Rule 1166,
  etc.) on behalf of the developer to support the redevelopment activities.
- Port of Oakland Embarcadero Cove, Oakland, California Ms. Robinson was a staff engineer
  on site to oversee the abandonment of existing groundwater monitoring wells and the installation
  and development of new groundwater monitoring wells. Her responsibilities also included annual
  groundwater sampling at the site that is known to have been impacted by VOCs, SVOCs,
  organochlorine pesticides, PCBs, dioxins, and furans from facilities that previously occupied the site
  that were known to have handled and stored solvents, refined petroleum products, wood,
  preservatives, pesticides, and herbicides. She also assisted the preparation of the annual report
  and five year review for the site.
- Former Apartment Complex Close-Out, Carson, California Ms. Robinson was responsible for the oversight of environmental field activities related to the demolition of an existing apartment complex for redevelopment. Field activities included asbestos and lead-based paint surveys and

- removal, hazardous waste packaging and disposal, geophysical surveys, and air monitoring. Ms. Robinson also prepared close out reports and documents for the site.
- Former Dry Cleaning Facility, Santa Rosa, California Ms. Robinson performed low flow
  groundwater sampling for quarterly reporting for a site containing both a dry cleaner and a
  residential apartment building to monitor impacts to the groundwater. The site is known to have
  existing soil and groundwater impacts from historic use and storage of petroleum products and
  other hazardous substances on surrounding sites.
- King's Court Shopping Center, Los Gatos, California Ms. Robinson collected groundwater samples for the semi-annual monitoring report, in compliance with a monitoring plan outlined by the California Regional Water Quality Control Board.
- Wetland Restoration Project, San Francisco, California Ms. Robinson reviewed contractor submittals, including dust control, decontamination, soil stabilization, and execution plans for compliance with the project specifications and regulatory requirements and prepared responses to requests for information for the restoration of 26.5 acres of tidal wetland habitat. The site is known to have soil containing naturally occurring asbestos, copper, lead, nickel, zinc, TPH, PAHs, pesticides, and PCBs and some metals impacting groundwater.
- Environmental Site Assessments, Various Locations, California, Nevada, and Texas Ms. Robinson has managed and conducted dozens of Phase I and Phase II environmental site assessments for commercial, industrial, and residential properties. Her responsibilities included complete site history reviews, identifying recognized environmental conditions and areas of potential concern, as well as field sampling and analysis to investigate potential impacts to soil and groundwater quality. Ms. Robinson assisted with the design of investigation programs, coordinated with field staff and subcontractors, and analyzed results to determine remedial actions. She also managed budgets, schedules, and client communication. Work was performed in general conformance with the ASTM environmental assessment standard and the U.S. EPA All Appropriate Inquiry guidelines.

### Stormwater Monitoring and Compliance

- Machado Lake Nutrient TMDL Sampling, Rolling Hills Estates, California Ms. Robinson was
  the field lead for the collection of stormwater samples and flow measurements in accordance with
  the Palos Verdes Peninsula Coordinated Monitoring Plan and the Machado Lake Eutrophic, Algae,
  Ammonia, and Odors (Nutrient) TMDL (established by the Los Angeles Regional Water Quality
  Control Board) to monitor nutrients, including nitrogen and phosphorous discharged from Rolling
  Hills Estates to Machado Lake. Sampling activities included rapid mobilization during wet weather
  and dry weather events on a monthly basis between 2012 and 2016 to collect samples from surface
  waters and confined conveyance systems. She calculated monthly averages of total nitrogen and
  total phosphorous and compared the results to waste load allocations to determine attainment
  status.
- Machado Lake Nutrient TMDL Sampling, Torrance, California Ms. Robinson was the field lead for the collection of stormwater samples and flow measurements in accordance with the provisions of the Machado Lake TMDL Special Studies Work Plan and the Machado Lake Eutrophic, Algae, Ammonia, and Odors (Nutrient) TMDL (established by the Los Angeles Regional Water Quality Control Board) to monitor nutrients, including nitrogen and phosphorous discharged from the City of Torrance to Machado Lake. Sampling activities included rapid mobilization during wet weather and dry weather events on a monthly basis since 2012 and data collection from data loggers to

G

- calculate flow rate and discharge volume and to monitor storm events. She also maintains discharge flow and volume calculations for annual reporting and assists with the preparation of annual report document.
- Anthropogenic Source Nutrient Assessment, Rolling Hills Estates, California Ms. Robinson
  was a field lead for wet weather event stormwater sampling conducted for identification of nutrient
  sources to study nutrient load reduction at the Model Equestrian Center Project, Rolling Hills
  Estates, California.

## **Engineering Design**

- Baker Cold Storage Facility Brownfield Clean-up, Long Beach, California Ms. Robinson is
  the engineer of record for the remedial design for a site that is impacted with pentachlorophenol
  (PCP), metals, VOCs, and dioxins/furans and under the regulation of the DTSC. She assisted with
  the development of the Soil and Groundwater Response Plan and the Remedial Design Document
  for the site that is currently being developed with a 250,000 square-foot cold storage facility. The
  remedial design included a passive vapor mitigation system with a site cap. Ms. Robinson prepare
  the Remedial Action Completion Report and the Operation and Maintenance Plan for the remedial
  activities.
- Vapor Barrier System Design for Duplex Development, Los Angeles, California –
  Ms. Robinson was one of the engineers responsible for the design of a vapor barrier system to
  prevent intrusion of VOCs in soil vapor into the development of several residential duplexes. Her
  work included working with a Principle Engineer to design the system and details and prepare the
  design drawings. Ms. Robinson also prepared inspections and oversight of the installation of the
  system.

#### Regulatory Compliance

- National Pollutant Discharge Elimination System Monitoring, Marina del Rey, California –
  Ms. Robinson coordinates field activities associated with water quality sampling and analysis, flow
  data collection and analysis, and system operation and maintenance for a groundwater treatment
  system for VOCs, selenium, and metals prior to discharge to the storm drain. Her responsibilities
  also include preparing quarterly and annual monitoring reports for the Regional Water Quality
  Control Board per requirements in the monitoring and reporting program of the NPDES permit for
  the project. She currently manages the testing, maintenance, and reporting associated with the
  ongoing dewatering system.
- Environmental Audits, Various Locations, California Ms. Robinson has performed and
  managed multiple environmental audits at several commercial and industrial facilities in California.
  Her responsibilities included conducting interviews with current tenants, inspecting site facilities to
  determine environmental compliance or potential issues, and completing a final audit report of
  findings. She also managed budgets, schedules, and client communication.
- Energy Benchmarking, San Francisco, California Ms. Robinson has performed energy benchmarking for several properties in San Francisco to maintain compliance with the requirements of SF Environment.

### **EDUCATION**

## **PROFESSIONAL HISTORY**

Northgate Environmental Management, Inc., Project Engineer, January 2015 to date Northgate Environmental Management, Inc., Staff Engineer, August 2010 to January 2015 Incledon Consulting Group, Civil Engineer, July 2009 to July 2010 Incledon Kirk Engineers, Engineering Intern, June to September 2007 and June to September 2008

#### **REGISTRATIONS / CERTIFICATIONS**

Professional Engineer, California, No. 83985 OSHA 40-hour HAZWOPER

#### **PRESENTATIONS**

Brown, D., Dettle, J., and Robinson (Galloway), N., 2016. *Update on City of Torrance Stormwater Quality Project*, presentation, poster, and proceedings for the California Stormwater Quality Association's 12<sup>th</sup> Annual Conference on Stormwater Evolution: Source to Resource, San Diego, California. September 12-14, 2016.

Robinson, N., and Willis, D. 2018. *Minimizing Environmental Exposure by Incorporating Redevelopment Design in Remediation of Former Wood Treatment Facility*, poster and proceedings for the Association for Environmental, Health and Sciences Foundation's Annual West Coast Conference. March 19-22, 2018.
