FINDINGS

1. Pursuant to State Government Code Section 65868 et seq., a development agreement may be amended by mutual consent of the parties.
2. The City of Los Angeles (“City”) has adopted rules and regulations establishing procedures and requirements for consideration of development agreements under Citywide Development Agreement Procedures (CF 85-2313-S3). In addition, on November 19, 1992, the City Planning Commission adopted new guidelines for the processing of development agreement applications (CPC No. 86-404 MSC).
3. In accordance with Section 12.32 of the LAMC and California Government Code Section 65867, notification within a 300-foot radius of the Project Site, were mailed out on February 8, 2022 to all occupants and property owners, neighborhood council and others as identified in the mailing affidavit located in the administrative record. Further, notice of the public hearing was also published in the Daily Journal on February 11, 2022; verification of which is provided in the administrative record.
4. Pursuant to Section 65867.5 of the Government Code, the proposed Third Amendment to Development Agreement is consistent with the objectives, policies, and programs specified in the City of Los Angeles General Plan, including the Chatsworth-Porter Ranch Community Plan adopted by City Council on September 4, 1993 (CF 91-1045-43). Orderly development of the Project Site is further governed by the Porter Ranch Land Use/Transportation Specific Plan adopted by City Council of July 10, 1990 (CF 86-2001-S2). The Project provides a wide array of benefits to the neighborhood and surrounding area, including new parkland, expansion of the region’s access to public open space and facilities, a new school and library to further expand educational resources for residents, and senior housing and assisted living units. These provisions help create more amenities to help further the goals set forth in the General Plan by further increasing access to open space, educational facilities, housing, transportation infrastructure, cultural resources, and utilities.
5. The Transportation Element of the General Plan (adopted by City Council on January 16, 2016) will not be affected by the recommended action herein. This amendment is administrative and technical in nature and will have no impact on the previously approved project under Environmental Impact Report EIR No. 1988-0026(SP)(ZC)(PA) (SCH No. 88050420) certified by the City Council on July 10, 1990 or the Transportation Element of the General Plan. The scope of the project has not changed. The proposed Third Amendment to the Development Agreement will not be detrimental to the public health, safety and general welfare. Approval of the Third Amendment to the Development Agreement will promote the expeditious and guaranteed delivery of transportation public benefits, including the development of a Transportation Management Association and roadway expansions on major thoroughfares, and is therefore consistent with the Transportation Element.
6. The proposed Third Amendment to Development Agreement complies in form and substance with all applicable City and State regulations governing development agreements.
7. Based upon the above Findings, the proposed Third Amendment to Development Agreement is deemed consistent with public necessity, convenience, general welfare, and good zoning practice given the fulfillment of multiple benefits on behalf of the applicant.

The extension will give additional time to provide units of housing, open space, and equestrian trails for the region.

CEQA Findings

CEQA and the State CEQA Guidelines (California Code of Regulations, Title 14, Chapter 3, Sections 15000-15387) allow the City to rely on the previously certified EIR unless a Subsequent or Supplemental EIR is required. Specifically, CEQA Guidelines Sections 15162 and 15163 require preparation of a Subsequent or Supplemental EIR when an EIR has been previously certified or a negative declaration has previously been adopted and one or more of the following circumstances exist:

- 1) Substantial changes are proposed in the project which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects;
- 2) Substantial changes occur with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or
- 3) New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was certified as complete or the negative declaration was adopted, shows any of the following:
 - A. The project will have one or more significant effects not discussed in the previous EIR or negative declaration;
 - B. Significant effects previously examined will be substantially more severe than shown in the previous EIR;
 - C. Mitigation measures or alternatives previously found not to be feasible would in fact be feasible and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measure or alternative; or Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR would substantially reduce one or more significant effects on the environment, but the project proponents decline to adopt the mitigation measure or alternative.

None of the above changes or factors has arisen since the approval of the Project. There are no substantial changes to the Project, and it is substantially the same as the approved project. No substantial changes have been identified to the surrounding circumstances, and no new information of substantial importance has been identified since the approval of the Project. There is no evidence of new or more severe significant impacts, and no new mitigation measures are required for the project.

Accordingly, there is no basis for changing any of the impact conclusions referenced in the certified EIR's CEQA Findings. Similarly, there is no basis for changing any of the mitigation measures referenced in the certified EIR's CEQA Findings, all of which have been implemented as part of the conditions of approval. There is no basis for finding that mitigation measures or alternatives previously rejected as infeasible are instead feasible. There is also no reason to change the determination that the overriding considerations referenced in the certified EIR's CEQA Findings, and each of them considered independently, continue to override the significant

and unavoidable impacts of the Project.

Therefore, as the Project was assessed in the previously certified EIR and subsequent addenda, and pursuant to CEQA Guidelines Section 15162, no supplement or subsequent EIR or subsequent mitigated negative declaration is required, as the whole of the administrative record demonstrates that no major revisions to the EIR are necessary due to the involvement of new significant environmental effects or a substantial increase in the severity of a previously identified significant effect resulting from changes to the project, changes to circumstances, or the existence of new information. In addition, no addendum is required, as no changes or additions to the EIR are necessary pursuant to CEQA Guidelines Section 15164.

RECORD OF PROCEEDINGS

The record of proceedings for the decision includes the Record of Proceedings for the original CEQA Findings, including all items included in the case files, as well as all written and oral information submitted at the hearings on this matter.
