**Comments for Public Posting:** I think we need an inventory of sidewalk status as I have seen many unsafe sidewalk conditions on many of our Los Angeles streets, including my immediate neighborhood. I also would like there to be oversight on making sure that there is coordination between departments for planning. Example, the Metro BRT plan to put rapid bus transit from the valley to Pasadena will include sidewalk repairs... to make sure that two different entities in the city don't repair the SAME sidewalks within a few years of each other. Let's make sure all Angelenos can use the sidewalks!
