To PLUM:

I oppose 22-0158 as I don't think we need to change our zoning to house and address our homeless population. Certainly, not without input from the communities such actions will directly impact on a 24hour/365 days basis. And the last sentence in that motion calls for making our current temporary shelters permanent without proper checks and balances to address the concerns of the communities where such shelters will be located. At a minimum LAMC 41.18 should be included in this motion to address community safety and health concerns. This motion is another poorly planned quick fix that ignores the concerns of the community and provides no community engagement.
