Comments for Public Posting: I really think Alternative Plan 1.5 is the way to go! It prioritizes both the animals & conservation and accessibility in visitor experience. Giving the animals more room to roam will hopefully provide them with better living conditions and improve their own health. In addition, I liked the emphasis on making everything ADA accessible, such as the entrance being a slow inclined ramp so all families can come in together and enjoy the zoo. Overall, I'm really in favor of this plan.

Comments for Public Posting: Any type of new renovations that will better the experience of attending a zoo or any wildlife sanctuary im fully support of. The new renovation plan will make the experience better for the paying attendees as well as for the wildlife. La Zoo has been renovated 3 times and each time it has been beneficial for me in terms of experience/ animals I've seen as well as food. Whatever renovation come up from this project I know it's for the better of the zoo and the city.

Comments for Public Posting: I support project 1.5. This project not only focuses on social and environmental justice it also considers every aspect needed to make the LA zoom more accesible and safe to everyone. It seeks to educate us all on wildlife, conservation, animal welfare, and sustainability. This is something that the park previously lacked in. I truly feel this project heard feedback from the community and acted upon it. And for this very reason I support project 1.5.

Comments for Public Posting: I believe the new changes to the LA zoo will be a step in the right direction. As a Los Angeles resident, improving the Zoo's overall accessibility and providing a more immersive experience will be great alongside knowing that the animals here will also be receiving the best care possible.
